

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

#### PREFACE.

HE numerous additions made to the Collection, whilft this Catalogue has been in course of preparation, have rendered it impossible to arrange the work as systematically as could

be wished: the several sections consequently follow each other without any particular method of classification.\*

In gathering together the very varied objects herein described, the owner has been guided by a general taste for art, the indulgence of which appeared to him preferable to the confining his acquisitions within strictly-defined limits.

This plan, befides affording the widest and most fruitful field for his researches, seemed also likely, in its results, to be more agreeable to friends and visitors, for whose enjoyment, not less than for the owner's own pleasurable occupation, this Collection has been formed.

<sup>\*</sup> Owing to this cause, and to other unavoidable circumstances, the engravings of gems are not arranged in numerical sequence on the plates, neither has it been possible to make adequate reference to them in the text.

## VENETIAN AND GERMAN GLASS WARES.

N the Middle Ages and down to the seventeenth or eighteenth century even, Venice was the great centre of the Glass Manufacture—the workshops of the neighbouring island or suburb of Murano supplying all

Europe; and, notwithstanding the extreme fragility of the material, a great number of pieces of this manufacture have been handed down intact to the present time. These are generally of the more elaborate or costly kind, greater care having naturally been always taken of the more important than of the less valuable specimens.

From the intrinsic beauty of the Venetian Glass Wares, the extreme variety in design, and the diversity of technical processes displayed in them, they have become favourite objects of research to modern Connoisseurs, and remarkable specimens, in consequence, frequently command high prices.

Venetian Glass is generally of extreme thinness, being nearly always blown, and very rarely cut on the wheel. Apparently, there are few pieces extant of an earlier date than the latter years of the fifteenth century: the art, however, was in full exercise in Venice long before that time.

Gilding and decoration in enamel colours are very frequent

in the early quattro-cento pieces. The laticinio, or filagree varieties, Vitro de trina, &c., to all appearance, were the product of the fixteenth century, and the majority of the specimens in Collections probably belong to the second half of that century; it is, however, very difficult to determine the exact age of Venetian Glass Wares, positive data being very seldom obtainable.

The following are the principal varieties:—First. "Laticinio," or filagree glass, of which there is a great diversity of patterns, is characterized by coloured threads (generally opaque milk white, hence the word "laticinio"), included in the mass of transparent glass, which, by various methods of manipulation, are twisted or woven into regular spiral or reticulated patterns, producing in some specimens, a kind of network of delicate lines spread over the piece ("Vitro de trina," or lacework glass). This latter term, however, is generally applied to specimens in which the white threads are crossed at an angle, forming lozenge-shaped compartments, each of which sometimes contains a small air-bubble.

"Millefiore" glass displays an infinity of eccentric patterns—stars, circles, &c.—produced by mingling small cylindrical pieces of various coloured silagree glass, cut from thin rods, with the melted mass from which the vessels are blown.

"Schmelze, and "Schmelze-Avanturine." The former of these varieties is a semi-opaque glass of a rich variegated brown, green, or bluish colour, which, when seen by transmitted light, takes a deep blood-red tint. Patches or globules of gold, sometimes seen on the surface of this kind of glass, constitute the "Schmelze-Avanturine."

The Avanturine is obtained by mingling metallic filings or levigated leaf gold with the melted glass, in the mass of which it is seen suspended in the shape of brilliant particles.

Frosted or crackle glass is another characteristic variety. In Germany, in the fixteenth and seventeenth centuries, enamel painting on glass wares was much practised. The large cylindrical drinking vessels are the most characteristic pieces: they are decorated with a great variety of designs, armorial bearings and inscriptions. Cutting and engraving were first prominently practised in Germany (Bohemia), not much earlier than the latter part of the seventeenth century, coincident with the increased purity and beauty of the material, which had gradually been made to rival the brilliancy of crystal, and naturally suggested facet cutting for its most effectual display.

#### CATALOGUE.

#### I.—VENETIAN AND GERMAN GLASS WARES.

#### No. 1.

ribbed or fluted, the lower part of the bowl enriched with waved flames or pointed rays, alternately in blue enamel and gold; the margin, &c., furrounded by gilt zones, picked out with pearls or jewels, in white, red, and blue enamels. This piece was probably intended as a wedding gift. Date—circa 1500. Height, 7\frac{1}{4} in. (Rouffel Collection.)

#### No. 2.

GOBLET, blue ribbed stem, the bowl enriched with diamond-shaped compartments, formed by raised canes, which are filled in with rosettes in green, red, white, blue and yellow enamels; the margin surrounded by a wreath of green foliage, broken by sour rosettes; the lip gilded and studded with raised pearls in enamel. Height, 6½ in. Date—end of the sifteenth century.

## No. 3.

WER OF GLOBOSE FORM, the lip compressed to form the spout; plain recurved handle, the body of the piece painted with an enamelled shield of Arms within a wreath, decorated with gilding and jewel-work, ribbons, &c.; at the sides are painted sour winged cherubs in enamel. The neck of the piece is surrounded with a zone of imbricated ornament in gold, enriched with enamelled jewels. Quattre-cento period. Height, 8 in.

#### Nos. 4 and 5.

under sides enriched with raised oblique, radiating gadroons, the outer margins surrounded by deep bands of gilded scale work and pearls in enamel, and in the centre of each is a shield bearing the Arms of Pope Leo X., surmounted by the papal tiara and cross keys. Circa 1510. Diam., 9½ in.; height, 3 in.

#### No. 6.

ARGE FLASK, OR PILGRIM'S BOTTLE, enriched on each fide with an enamelled fhield of Arms, furmounted by a prelate's or cardinal's hat, within a wreath of gilded foliage, &c.; the neck and margin of the piece furrounded by fimilar wide gilded wreaths. The Arms are those of the Pucci family. Circa 1530. Height, 14½ in.

#### No. 7.

WER OR "BURETTE," the body globular; tall, ftraight neck, the lip furrounded with a raifed creft or crown of projecting Vandyked points; elegant curved

handle, and long spout. This beautiful piece is entirely covered with vertical columns of *laticinio* work, alternately of plain white and interlaced *filagree* stripes. Its shape resembles that of the "burettes" in metal, so much used in the fourteenth and sisteenth centuries. Height, II in. Date—probably first half of the sixteenth century.

#### No. 8.

VIFORM EWER, with compressed tresoil lip and raised handle, the lower extremity of the latter terminating in a moulded mask. The piece is entirely covered with vertical columns of laticinio work of an open reticulated pattern. The columns or canes are in juxta-position; so that the entire surface is silled in. The shape, derived from the Antique, is very elegant, and is identical with that of the Venetian engraved brass rose-water ewers, of circa 1540. Entire height, 10 in.

#### Nos. 9, 10, and 11.

HREE FUNNEL-SHAPED GLASSES, OR GOBLETS on tall stems, variously ornamented with bulbs, balls, bosses, & e. These pieces are grotesques, perhaps intended to hold flowers, but more likely merely "tours de force" of glass-blowing; they illustrate the inexhaustible fancy of the Venetian artists in glass, and their great manual skill. Heights, respectively, 10 in., 10½ in., and 11 in. Seventeenth century.

#### No. 12.

ALL GOBLET, OR "HANAP," with cover, in plain blown glass of black or smoky tint. The bowl funnel-shaped. Tall, baluster stem. The simple elegance of

this piece is very noteworthy, all the forms being well contrasted and of great purity. Seventeenth century. Height, 15 in.

## No. 13.

wrought stem; pale, smoke-tinted glass. The lower part of the bowl ornamented with raised ribs and small knobs or bosses. The stem is enriched with a rosette or star, contained within an open ring formed by a spiral cane, the outer margin fringed with radiating points. Seventeenth century. Height, 13½ in.

## No. 14.

ARGE WINE-GLASS OR GOBLET on tall stem, the bowl plain. The stem forming a heart-shaped compartment of involuted cord, the outer margin of which is enriched with wing-mounts. The cord of the stem encloses threads or filets of red, blue, and yellow glass. Seventeenth century. Height, 11½ in.

#### No. 15.

ARGE WINE-GLASS, of very similar design—the corded stem enclosing red and white silets; the wingmounts in blue glass. Seventeenth century. Height, 101 in.

## No. 16.

EEP FUNNEL-SHAPED GOBLET, OR WINE-GLASS, on low ftem. The bowl enriched with oblique spiral lines of laticinio. The stem or knob moulded with lion's head, masks, and garlands of pendent pearls

in relief. The colour of the glass, black or "enfumé." Sixteenth century. Height, 111 in.

#### No. 17.

INE-GLASS of fimilar form—the bowl furrounded with fixed fipiral bands of laticinio. The knob in the stem, enamel gilded. Sixteenth century. Height, 9 in.

#### No. 18.

YLINDRICAL BEAKER, enriched with vertical columns of laticinio, alternately plain and filled in with filagree work. In the centre of the glass are attached four grotesque marks in relief, heightened with gold, and four smaller projecting bosses, each with a small bead of turquoise glass in the centre. Sixteenth century. Height, 71 in.

#### No. 19.

OBLET in "Vitro de trina"—the bowl fluted or hexafoil shaped, the under part formed by four superposed
flattened bulbs. A circular boss or knob on the stem.
The "laticinio" filets form lozenge-shaped compartments, and
the oval air-bubbles lie under the points of intersection of the
threads. An exquisite specimen of Vitro de trina, of great technical interest. Height, 72 in.

#### No. 20.

UP, OR GOBLET—the bowl of an elegant calyx or bell shape—Vitro de trina, of the same pattern as the previous piece. Sixteenth or seventeenth century. Height, 5\frac{3}{4} in.; diam., 5\frac{5}{8} in.

#### No. 21.

IDE FUNNEL-SHAPED GLASS, on tall baluster stands stem, which is decorated with delicate, lateral, winged, or "cock's-comb" mounts, in blue and white glass. Seventeenth century. Height, 7 in.

#### No. 22.

UNNEL-SHAPED WINE-GLASS—the lower part expanding into a spherical bulb, with handles attached to the bowl. Low moulded stem in blue glass. Seventeenth century. Height, 6½ in.

## No. 23.

ALL FUNNEL-SHAPED WINE-GLASS—the stem in open-work, formed by a twisted cord of colourless glass, with an involuted wing-scroll ornament, in blue glass, attached to it at right angles. A specimen of elegant and unusual design. Sixteenth or seventeenth century.

#### No. 24.

INE-GLASS, on baluster-shaped and spiral moulded states stem, with lateral "cock's-comb" mounts in plain glass. The bowl beautifully moulded or involuted near the lip. Sixteenth or seventeenth century. Height, 7 in.

## No. 25.

OBLET, OR TAZZA, on moulded baluster stem—the bowl plain, the stem enriched with lion's-head masks in relief, cartouches, gadroon ornaments, &c.; the glass black or smoke-tinted. Sixteenth century. Height, 6 in.; width of bowl, 6 in.

#### No. 26.

EXAFOIL, OR FLUTED GOBLET—the bowl furrounded in the lower part with a horizontal band of laticinio work; moulded and gilded baluster stem, enriched with griffins' heads and strings of pendent pearls; smoke-tinted glass. Sixteenth century. Height, 4½ in.; width across bowl, 4½ in.

#### No. 27.

MALL BELL-SHAPED GLASS on low stem, with blue handles or wing-mounts affixed to the bowl. Sixteenth or seventeenth century. Height, 5 in.

#### No. 28.

ELL-SHAPED GOBLET, on ribbed, bulbed, or baluster stem, the bowl of dark purple, and the foot in white or colourless glass. Sixteenth century. Height, 6 in.

#### No. 29.

VAL RIBBED GOBLET, OR WINE GLASS, on tall twifted stem. Yellowish *enfumé* glass. A specimen of elegant and unusual design. Sixteenth or seventeenth century. Height, 6½ in.

## No. 30.

AZZA, the bowl ribbed, and refembling in shape the expanded calyx of a flower; plain baluster-shaped stem. Fifteenth century. Height, 5½ in.; diam., 5½ in.

## No. 31.

OTTLE, OR FLOWER VASE, the lower part forming a flattened or depressed bulb, the neck or bowl above, ribbed and bell-shaped. The material of this glass, of great rarity, resembles the Schmelze-Avanturine. The ground, however, is a rich opaque yellow glass, mottled or marbled with deep crimson brown, plentifully interspersed with gold Avanturine. The intention has been to imitate tortoise-shell. Seventeenth or eighteenth century. Height, 5% in.

## No. 32.

ASE, OR BOTTLE, in dark blue glass, the lower part of the elongated bulbous body diamond or bulb-moulded; the neck expands again into a funnel shape, the lip cut and *Vandyked*; the recurved handles are affixed near the neck in white glass; the foot also is in white or colourless transparent glass. A rare and remarkable piece. Height,  $8\frac{1}{2}$  in.

## No. 33.

UNNEL-SHAPED WINE-GLASS, on beaded and fpiral-ribbed baluster stem, with transverse wing mounts in white and blue glass. Seventeenth century. Height, 7\frac{3}{8} in.

## No. 34.

ELL-SHAPED GOBLET, on raised baluster stem, the lower part of the bowl surrounded by a transverse raised filet, and by raised gadroons and projecting points, or knobs. The stem enriched with lion's-head masks, strings of pendent pearls, &c. Sixteenth century. Height, 7 in.

#### No. 35.

MALL BOTTLE, the body forming a flattened bulb, with a raised transverse bead or moulding surrounding it. The body is in frosted or crackled glass. Slender neck in plain glass, compressed lip, and two transverse handles. Sixteenth century. Height, 4 in.; width, 4 in.

## No. 36.

AZZA GOBLET on low stem, the bowl richly ornamented with radiating or vertical canes of laticinio, disposed in a waved or undulating manner by alternate broad white stripes and interlaced silagree work. A rare and beautiful specimen, both as respects design and manipulative skill. Sixteenth or seventeenth century. Height, 4 in.; width, 7 in.

## No. 37.

OTTLE with cup-shaped cover and winged handles— Vitro de trina. Seventeenth century. Height, 52 in.

## No. 38.

OTTLE of the fame shape, ornamented with vertical columns of minute filagree laticinio work. Seventeenth century. Height, 6½ in.

## No. 39.

OTTLE OF SIMILAR DESIGN. The centre of the bulb of the bottle and the cover are each furrounded with a band of interlaced work in blue glass, in relief,

betwixt raised beaded filets; wing handles, in blue and white glass, and etched floral ornaments in the "flacon" part. Height, 5<sup>3</sup>/<sub>4</sub> in.

#### No. 40.

OTTLE OR FLOWER-HOLDER, the neck bent obliquely; margin edged with blue glass; lateral wing handles in blue. Seventeenth century. Height, 6½ in.

#### No. 41.

EMON, with two leaves and a flower attached, in Venetian glass of the natural colours. Seventeenth or eighteenth century. Entire length, 6 in.

## Nos. 42, 43, and 44.

HREE ORNAMENTAL BALLS, OR GLOBES, of Schmelze-Avanturine glass, on raised stems of the same. Probably eighteenth century work. Height of each, 9 in.; diam., 41 in.

## No. 45.

CE CUP AND STAND, în opaque black glass, richly mottled with gold Avanturine. Eighteenth century. Height, 3\frac{3}{4} in.

#### No. 46.

LOBULAR BOTTLE, with tall, twisted neck, enriched with raised filets, vertical and transverse, in blue glass. Sixteenth or seventeenth century. Height, 81 in.

## No. 47.

OBLET, OR WINE-GLASS, in "Vitro de trina;" the stem mended in gilt bronze at an ancient period. Sixteenth century. Height, 7\frac{3}{4} in.

## No. 48.

AZZA on baluster stem, the centre of the bowl enriched with *laticinio* work, and with two transverse bands of the same, midway betwixt the centre and the margin. The stem has minute vertical filets of *laticinio*. Sixteenth century. Height, 5 in.; diam. of bowl, 6 in.

#### No. 49.

AZZA on low stem, the margin of the bowl turned over so as to cause it to assume a quadrangular shape. Columns of open spiral laticinio work radiating from centre to margin of the bowl. Height, 5 in.

#### No. 50.

MALL DIAMOND-MOULDED JUG, OR "CRUCHE," in blue glass. Seventeenth or eighteenth century. Height, 4 in.

#### No. 51.

MALL RIBBED GLASS on balufter stem; three detached pendent rings hang from loops sixed to the bowl. Height, 31.

#### No. 52.

MALL OVIFORM EWER, OR BURETTE, with handle and fpout, the fides furrounded with raifed boffes; masks in relief, &c. Sixteenth century. Height, 7 in.

#### No. 53.

UNNEL-SHAPED GLASS, compressed laterally, so as to assume an oval shape; the lower part of the bowl frosted or crackled; a beaded knob near the foot. Sixteenth century. Height, 7% in.

## No. 54.

UNNEL, OR BELL-SHAPED WINE-GLASS, on baluster-shaped stem—the bowl, in the lower part, is of purple glass, and, near the margin, colourless, as though partly filled with wine. A most curious specimen. Sixteenth or seventeenth century. Height, 7 in.

## No. 55.

LAT TAZZA—the bowl furrounded with a band of raifed Guilloche work in blue.

## No. 56.

INE-GLASS, with bell-shaped bowl—the lower part enriched with raised gadroons; baluster-shaped stem. Seventeenth century. Height, 5\frac{3}{2} in.

## No. 57.

MALL CYLINDRICAL GLASS, on baluster-shaped stem. At the sides are four loop or wing-handles, from

two of which hang loose detached rings of blue glass. Seventeenth century. Height, 6 in.

## No. 58.

TATUETTE in Venetian glass. The youthful Bacchus seated astride a barrel, holding a slask of wine in one hand and a goblet in the other. The figure is partly blown and partly moulded. The body is of transparent ruby glass, and the head, legs, and arms of opaque milkwhite glass. Seventeenth or eighteenth century. Height, 8 in.

## No. 59.

LD BOHEMIAN CRYSTAL GLASS—boat or shell-shaped bowl on facet cut stem. The bowl richly engraved with sluted-shell ornaments and interlaced Louis Quatorze arabesques. Probably a falt-cellar. Circa 1700. Height, 5\frac{1}{4} in.

#### No. 60.

MALL GLASS SALT-CELLAR, of similar design—engraved with elaborate strap-work ornament, slowers, &c., and bearing the motto, "Redlech Werth Ewig." Circa 1700. Height 41 in.

#### Nos. 61 and 62.

AIR OF FUNNEL-SHAPED CHAMPAGNE GLASSES. Old Bohemian cut glass. On each side, in front, is a raised oval appliqué medallion, containing an emblematical device of Cupid fighting with a cock, in etched gold; the border surrounding this is set with small appliqué facet-cut garnets—the centre cartouche enriched with

سرز

foliated scroll-work. Height of each piece, 8 in. Date—first half of the eighteenth century.

## No. 63 (a).

enamelled Venetian glass. Circa 1490. The entire furface of the glass is covered with a continuous frieze—a pattern of a Triton flanking a candelabrum supporting a cartouche, on which is perched a spread eagle, also accompanied by beautiful scroll foliage. The enamels are of the most varied and brilliant colours. Purchased in Rome, 1859.

## No. 64 (a).

work. Circa 1490. The subject of this interesting and rare work is the presentation in the Temple—a crowded composition of many figures in the style of a missal painting, and in all probability executed by an artist accustomed to work on vellum. The painting is executed in distemper at the back of the glass; the draperies and accessories, however, are all put in in gold leaf, the folds and details being produced by etching with a needle through the film of gold down to the glass, and afterwards filling in or backing the entire design with a coat of dark colour. The effect of the dark lines of the etching on the gold surface is somewhat analogous to that of niello-work on silver. Height, 5 in.; width, 3½ in.

#### II

# ANTIQUE GREEK AND ROMAN GLASS WARES.

ERFECTLY preserved specimens of Antique Glass Wares are found only in tombs, where they are deposited along with vases in terra cotta and bronze. But fragments of the more costly varieties are also found beneath the soil

of ancient cities, especially of Rome. Glass vessels in the antique ages were probably proportionately more costly than those of painted terra cotta; hence, very few specimens of importance have been preserved to us in the tombs—the celebrated Portland Vase, found in a marble farcophagus in Rome, is a rare and fingular exception. Small phials, unquentaria, &c., vessels of funereal use, and, in the Roman Imperial ages, large globular or oviform urns in coarse glass, of little cost, are thus almost the only perfect specimens of ancient glass manufactures now extant. The mutilated fragments found in the ground, however, reveal the existence in ancient times of works of a far higher class—indeed, in perhaps no branch of industrial art were the ancients in reality more expert than in glass-working. Every colour of the material, and almost every process in use in modern times, feem even to have been known and carried out to degrees of perfection never fince attained. The furface of many specimens of antique glass exhibits the most brilliant pearly or iridiscent lustres. This is owing to the superficial decomposition or exfoliation of the material. Perfectly developed and beautiful examples of this accidental "irisation" are much esteemed by connoisseurs, and, consequently, have considerable value.

#### CATALOGUE.

#### II.—ANTIQUE GREEK AND ROMAN GLASS WARES.

## No. 63.

body, furrounded with oblique spiral flutings, produced by the piece being blown into a mould. The handle of this flask is particularly worthy of notice, from the skilful manner in which the molten material has been made to assume beautiful curves, irregularly balanced, but full of artistic feeling.

Roman work.

Nos. 64, 65, 66, 67, and 68.

GUENTARIE," in common glass, of various shapes, all richly irisated. The present specimens are all perfect: many similar ones, however, are found sused and contorted; sometimes as many as three or four being sound attached together, in a half melted state. This has resulted from their having been burnt with the corpse on the suneral pyre. These small bottles were formerly believed to have been intended to contain the tears of the mourners; they are now, however, with more likelihood, supposed to have contained perfumes.

## No. 69.

MALL "PHIALE," OR "LACHRY MATORY;" a fplendid specimen of iridiscence. Roman work. Length, 3 in.

## Nos. 70 and 71.

WO SMALL BULB-SHAPED PHIALS, with straight necks, in plain glass. Roman period. Probably lachrymatories, or unguentariæ.

## No. 72.

LOBULAR BOTTLE, in light, greenish-tinted glass, with two small loop handles, through which are passed brass rings, which in turn hold a bronze bucket or swing handle, formed from a flat strip of bronze. Roman period. A rare and remarkable specimen. Diam., 3½ in.

## No. 73 and 74.

WO SMALL PHIALS, in light blue glass. Roman period.

## No. 75.

IMILAR SMALL PHIAL, in light blue glass, surrounded by a spiral cord of opaque white glass. The lip, or upper part of the neck, fractured.

## No. 76, 77, 78, and 79.

OUR SMALL CIRCULAR CONVEX GLASS BUTTONS, respectively in blue, opaque yellow, pearl white, and light greenish glass: with bronze shanks. Roman period. Diam., \( \frac{2}{3} \) in.

#### No. 80.

MALL GLOBULAR, OR BULB-SHAPED "PHIALE," with straight neck. Dark purple glass. Roman period.

#### No. 81.

FLASK, OR "PHIALE," with two small loop handles, near the neck. The ground of dark blue glass surrounded with a wide belt of zigzag ornament, in light greenish turquoise and yellow, and with several bands of opaque yellow; the lip edged with turquoise glass. Antique (Greco-Egyptian?) manufacture, in fine preservation; probably an unguentarium. Height,  $2\frac{\pi}{6}$  in.; diam., 2 in.

#### No. 82.

MALL GLOBULAR FLACON, of nearly similar design to the preceding. The ground of blue glass, with an elaborate zone of zigzag ornament. The surface eroded and irisated. Height, 2\frac{3}{2} in.; diam., 2\frac{3}{2} in. Greco-Egyptian?

# No. 83.

MALL EWER, with handle, and compressed tresoil lip, in dark blue transparent glass, surrounded by bands, or silets of opaque yellow. Surface slightly eroded. Height, 3½ in. Greco-Egyptian glass.

#### No. 84.

YLINDRICAL PHIALE, OR "ALABASTRON," with trefoil lip. Dark blue glass, covered with a zigzag pattern, in opaque white and yellow. The furface fomewhat eroded and irisated. Length, 4% in. Greco-Egyptian.

# No. 85.

MALL PHIALE of fimilar shape to the preceding piece, with two small loop handles attached. The ground dark greenish blue, semi-opaque glass, with a deep belt of parallel zigzag bands in turquoise and yellow. In perfect preservation. Length, 3½ in. Greco-Egyptian.

#### No. 86.

The ground transparent blue glass, covered with waves or imbricated ornaments in opaque white and yellow. Length 43 in. Greco-Egyptian.

### No. 87.

ERY SMALL GLOBULAR PHIALE, the fides flightly compressed, and with two small loop handles; a filet of opaque yellow round the lip, and a large circular spot or dot in the centre, on each side. Height, 1½ in.; width, 1½ in. Pâte, semi-opaque blue. Antique (Greek?).

#### No. 88.

with zigzags in opaque yellow; the ground black, or dark blue opaque glass. Probably an ornament for a necklace. Greco-Egyptian. Height \( \frac{2}{3} \) in.

#### No. 89.

TYLUS, for writing, in transparent blue glass, ornamented with zigzags in white. Length, 6 in. Antique Greek work. An unique? and most curious specimen in perfect preservation.

### No. 90.

SPHERICAL, OR INVERTED CONOIDAL-SHAPED BOWL. Diam., 61 in.; height, 31 in. " Millefiore" glass. Antique Roman This markable specimen, one of the most important of its class now extant, although broken into numerous pieces, is complete—i.e., none of the fragments are missing. The ground is a brilliant light, bluish-green transparent glass, mainly filled in with radiating stars of vellow, white, &c. In addition to these, however, there are numerous sharp, angular patches, inserted in the manner of a "breccia," of blue, white, orange, and gold-powdered glass, and also long pipes or canes of laticinio work. The margin is bordered by a narrow filet of pale lilac-coloured transparent glass. The greater part of the furface is still covered with its iridiscent oxydated patina, a finall portion only, on one fide, having been polished to display the original brilliant colour. Purchased at Rome in 1850, but originally brought from Naples.

# No. 91.

LACON, OR PERFUME BOTTLE, in the shape of a dried date. Length, 2 in. Antique Roman glass. This very remarkable specimen is an imitation in glass of the dried fruit. Both in colour and form it is truthful, even to deception, and, in all probability, was moulded on an actual date. Purchased in Rome in 1859.

### No. 92.

ICE, in antique blue glass; irisated.

# No. 93.

MALL CIRCULAR TRAY, OR LID OF A PYXIS, in femi-opaque glass, of mottled or marbled brown and yellow tint, in imitation of onyx or jasper. Roman. Diam., 2 in.

#### No. 94.

MALL SQUARE TESSERA, of blue glass, in which is inlaid or incrusted a figure of a hawk, in glass of various colours, imitative of the natural plumage of the It is very difficult to describe this most rare and admirable specimen of the ancient glass-workers' skill: nothing analogous has ever been executed in glass in modern times, and the exact method by which the various-tinted glaffes have been inferted into the blue mass, is by no means quite obvious, though the general principle is known. The present specimen is, to all appearance, a flab, or lateral fegment, fawn off a thicker pieceprobably a cube or long prism. These cubes, or prisms, were produced by encrusting small rods, or filets, of various coloured glasses. arranged in the requisite juxta-position, in a mass of uniform coloured glass. In this manner, as may have been observed in flicks of children's fweetmeats, every lateral fection, or piece broken off, exhibits the same pattern. The execution of such a complex and minute defign as the prefent, however, is a marvel of manipulative skill and ingenuity. Diam., 3 in.

# No. 95.

MALL OVAL SLAB, OR TESSERA, probably originally set in a ring, § by §; blue glass, with an encrusted figure of a parrot in natural colours. The

method of executing this specimen is altogether different from the preceding piece, and is still more interesting. The body of the thin glass slab is of two layers—the lower one opaque white, the upper one dark transparent blue. By some unexplained method, a cavity, or intaglio, has been funk in the upper layer, of the exact shape of the bird; this cavity has then been edged or lined round with a thin filet or wire of gold, and the various markings of the wings, and other details, likewise executed in the manner of a cloisonné enamel, with the same gold filet. spaces thus formed have then been filled in with enamel or glass paste, of varied colours, fused in the furnace, and finally the surface rubbed down and polished, the result being a true cloisonné enamel, executed in a bed or matrix of glass. On another supposition, the gold filets, or cloifons, have been first arranged flat on the white under layer; and the blue upper layer forming the background of the defign, as well as the tints of the bird itself, filled in and fused at the same time.

# No. 96.

MALL SQUARE SLAB, fimilarly encrusted with a figure of a parrot. In this specimen, the enamels, of varied green, yellow, and red tints, are well preserved, but the gold filet has disappeared.

#### No. 97.

MALL OVAL PLAQUE, fet in gold as a ring. Antique encrusted glass. A palmette ornament and a bird, in red, white, and yellow, on blue ground. From the Hertz Collection.

N.B.—In addition to the specimens of antique glass, here specifically noticed, the Collection contains a series of several

thousand fragments of antique vessels, lining slabs, or tiles, mosaic tesserae, and numerous other objects in glass. These fragments exhibit a very great diversity of materials, processes, designs, and colours. The patterns of the "millesiore," "tapete," or "mosaic" glasses, as they are variously called, are far too numerous for specific descriptions. Specimens of brilliant and beautiful irisation likewise abound, and there are many specimens of cameoglass fragments of vessels, similar in work to the Portland vase, and also of examples of moulded and engraved glasses. This series of fragments, mostly from "Scavi," in the neighbourhood of Rome, was purchased in that city in the spring of 1859, and comprised almost every specimen of note, then in the hands of the Roman dealers.

#### III.

# MAJOLICA WARES.

AJOLICA, formerly called "Raffaelle Ware" or "Faenza Ware," is an Italian enamel glazed earthenware. It is supposed to have derived its origin from a very fimilar ware made by the Moors in Spain, from an early period of the Middle Ages, and to have taken its name from the Spanish island of Majorca, from whence the first specimens were probably exported to Italy. During the fifteenth and fixteenth, and, in a less degree, the seventeenth century, its manufacture was extenfively carried on in Italy, especially in the central districts, where Faenza, Gubbio, Pesaro, Castel-Durante, Urbino, and other neighbouring towns, gained great reputation for their fine productions. Artists of celebrity not only furnished designs, but undoubtedly, in some instances, actually painted the more important pieces. The Italian princes and nobles were the zealous patrons of ceramic artists, and the founders of manufactories in their feveral territories.

There were, in the flourishing days of the art: firstly, private manufactories ("botteghe"), producing on the usual industrial conditions, and generally aggregated in certain great centres of manufacture; secondly, manufactories attached to the courts, castles, or villas of princes and nobles, producing works of special

value for their patrons; and, thirdly, artists unattached—i.e., working on their own account, and frequently changing their places of abode.

The manufacturers, as a rule, repeated in gross the regular patterns which were their respective copyrights; whilst an infinity of unique designs were executed on all hands by the painters who worked on their own account, or for noble patrons; so that, in reality, Majolica, not less from the high artistic excellence displayed than from the fact of this frequent independence of the usual commercial conditions, may be justly regarded as a development of fine art.

With respect to the composition and methods of fabrication of the Majolica Wares, the pate, or body, is a mere common clay or terra cotta, usually of a brownish or vellowish hue. When the pieces are finished on the wheel, and have taken their appointed shape, they are first thoroughly dried, and then fired or burnt in the furnace; in this state, the ware is technically called biscuit The glaze is applied generally by immersion—i.e., the fubstances composing it being reduced to a fine powder, and mixed with water to the confiftence of cream, the piece to be covered is dipped into this liquid contained in a large veffel. The porous nature of the biscuit ware speedily causes the moisture to be absorbed, and the glazing material then simply adheres to the piece as a foft coating liable to be removed by the flightest touch; on this furface the painting is executed, with the enamel colour fimply ground up or diluted with water. It is here that the wonderful executive facility of the Majolica painter is difplayed, as the nature of the ground requires the work to be done at once; the outlines, for instance, must be drawn at a single stroke, and not a touch can be erased. The furface is fo abforbent that, if the point of the brush charged with colour be allowed to rest on it, for even the briefest instant, an unsightly blot ensues. After the execution of the painting, the piece is fired a fecond

time, being on this occasion enclosed in a case or "faggar" of terra cotta, to protect it from the direct action of the slames. In the furnace, the crude pulverulent covering suses into a glossy enamel; whilst the painting, executed on its surface, sinking in and becoming indelibly incorporated with it, assumes at once a degree of power and brilliancy of tint very different to its previous crude, raw aspect.

The most remarkable variety of Majolica is the iridiscent lustre ware, which reflects metallic lustrous tints, of various colours, according to the angle at which the light strikes its surface. fecret of the ruby lustre, which appears to have been used principally at Gubbio, was lost even in the fixteenth century. Giorgio Andreoli, known as "Maestro Giorgio," was one of the most fucceffful artific manufacturers of the luftred wares: he lived between 1470? and 1552? The oldest date as yet noticed on any piece of Majolica is 1475. Generally speaking, the Majolica may be faid to have first attained prominence as an artistic manufacture during the fifteenth century; it would, perhaps, be right to assume that its great extension was during the second half of that century. Its period of perfection may be faid to extend from the beginning to the middle of the fixteenth century, after which time, although, down to the last, many admirable examples were exceptionally produced, the art rapidly declined, gradually loft its artistic character, and fell to its lowest point, with the decadence of art in general, at the end of the seventeenth century. tions of Majolica Ware are now produced both in Italy and in England.

#### CATALOGUE.

#### III.—MAJOLICA WARES.

#### No. 120.

outlined, and shaded in blue, and richly lustred. Gubbio ware, the work of Maestro Giorgio. Date, 1519. In the centre of the plate is a semale profile bust portrait, with the initials "M. A.," the "M." transfixed by an arrow. The border is decorated with four large apples or oranges, full-grounded, in deep gold lustre, the intervening spaces being silled in with soliated ornaments in gold, and deep, cupreous, ruby lustre. The drapery, hair, and head-dress of the sigure are in lustre colours. The reverse decorated with concentric lines, and the date 1519, in ruby lustre. In the date may be recognised the handwriting of M. Giorgio. A splendid specimen of the lustre colours. Intended as a gift plate. Diam., 94 in.

#### No. 121.

LATE, with deep funk centre, and wide border. Gubbio ware, by Maestro Giorgio. Unsigned, but dated 1531. In the centre is a flying Amorino, in olive grisaille tint, but with hair, wings, and drapery grounded in

ruby lustre. The figure is detached, on a field of full ruby lustre. The border is grounded in dark blue, and has the usual "palmette" pattern, with dolphins, &c., in gold and ruby lustre. A fine specimen of a well known and favourite design. Reverse decorated with detached scrolls and interlaced ornaments. In centre, the date, 1531. Diam.,  $9\frac{3}{8}$  in.

#### No. 122.

Deruta ware. Circa 1500-20. The ground of this piece is white, the ornaments strongly outlined, and shaded in blue, and filled in with gold and ruby lustre. In the centre is a patera or rosette, in lustre colour, and the border is enriched with a series of pine cones and small knobs or fruit in relief. The design is completed with painted leaves, husks, and stalks arranged obliquely; the border has a string of pearls, or jewels, alternately round and lozenge shaped. This piece is very richly lustred, with intense golden yellow and pale ruby. Reverse, concentric lines of gold lustre. Diam., 11 in.

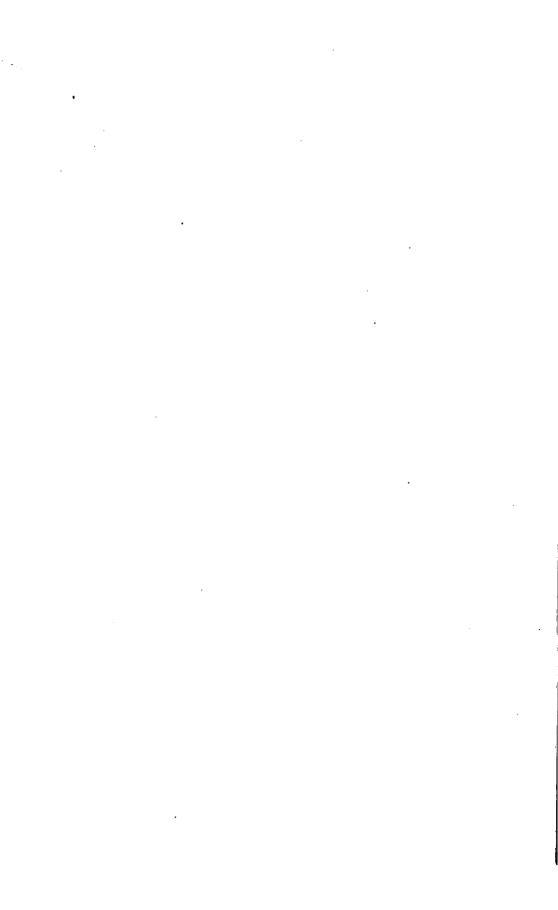

# No. 123.

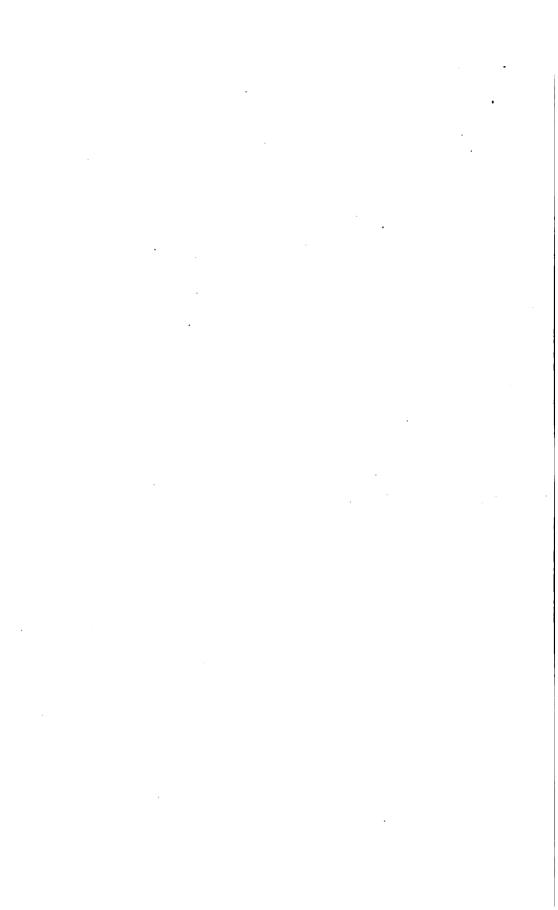

MALL DEEP PLATE, with ornaments in relief, richly lustred. Gubbio ware. In centre, a cherub's head, with fix wings. White ground; border, alternately parsley or acanthus leaves, and griffins flanking a vase. The ornament outlined in blue, and filled in with gold lustre and deep ruby. Circa 1520-30. Diam., 73 in.

# No. 124.

OWL TAZZA PLATE. Gubbio lustred ware, by M. Giorgio. Dated 1520. Diam., 94 in. In the centre, within a shield-shaped compartment, is a bust

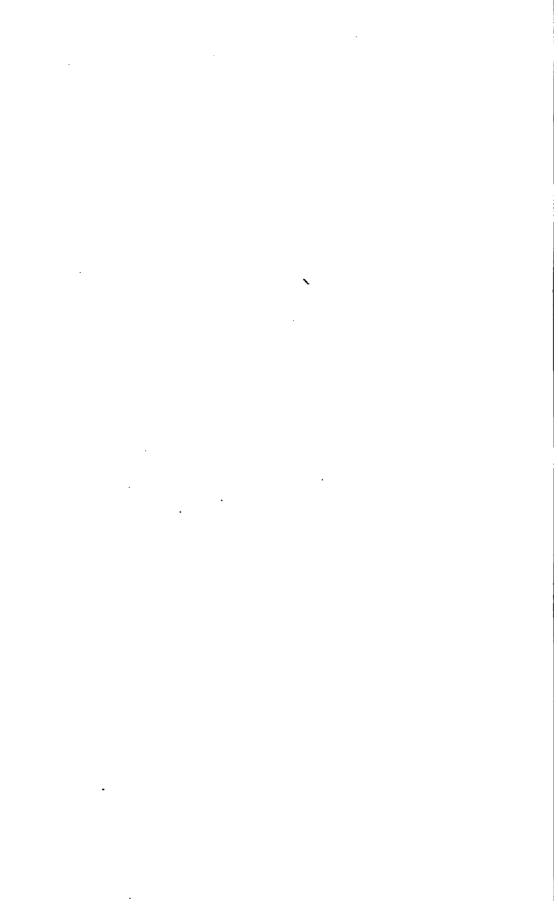

(5

No. 124. Majolica, Luftred Ware Plate, by Maestro Giorgio, of Gubbio.

of St. Jerome; the rest of the surface filled with an exquisite composition of arabesque foliage, formed by the recurved and interlacing tails of two griffins, or sphynxes with women's heads, and two terminal semale Amorini. Above the head of St. Jerome are two label scrolls, on which are respectively inscribed "S. Jeromino" and "1520." The ground of the centre compartment, on which is delineated the half sigure of the saint, is dark blue; whilst all the rest of the surface is grounded in gold lustre. The outline and modelling of the tints are executed in blue, slightly toned with pale orange, and touched with white. The hair of the sigure is in pale transparent orange, and the drapery and other details in full ruby lustre. Reverse, concentric lines in ruby. This exquisite piece is one of the most important works of the early and best period of the master. Diam., 9\frac{3}{8} in. (See engraving.)

# No. 125.

White ground—the defign outlined and shaded in blue, and filled in with lustre colours. In centre, a band or cartouche, with the name "Marggarita," surrounded with imbricated work. The border decorated with pointed rays and balls, or fruit, in ruby and gold lustres. Reverse, concentric lines. Diam., 9 in.

#### No. 126.

WO-HANDLED VASE. Gubbio lustre ware. Circa 1520-30. This beautiful vase is of refined and well-contrasted form, derived from the antique. It offers a fine example of the force of effect obtained by the use of lustre colours, the surface being almost entirely covered with these pigments. The ground of the piece as usual, is white; but little

or none of it is left visible. The ornaments are heavily outlined and shaded in vivid dark blue, and are filled in with gold and ruby lustres. The neck is surrounded by a bold palmette pattern, and the shoulder by a band or moulding of acanthus leaves; the belly of the vase being also decorated with oblique radiating gadroon ornaments, and the foot with acanthus leaves. This piece is either by Maestro Giorgio or the master signing with an "N," and who is supposed to have been Giorgio's successor in the Gubbio "botega." Entire height, 10 in.

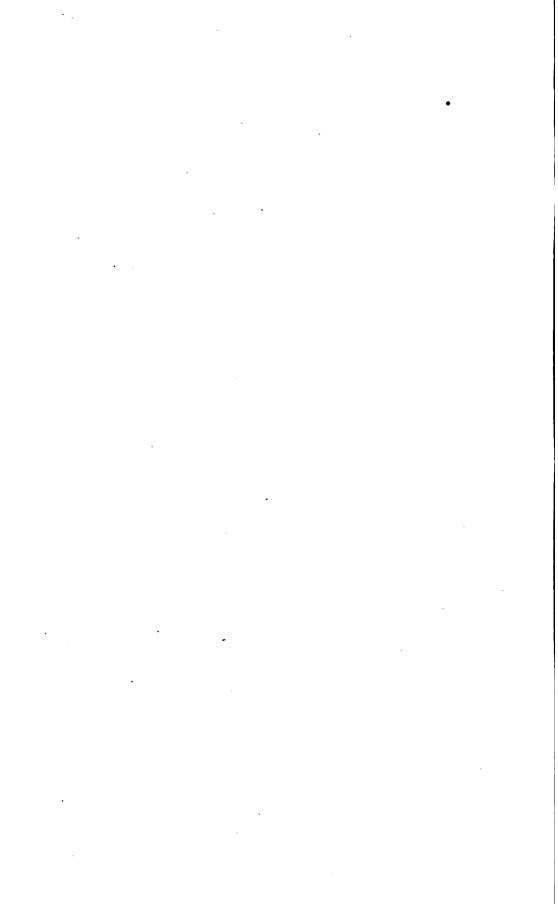

#### No. 127.

LATE, with wide border and deep funk centre. Early

Faenza ware. Circa 1515-20. Attributed to the manufactory of "Cafa Pirota." This exquisite plate is a specimen of the best time and most refined "technique" of the Majolica. It is painted with all the spirit and delicacy of missal painting. In the centre are two Amorini, seated, with a fwan, a drum and a book on the ground near them. figures are relieved on a ground of pure yellow; the wide border is grounded in deep blue, the ornaments faved or wiped out in white, and then tinted in proper colours. The centre subject is furrounded by a band or collar linked together by a chain, on which is inscribed the motto, in carefully drawn Roman characters, "Auxilium Meum a Domino." In the border are four large circular medallions grounded white, two of which contain shields of Arms, one furmounted by a bishop's mitre, and the others, a device of a double head, with the motto, as before, repeated on a fimilar collar, or linked band. The ground is filled in with cornucopias, cherubs' heads, lions rampant, birds, flying Amorini, festoons of drapery, &c. The colours, especially the blue and orange, are of the most vivid and beautiful tints. Reverse, richly decorated with an entwined or knot pattern in blue and orange. Diam., of in. (See engraving.)

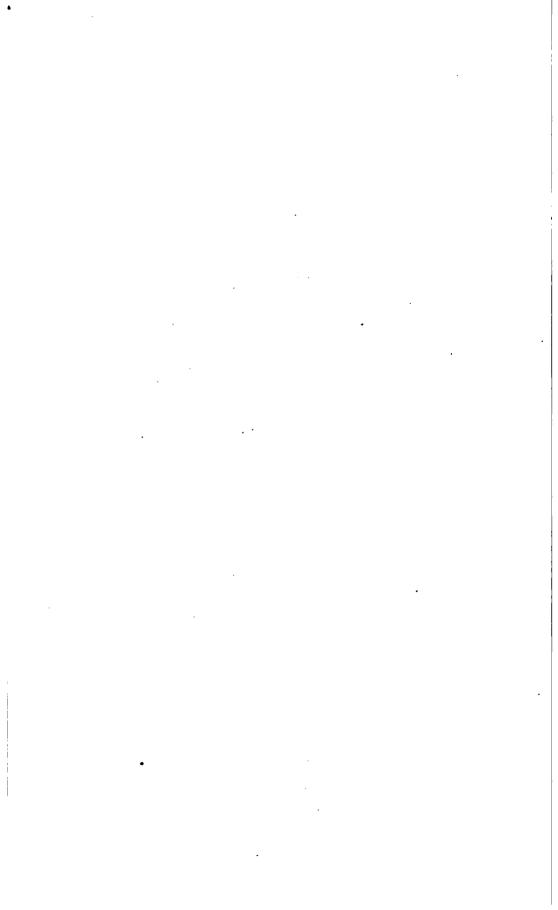

reny much broken.

No. 127. Majolica Plate. Early Faenza Ware, circa 1515-20.

#### No. 128.

Circa 1520. In the centre is a small sunk medallion, containing a cameo profile portrait, in grisaille, on a bright orange ground. Around this is a string of large pearls. The rest of the plate is covered with a pattern of interlacing branches of oak foliage in relief, in yellow, on a dark blue ground—a beautiful variety of a well-known design. The oak branch was an "impresa," or badge, of the Della Rovere family, Dukes of Urbino, the great patrons of the Majolica manufacture. Diam., 9\frac{3}{2} in.

#### No. 129.

is undoubtedly of the fame fabrique, and probably painted by the fame hand as No. 127. In the centre, within a medallion furrounded by a string of pearls, is a shield of Arms, bearing an "Agnus Dei," standing on three monticules, on a field, "or;" above is a prelate's or Cardinal's hat, and on the scroll the motto, "Dominus illuminatio mea." Round this is a band of honeysuckle ornament in white, and the wide border is grounded in deep blue, with elaborate arabesque ornaments, wiped out and tinted in colours. These consist of winged and foliated "Mascheroni," dolphins, trophies, foliated scrolls, &c. The whole painted with great firmness and spirit. Reverse, rich decoration in orange and blue, and the usual monogram of the "botega," a circle intersected by cross-bars. Diam., 10% in.

# Nos. 130 and 131.

AIR OF SMALL DEEP PLATES. Faenza ware. Circa 1515-20. Apparently of the fame "fabrique" as Nos. 127 and 129. In the centre of each piece is a shield of arms quartering Medicis, upheld by two Amorini, relieved on a dark blue ground. This is surrounded by a string of large pearls picked out in orange, around which, again, is a band or zone of white. The border is painted with arabesques of similar design to those of the previous piece, in grisaille, on dark blue ground. Reverse similar to preceding specimen, but without monogram. Diam., 9 in.

# No. 132.

ware. Circa 1510-20. In the centre, within a medallion, is a rosette of oblique radiating gadroons. Surrounded by a series of light yellow slutings, silled in with palmette or leaf ornaments, and edged round with wide silets of deep blue. Encircling this, again, is a wide zone of rich transparent orange, pencilled with a palmette ornament in black. Reverse, decorated with interlaced knot-work, in blue and orange. The colours of this beautiful piece are extremely brilliant, and the glaze is of the most lustrous and perfect description. Diam., 8½ in.

# No. 133.

MALL PLATE, with deep-funk centre. Urbino or Castel Durante ware. Circa 1540. Probably from the botega of Guido Fontana. Subject, Eve offering Adam the forbidden fruit. On the reverse is inscribed, "Adamo et Heva." Glaze and colours very brilliant. An excellent specimen of this fabrique and period. The figures are unusually well drawn, and carefully painted. Diam. 63 in.

# No. 134.

the fame hand. Deucalion and Pyrrha, throwing the stones over their heads. Reverse inscribed, "Deocaleon e Pirra." A bright and perfect little specimen. Diam., 63 in.

#### No. 135.

Circa 1530. "Majolica istoriati." The subject, which fills the entire surface of the plate, represents Ino and Athamas destroying their children. This brilliantly painted piece is an early and very fine specimen of Francesco Xanto; executed before 1531, in which year he adopted the plan of signing and dating all his works. Above, in front, is suspended a shield of arms, bearing three crescents, conjoined on a field azure. Reverse inscribed, "De Ino e Athamāte i furiate, fabula." Colours and glaze very brilliant. Diam., 10½ in.

# No. 136.

flat cover, complete. Urbino ware. Circa 1530. A complete and beautiful specimen of an utensil seldom found perfect. The flat cover, which is intended to serve separately as a salver or plateau, is painted with a bedroom interior subject—a lady, near her accouchement, is attended by the nurses; whilst an Astrologer, holding a celestial sphere, is consulting the stars, which are seen through an open arcade. The border is surrounded by a raised moulding, and a painted wreath of green leaves. The bottom of the cup has a subject of

nurses clothing the new-born babe. This latter painting is surrounded by an elegant border of interlaced work, in white enamel. The centre of the cup is also decorated in white, with interlaced scroll-work, and the foot and lip are surrounded with wreaths of green leaves. Probably the work of Guido Durantino. Height, 4½ in.; width, 7¾ in. It should be observed, that it was anciently the custom, in Italy, to present decorative caudle cups, in Majolica ware, to ladies after their accouchement.

# No. 137.

UP, OR GOBLET, probably a "Coppa puerpera," without the cover. Deruta ware. Circa 1510-20. Decorated with bold arabefque ornaments. Dolphins, Mascheroni, palmettes, &c., in dark blue outline, on white ground. Height, 5½ in.; diam., 5½ in.

#### No. 138.

QUARE FLASK, OR JAR. Incised Majolica ware. "Majolica Sgraffiato." Circa 1500. Richly decorated with scroll foliage, animals, Armorial bearings, &c., and with scrolls bearing the motto, "Procul este profani." The locality of manufacture of this characteristic variety of pottery is unknown, and the technical processes of fabrication are entirely different to those of the ordinary Majolica wares. The ground or body of the ware is of red or brown clay; whilst still unsired, a thin coating of white clay is spread over the surface, and the design is then scratched or engraved, with a steel instrument, through this superficial layer, down to the brown clay beneath. The piece is then fired, and a transparent vitreous glaze, which revives or deepens the colour of the clays, is afterwards added,

and fused by passing the piece a second time through the surnace, transparent coloured enamels being sloated into the glaze at this operation. Height, 8 in.; width, 4 in.

# No. 139.

ARGE CIRCULAR PLATEAU. Deruta ware. Circa 1500-20. Diam., 15½ in. This very original piece is decorated with a subject of the Annunciation, within an interior of Italian quattro-cento architecture. This is again enclosed within an architectonic framework, combined with beautiful scroll ornament, covering the rest of the surface. The colour shows a predominance of rich transparent orange, relieved by deep blue. The slat surface tints, or grounds, are alternately white, blue, and orange—the white being made to tell with increased brilliancy by being "piqué," or diapered with stars and points in white enamel. Reverse, yellow enamel.

#### No. 140.

ARGE PLATEAU. Faenza, or Deruta ware. Circa 1490. Diam., 143 in. In the centre, a bust portrait of a warrior in armour. Border painted in compartments divided by radiating lines, the compartments filled in with peacocks'-feather pattern, and scroll foliage, on rich orange ground. Distinguished by extreme depth and brilliancy of the blue and orange pigments. Reverse, decorated in orange and blue. A rare and remarkable early specimen.

# No. 141.

EEP TAZZA, OR BOWL PLATE. Faenza ware. Circa 1500–20. Diam., 10½ in. In centre, conjoined hands on a deep blue ground, furrounded by radiating gadroons, grounded alternately deep blue and rich golden yellow. This is in turn encircled by a band of orange. The border is grounded light blue, and pencilled with a delicate palmette pattern in white, touched with orange and green. Reverse decoration in blue and orange, and with a well-known manufacturer's mark, consisting of a barred circle. In depth, intensity of colour, and perfection of glaze, this piece cannot be surpassed.

### No. 142.

Circa 1500-20. The medallion painted with a female profile portrait, and a scroll, inscribed "Pulisena;" this is surrounded by zones of foliated ornament, on a vivid orange ground. The narrow margin of the plate also decorated with a similar zone. Reverse covered with decoration in blue and orange, and, in centre, the monogram of the artist—an "M"—with a transverse intersecting bar, or "paraphe." This piece is a beautiful specimen of an early master, many of whose works are extant. Diam., 12½ in.

# No. 143.

VIFORM EWER. Majolica of Savona. Seventeenth century. Height, 10 in.; diam. 4½ in. Pale bluish white enamel glaze, rudely painted with flowers, &c., in blue. Underneath the foot, a manufacturer's mark, consisting of a shield of arms painted in blue. The beautiful form of this piece is worthy of the best epoch of the Majolica, and was evidently originally designed at an earlier period. The coloured glaze and decoration resemble those of the contemporary fabrique of Nevers.

#### No. 144.

Maestro Giorgio. Circa 1520-30. Decoration in relief of oblique gadroons. In the centre, the sacred monogram, "I.H.S.," also in relief, and surrounded with rays, copiously enriched with gold and ruby lustres. Reverse, concentric lines in gold lustre. Unsigned. Purchased at La Fratta, near Gubbio, in April, 1859.

### No. 145.

MALL CUP, OR BOWL-SHAPED PLATE. Faenza ware. Circa 1510. The centre painted with a standing figure of St. Sebastian, tied to a tree. Border of exquisite arabesques, on brilliant orange ground, and with filets or strings of pearls. Exterior, decorated with scale pattern in orange and blue. This beautiful piece is one of the most perfect specimens known of the master of the signature "I. P." Purchased in Florence, April, 1859.

# No. 146.

ARGE CISTERN, with fcroll handles. Diam., 16 in.; height, 9 in. Shape polygonal (of twelve fides), standing on a plinth or pedestal of grotesque masks in relief. The margin encircled by a boldly modelled eggand-tongue moulding. The decoration of this rare and important piece is in blue, and a warm olive grisaille tint. The bottom of the cistern is painted with a spirited mythological composition of four figures, within a landscape apparently after Giulio Romano. The sides, within, are decorated with a beautiful fret or arabesque diaper, in grisaille and white, on blue ground; and the

exterior is also diapered with blue and white. The entire aspect of the piece is very original, and unlike any specimen hitherto observed. It is, probably, to be referred to the manufacture of Viterbo. Circa 1540. Purchased in Florence, 1859.

# No. 146 (a).

IRCULAR PLATEAU, with raised medallion centre (stand for the ewer). Diam., 16 in. Majolica of Urbino (or Pesaro?). Circa 1540-50. This beautiful specimen is of the finest period, and technique of the Majolica manusacture. It is painted "Sopra bianco"—i.e., on a ground of white enamel, with zones of spirited grotesques, in the style of Giovanni da Udine. The umbilicus, or medallion in the centre, filled in with a composition of St. John, the Evangelist, writing his gospel, executed in blue canaieu, and encircled with elegant decorated mouldings. The reverse is ornamented in the same way, with grotesques. Purchased in Florence, 1859.

#### No. 147.

MALL BOWL-SHAPED TWO-HANDLED VASE, OR SALT-CELLAR. Majolica of Urbino. Circa 1560. Painted with grotesques ("Sopra bianco"). The interior grounded blue. Purchased in Rome, in May, 1859.

# No. 148.

ARGE SQUARE PAINTED PLAQUE, with moulded border. Height, 171 in.; width, 151 in. Majolica of uncertain fabrique. Signed on the reverse with a "C." or "G.," and date, 1571. Subject, the angel faluting

the Virgin. In the upper part, the Almighty, in clouds, with the Holy Spirit, as a dove. Vigorously painted, in the manner of the Zuccaro family. Purchased in Florence, 1859.

#### No. 149.

ARGE BOWL-SHAPED PLATE. Diam., 16½ in. Subject, a combat of two knights on horseback, in full armour, with three Turks, armed with scymitars and bows and arrows. A remarkable specimen of uncertain manufacture of circa 1500–20.

#### IV.

#### PERSIAN ENAMELLED POTTERY.

("FAÏENCE DE PERSE.")

HE specimens of this beautiful pottery, which, during the last few years, have especially attracted the attention of Collectors, are all apparently found in Italy, mingled with the Majolica wares, and in the various islands of nean. They appear to have been imported

the Mediterranean. They appear to have been imported into Italy in the same manner as the Hispano-Moresco wares; and the date of their production, from many indications, may be ascribed mainly to the second half of the sixteenth century. This ware is distinct from the Majolica, and is, in fact, more nearly allied to porcelain. There is great similarity in the designs, which are of characteristic Oriental types, principally floral and geometrical patterns—the Persian tulip, and a variety of pink or carnation, with long serrated leaves, being of constant occurrence. The enamel colours are, generally speaking, of most brilliant tints, and some, especially, a bright orange red, and a greenish transparent turquoise colour, of great beauty, are peculiar to this ware alone. The glaze is likewise of the most lustrous and beautiful quality.

<sup>\*</sup> It has been recently afferted that Lindus, in the island of Rhodes, was the principal centre of manufacture of this pottery. This affertion, however, awaits further corroboration.

#### - CATALOGUE.

#### IV.—PERSIAN ENAMELLED WARE.

#### No. 150.

ARGE JUG, OR EWER, with handle. Ancient Persian enamelled faience. White ground, painted with conventionalized roses or carnations, and Persian tulips outlined in black and filled in with blue, green, and orange enamels. Height, 113 in.

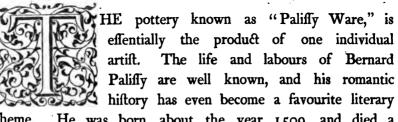

# No. 151.

ARGE BOWL, of the same ware; painted, inside and out, in ornamental compartments, alternately grounded white and dark blue, and with roses and tulips, arabesque ornaments, &c., in turquoise, and two tints of green and dark purple. This is one of the largest specimens of this beautiful ware known to exist. Height 11 in.; diam. 171 in.

#### $\mathbf{V}$ .

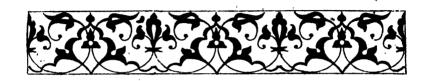

#### " PALISSY WARE."

He was born about the year 1509, and died a theme. prisoner in the Bastille, in Paris about the year 1589. was originally brought up as a glass painter. About 1528, after many wanderings and defultory labours, he fettled in the town of Saintes, and shortly afterwards, whilst brooding over vague schemes of invention, chance threw in his way an enamelled earthenware cup, of fome foreign manufacture, the endeavour to imitate which at once decided his vocation as a ceramic artift. deeply interesting, and, indeed, dramatic account of his trials and labours henceforth, is given in his own effay, entitled "The Paliffy was poor, and years of unaided Artist in Earth." experiments brought him to extreme distress. At last, however, fuccess followed his unceasing efforts, and he gradually perfected for himself a species of pottery of an entirely novel and original description. His wares may be arranged in three general divisions: First, his fo-called "rustic pieces"—the specimens decorated with reptiles, shells, plants, &c., in relief; secondly,

those with relievi of figure subjects; and, thirdly, pieces decorated with purely ornamental motives. The first is, in all probability, the primitive variety, and, from its quaintness and originality, will always, perhaps, attract the greatest share of attention; but the conventionally decorated specimens are those on which his claims as an artist must mainly rest. The specimens of Palissy ware now met with, it should be observed, are not all from the hand of the master—inferior reproductions of his wares having been manufactured long after his death by his descendants and imitators. Very recently also, imitations have been produced in great numbers, both in France and England; and it is now often not an easy matter to decide on the genuineness of specimens purporting to be Palissy wares.

#### CATALOGUE.

# V.—PALISSY WARE AND GERMAN ENAMELLED STONEWARE.

### No. 152.

grounded with splashed enamels of green, blue, and mulberry brown tints; from this, a double row of radiating flutes, or sinkings, tend towards the margin, connected by bands, or strings, of Guilloche work. The inner range of slutes is grounded white; the outer, mulberry; and the Guilloche work, blue. The lip, or margin, of the piece is cut into Vandykes. A fine and rare specimen of the most tasteful variety of Palisly's pottery. Length, 181 in.; height, 93 in.

# No. 153.

man enamelled stoneware. Circa 1590. This elegant piece is of the variety called "Franconian," or Nuremberg, ware. The ground is a light, cool drab grey, and the ornamentation consists of square cartouche compartments, with Amorini, animals, and large masks, in relief; picked out in red, green, white, black, and brown enamel tints and gold. In the cartouche, in front, is a monogram, or house-mark, composed of an "H S," with a cross, or vertical bar. Height, 7 in.; diam., 4½ in.

#### VI.

# ENAMELS (ON METAL).

Y the term *Enamel* is understood a vitreous substance, capable of being applied, in various ways, to the surfaces of metals, and, when melted by heat, of covering them with a glassy coating or crust. There is no essentially

tial difference betwixt enamels on metal and the glazes and enamel colours applied to pottery. Enamelling on Pottery or Terra Cotta we know to have been practifed in remote antiquity, both by the ancient Egyptians, the Assyrians, and the Greeks. It is still, however, a disputed point, whether these nations were acquainted with the application of susible enamels to metals. In the case of the Greeks, it is probable that they practised the art, to a certain extent, in goldsmiths' work; but the process does not seem to have had any great vogue; whilst there is no direct evidence that the Romans were acquainted with the process.

Nevertheless, enamelling is believed to have been known, during the period of the Roman domination, to certain barbarous nations, or tribes, of transalpine Gaul (France, the Rhine provinces, and England)? and probably from the beginning of the third century, when we have the first authentic notice of its existence, it never ceased to be practised in those countries; until

at last, in the Middle Ages, it attained to its greatest development in France. On the other hand, there is every reason to believe, that the slender and dubious thread of this art was handed down from the ancient Greeks to the artists of the Byzantine Empire, and that from thence, always preserving certain evidences of its original parentage, it spread, in the Middle Ages, into Italy and the West. In the East, again (China, India, and, perhaps, Persia), enamelling, judging from all appearances, is a process of very ancient date.

The varieties of processes in enamelling are very numerous, but may all be brought under three main heads, viz.:—

1st. Cloisonné, 2nd. Champlevé, 3rd. Painted enamels.

The first of these varieties (cloisonné enamels), so styled from the French word, "cloison," a partition, is characterised by a method of executing the forms, or details, of a design with narrow silets, or bands, of metal, generally gold or silver, which are bent into the required form, and soldered down to a plate of metal, thus projecting from the surface, and forming, as it were, partition walls betwixt the various spaces of the patterns. These spaces are then silled in with the enamels—the silets, or cloisons, serving to keep each tint distinct and separate—whilst the thin lines of metal formed by the thickness, or edge, of the silet, form the outline of the composition. Of this variety are the early Greek, and many mediæval Byzantine, Italian, and Oriental specimens.

The Champlevé enamels are differently executed, although the refult is very fimilar. Instead of forming the design by soldering filets of metal on the ground, a thicker plate of metal is taken, and the spaces, or cavities, required to receive the enamels are hollowed out of the mass—the filets, or outlines, of the design

being left standing, as in a wood-cut. The ancient "Gallo-Roman," early Limoges enamels, and many Italian, modern, and Chinese varieties, are of this kind.

Finally, the *Painted* enamels are analogous to paintings on any other material, except that the defigns are executed in vitrifiable colours, on a prepared ground of enamel. In Europe, the latter variety had its origin, probably, not earlier than the fifteenth century.

#### CATALOGUE.

#### VI.—ENAMEIS.

#### No. 180.

Subject, The Entombment. Early Limoges enamel. Circa 1500. Enamel "fur paillon," heightened with gold. This fplendid plaque is one of the finest specimens extant of the earliest painted Limoges enamels, and is probably the work of Nardon Penicaud. The figures have a peculiar individualized character—short in proportion, and homely in type, but of the utmost brilliancy in colour, and perfect execution. Reverse, dark violet enamel. Height, 10\frac{3}{2} in.; width, 9\frac{3}{8} in.

#### No. 181.

in its original gilt bronze frame, enriched with knot ornaments, let into an outer leather frame, stamped with fleurs-de-lys, forming a complete "pax." Enamel on "paillon," heightened with gold. Circa 1480-1500. An early specimen of the Limoges painted enamels, executed like the previous piece. The subject—Christ in the house of Simon the Pharisee, the woman anointing his feet with the box of ointment. Entire size of the pax,  $7\frac{1}{2}$  by  $6\frac{1}{2}$ .

#### No. 182.

MALL CIRCULAR-TOPPED PLAQUE. Same period as the preceding piece. Christ on the knee of the Virgin, with St. John and Mary Magdalene. School of Nardon Penicaud. Reverse, transparent violet enamel. Height, 3\frac{3}{4} in.; width, 3 in.

## No. 183.

RCHED, OR CIRCULAR-TOPPED TRIPTYCH. Complete; early Limoges enamel. Circa 1500-20. The centre compartment has the subject of the Nativity—the Virgin, kneeling, adores the infant Saviour; Joseph. with a lantern, stands near, whilst shepherds are seen kneeling, and looking through a doorway. The "volet," or door on the left, has a prophet, or one of the magi, kneeling, and two figures behind him, with a fantastic background of architecture—the Virgin and Child appearing above in the sky. The other volet has two richly-dreffed female figures in an attitude of adorationprobably fybils foretelling the birth of Christ. The plaques are mounted in the original painted wood frame. Height of centre plaque, 98 in.; width, 7 in. Entire width of triptych, opened, including frame, 20 in. This specimen, important from its size and genuine state, is of the period of the early Penicauds, but coarfer in execution than the known productions of the older members of that family.

#### No. 184.

The figure, painted in grifaille, is on a deep crimfon brown or black enamel ground; the clouds are washed with transparent enamel purple; the flesh slightly tinted in colour,

the hair light brown, and the wings pink, purple, green, warm light brown, and blue. The hem of the drapery is flightly touched with gold. The defign of this figure is effentially Italian, and has something of the sculpturesque character of the masters anterior to Raffaelle. Height, 9½ in; width, 7 in. Reverse, reddish brown transparent enamel. Limoges enamel. Circa 1530-40.

## No. 185.

LAQUE, "en fuite" with the preceding. An angel feated on clouds, with back turned towards the fpectator, and pointing upward with one hand. Black, or purple-brown ground. The drapery washed with a light, transparent, warm, hair-brown tint; the wings coloured pink, purple, and blue. This piece, like the preceding one, is clearly of Italian design.

# No. 186.

LAQUE, by the fame hand as the preceding; tinted in the fame manner. Subject, St. Christopher carrying the infant Saviour over the stream. Inscribed, "S. Christofle." In every respect similar in style and technique to the preceding piece. Height, 9 in.; width, 7 in. It is probable that these three pieces are early works of P. Courtois. They are unsigned, but have many points of resemblance to the known works of that master. The colouring, especially in the predominance of cold violet purple tints, is identical. They were most likely painted before 1550.

#### No. 187.

QUARE PLAQUE. Sinon captured, and brought into Troy. Figures in grifaille. Landscape tinted with cold green; the sky, blue. Very delicately

painted, and, from the manner of execution, and peculiar fombre grey tint, most likely of the early time of P. Courtois. Reverse, colourless enamel. 6 in. square. Circa 1550.

#### No. 188.

flightly tinted and heightened with gold. By Pierre Courtois. Circa 1550-60. This beautiful plaque may be taken as a perfect specimen of the master. The somewhat cold, yet harmonious and transparent colour, gives an air of solemnity, quite in harmony with the subject. The composition displays an acquaintance with the great Italian scholars of M. Angelo, somewhat influenced, in addition, by the school of Fontainebleau, and may possibly be original. This piece is of very sinished execution. The frame, in ebony, is of she seventeenth century. Height, 6 in.; width, 4% in.

## No. 189.

ARGE OVAL DISH, OR PLATEAU. Grisaille enamel, flightly tinted with colour, and enriched with elaborate arabefque gilding. By Pierre Courtois, The subject, which fills the entire centre of the dish, represents Noah and his family, and the animals, issuing from the Ark, copied from a print by "Marc Antonio," after Raffaelle. This is furrounded by a double border of arabefque ornament. On the reverse of the piece, is painted a cartouche of massive strap-work, with bold masks, &c. In the centre, Noah sacrificing. piece is figned, "P. Curteys," and has, in addition, the monogram of Marc Antonio. On the front of the piece is also painted a shield of arms, within a circular wreath. 19 in.; width, 14 in.

# No. 190.

BLONG PLAQUE. The Trojans dragging the horse into the city. Grisaille. The slesh slightly tinted. A composition of much energy, highly sinished. Probably by P. Courtois. Circa 1550-60. Length, 7½ in.; width, 4½ in. This plaque probably formed part of a coffret.

## No. 191.

BLONG PLAQUE. Grisaille, touched with gold. The flesh slightly tinted. Phæton, driving the car of Phæbus. Length, 6 in.; width, 3\frac{3}{8} in. Plaque from a coffret.

#### No. 192.

LAQUE, apparently of fimilar destination. Phæton thrown out of his car. Not figned, but most likely by P. Remond. Plaque from a coffret. Reverse, reddish brown transparent enamel.

# No. 193.

LATE, in grifaille. Subject, The Temptation: Adam giving Eve the forbidden fruit. Underneath is written, "Genese iii." Beautiful border of cartouche scrolls and masks. On the reverse, is a medallion, in which is inscribed, P. Corteys, surrounded by massive cartouche work, pendant wreaths, lions' heads, and satyrs' masks in colours. Rich border of arabesques, in gold. Black, or purple brown ground. A superb and most brilliant plate, from the Bernal Collection. Diam.,  $8\frac{1}{2}$  in. Circa 1556-60.

## No. 194.

MALLER PLATE. The ornamentation of similar pattern to the preceding. In centre, a subject of a lover and his mistress. By P. Courteys. Reverse, cartouche ornaments and masks. Margin of rich arabesque gilding. Diam., 7½ in.

## Nos. 195 to 200 inclusive.

ERIES OF SIX SMALL PLATES. Grifaille. The flesh tinted. The work of P. Courteys. Subject, allegorical representations of the months (April to September), copied from engravings by Etienne de l'Aulne, interspersed with beautiful arabesque gold pencilled ornaments, animals, birds, &c. The reverses decorated with interlaced strapwork, alternating with arabesques, animals, small cameos, &c., in gold. Each piece has the initials, "P. C.," in gold, on the reverse. A most beautiful and perfect series.

#### No. 201.

OZENGE-SHAPED PLAQUE. An ideal female head in colours. Inscribed, "Helene." Length, 7\frac{3}{4} in.; width, 6\frac{3}{4} in. An early work of Leonard Limosin, intended as an insertion into some article of furniture.

#### No. 202.

IMILAR PLAQUE. Head. Inscribed, "Pantafile." Same fize. By Leonard Limosin.

## No. 203.

QUARE PLAQUE. Three-quarter figure of a richly dreffed female, within a circular wreath. Enamel, in

transparent colours, richly gilded. On a riband scroll is inscribed, "Sybila Cumana." By Leonard Limosin. Circa 1540.

#### No. 204.

## No. 205.

IMILAR PLAQUE. Inscribed, "Sybila richea." These plaques are some of the most charming specimens of the early time of Leonard Limosin. They are most brilliant and harmonious in colour, and, although mannered in drawing, are full of graceful elegance of style.

#### No. 206.

LAQUE. The stem of Jesse. The Patriarchs are represented each with a sceptre in his hand, and a scroll inscribed with his name. In the upper part of the plaque, the tree terminates in a lily, on which, within an oval nimbus, surrounded by a wreath, stands the Virgin, with the Child in her arms. Enamel, in colours, richly gilt. In the light, clean, brilliant style of colour of Leonard Limosin (by whom it was, doubtless, painted). Height, 9½ in.; width, 7 in.

#### No. 207.

LAQUE. Same series. The death of the Virgin. Circa 1550? Same size. In the upper part of the composition is the Virgin kneeling, and being crowned by God the Father, and the Saviour, the Holy Ghost, as a dove, descending. Also by Leonard Limosin.

# No. 207 (a).

LAQUE. Same feries. The Annunciation. In the upper part, the Almighty descending, surrounded by cherubim. Signed with the initials of Leonard. Height, 9½ in.; width, 7 in.

# No. 207 (b).

LAQUE. Same series. The Virgin seated at the foot of the Cross, with the dead Christ on her knees, accompanied by St. John and Mary Magdalene. Six swords are pointed to the Virgin's bosom, and above, on a label scroll, is inscribed, "Tua ipsus anima pertransibit gladius." Height, 9½.; width, 7 in.

#### No. 208.

and arrow. She is represented as drawing an arrow from a quiver over her shoulder. A stag stands by her side; in the background, a forest, with a stag hunt. Underneath is inscribed, "Silvarum Ciutrix Castissima;" and, in an oval cartouche beneath, "Virgo Diana est." On a square stone in the foreground, the monogram L. L. (Leonard Limosin), and date, 1573, in bold characters. The sigure, which is of great elegance, and powerfully drawn, is evidently from a design by one of the Italian artists of the Fontainebleau school.

### No. 209.

LAQUE, with the corners cut off. Translucent enamel, in colours, on "paillon," richly heightened with gold. In a corner is the fignature, J. L. (Jean Limosin).

Circa 1570-80. A characteristic piece of this rare master. Subject, the Last Supper. Height, 10 $\frac{1}{2}$  in.; width,  $7\frac{3}{4}$  in.

#### No. 210.

AZZA, on low stem. By Jean Courtois. Circa 1570-80. In the interior of the bowl is painted the subject of the Israelites crossing the Red Sea. Grifaille, slightly heightened with gold, the slesh tinted. The exterior of the piece is decorated with sine cartouche strapwork, terminal sigures, masks, &c., and rich arabesque gilding. The foot painted with arabesques, chimera, &c. The initials, I. C., are painted on the exterior. A highly sinished and magnificent piece. Diam., 10 in.; height, 4½ in. Purchased from the Bernal Collection.

#### No. 211.

EDESTAL SALT-CELLAR, on baluster-shaped stem. The sless of the sigures tinted. Enamel, by Jean Courtois (signed "I. C."). Circa 1570. The bowl is painted with a profile head, and the exterior with grotesque tritons, Amorini, &c. The centre knob, or boss, is decorated with terminal sigures and sessions of fruit, and the foot is carefully painted with Amorini, baiting a bear, and with a shield of arms. (From Mr. Utterson's Collection.) Height, 51 in.

#### No. 212.

in colours, on "paillon," by Jean Courtois. In the bowl is a small classical profile head. The exterior is decorated with Amorini and grotesques; the foot painted with a frieze of nymphs and satyrs, equestrian figures, &c., with land-

fcape background. Underneath the foot, the initials, "I. C." Height,  $4\frac{1}{2}$  in.

## No. 213.

Enamel in translucid colours, richly heightened with gold. The composition, although in the style of the French illuminators of circa 1500-20, is, nevertheless, apparently the work of Pierre Remond, and is probably not earlier in date than about 1540. The series of which this plaque formed a part, seems to have been often repeated. In the South Kensington Museum, the British Museum, and the Collection of H. Magniac, Esq., are various specimens belonging to this set. Height, 9 in.; width,  $7\frac{3}{4}$  in.

#### No. 214.

AZZA, on low stem. By Pierre Remond. Grisaille, the step that the shepherds. A fine composition, of the school of Fontainebleau, with a margin of gilded arabesques. Reverse, cartouche scrolls, a wide wreath of fruit and masks, and gilded arabesque ornaments. The reverse of this piece is singularly sine. The foot is painted with pendent garlands of fruit, cherubs' heads, and with two oval cartouches, in one of which are the initials, "P. R.," and, in the other, the date, "1573." In the bowl, the initials, "P. R.," are repeated. Diam., 101 in.; height, 4 in.

# No. 215.

AZZA, on tall stem. By Pierre Remond. Enamel in grifaille; the sless tinted. The bowl is painted with Abraham offering up Isaac. The reverse decorated

with strap-work ornaments, cherubs' heads, rich gilding, and border of egg-and-tongue moulding. The knob in the stem painted with cameo medallions. On the stem is a subject of shepherds with their flocks. Diam., 7 in.; height, 5½ in. On the foot is also painted a shield of arms, with blazon, in proper colours. Circa 1560–70. This, and the preceding specimen, are of the highest beauty and perfection of finish, of the grisaille enamels of Limoges.

#### No. 216.

LATE, in grisaile; the flesh tinted. The centre painted with nymphs bathing within a bath-room; probably a subject from the history of Psyche. At the bottom, the subject is numbered, "VII.;" border of scroll arabesque, with Amorini, cornucopiæ, &c. Reverse, cartouche scrolls, cherubs' heads, arabesque gilding, and border of scrollwork. By Pierre Remond. Initialed in front, "P. R." Diam., 92 in.

## No. 217.

LATE, "en suite," with the preceding. Venus in the fea, furrounded by nymphs, tritons, &c. Inscribed, "Venus—XVI." Same reverse as preceding.

#### No. 218.

paillon. Christ's Agony in the Garden. Richly heightened with gold. In the foreground, the infcription, "Vigilate et orate," and the initial "S" three times repeated. A magnificent specimen, of powerful and brilliant colour. Painted by a semale artist, Susanne de Court. Circa 1570.  $9\frac{1}{2}$  in. by  $7\frac{1}{2}$  in.

## No. 219.

ACK OF AN OVAL MIRROR. Enamel on "paillon." Subject, "Europa." Surrounded by a wide border of gilded arabefques. Either by Sufanne de Court, or J. Limofin. Circa 1570. 37 in. by 2½ in.

#### No. 220.

ACK OF A MIRROR CASE. Composition refembling the style of E. de l'Aulne. Subject, Bellona, with a lance and shield, standing on strap-work ornament, under a canopy; the sield filled in with arabesques. Enamel on paillon. By Susanne de Court, or Jean Limosin. Height, 3½ in.; width, 2½ in. Circa 1570.

#### No. 221.

OUARE PLAQUE, in colour. St. Cecilia, with relief ornamentation in the four corners. By J. Laudin. Circa 1690. A fine specimen of this master. Bernal Collection.

#### No. 222.

WO-HANDLED CUP, OR TAZZA. Grifaille enamel. In centre, Hercules, with the distass of Omphale. The sides, interior and exterior, filled in with soliated work in grisaille. The ground enriched with gold diaper. By Laudin. Circa 1690. Diam., 5 in.; height, 15 in.

#### No. 223.

IRCULAR PLAQUE, flightly convex, painted on both fides with brilliant colours. On the convex furface, Cephalus and Aurora, inscribed, "l'Aurore et

Cephale;" and the opposite side, Narcissus, looking at himself in a trough, or fountain, and inscribed "Narcisse." By Laudin, or Nouaillier. Circa 1690. Bernal Collection. Diam., 5\frac{1}{8} in.

#### No. 224.

AZZA AND COVER, in grifaille, heightened with gold. The interior of the bowl painted with a banquet scene, within a compartment. After M. Antonio. Surrounded by a gilded border of enriched wave scroll ornament: The exterior decorated with acanthus leaves. The stem has a circular bulb, or knob, painted with tritons and sea nymphs. The foot decorated with acanthus leaves. The cover is embossed with convex oval medallions, painted, within and without, with classical cameo heads. This piece is unsigned, and is of uncertain authorship. Date, about 1560. Height, 7\frac{3}{4} in.; diam., 8 in.

### No. 225.

LATE—one of a feries of the twelve Cæsars. Maroon ground; tinted grisaille. Head of Vitellius. Infcribed, "A. Vitellius. German. imp. P. R. tr." Border of gilded arabesque cameos, &c. Reverse, gilded arabesque ornament. By Leonard Limosin. Diam., 71 in.

#### No. 226.

EXAGONAL SALT-CELLAR. Enamel, in colours, touched with gold. The upper and lower furface, or bowl, painted, with medallion of Paris and Helen, furrounded with border of roses and green leaves. Inscribed, "Paris suis, Ardi Valean," and "La belle Elene suis Ardia." Round the sides, nude sigures of "Lucrese," Leda?, "Orfeus," Fortune, Paris, and a nude male figure drawing Cupid in a car.

By an anonymous enameller, working in the style of Leonard Limosin.

#### No. 227.

plaques by J. Laudin, four on the fides, and two on the lid. Those on the fides are en fuite, painted in grifaille, after Goltsius, and represent respectively, "Faith, Charity, Justice, and Fortitude." The two plaques on the lid contain half-length figures of St. Jerome and the Magdalene, in colours. The borders of the coffer are set with a series of sixty-sour cameos, in soft stone of two layers, representing the kings of France. These are probably of the early part of the last century; the casket itself is modern. Length of casket, 11½ in.; width, 10 in.; height, 13 in.

#### No. 228.

ASKET, containing three Limoges enamel plaques—the metal mountings are of modern French work. The plaque in front reprefents a child led by a guardian angel: painted in colours by J. Laudin. At the fides are two plaques, en fuite, in grifaille, of the period and manner of J. Courtois. Circa 1560. They reprefent respectively, David killing Goliath; and Susannah and the Elders. Height, 8½ in.; diam., 5½ in.

## No. 229.

VAL PLAQUE. Enamel, in colours, and on "paillon." Susannah and the Elders. Attributed to P. Courtois. Circa 1570. Height, 101 in.; width, 8 in.

# Nos. 230 and 230 (a).

with half-length figures of heroic women, after Vignon, within oval medallions, in colours; the fpandrils, or border fpaces, filled in with fcroll-work, in relief, in white. On the faucer is painted, "Antiope;" on the cup, "Judith" and "Zenobie." The cup is ornamented, in addition, with three fmaller medallions containing claffical heads. Circa 1700.

## No. 231.

VAL PLAQUE, in colours and gold. A fwine-herd tending his flock; near him a woman, fleeping; and, in the background, a cottage, or farm-house, with a woman carding flax. Above, is the sign Sagittarius. One of the series of the Months, after Etienne de l'Aulne. By P. Remond. Circa 1570. Length, 7¼ in.; width, 6¼ in.

## No. 232.

VAL PLAQUE, in colours. By Leonard Limofin. Joseph and Potiphar's Wife. Height, 8 in.; width, 61 in.

# No. 233.

EXAGONAL SALT-CELLAR. Enamel, in colours. One of the fides is filled in with a shield of arms, within a green wreath. The others contain half-length female figures in classical costumes, and aged men—probably intended as prophets and sybils. Above the head of each figure is a label scroll; these labels are inscribed with various obscurely-worded Latin sentences. At the top, in the hollow for the falt,

is a bearded claffical bust, and the flat border round it is filled in with a beautiful wreath of green leaves, ornamented with a blue rosette at each angle of the hexagon. The under side has a similar wreath, and in the centre, the sun, as a human face, surrounded with rays. This piece is an exquisite specimen of an anonymous master. It is in perfect preservation, and of most highly-sinished execution. Circa 1550. Height,  $2\frac{3}{8}$  in.; diam., 3 in.

# No. 234.

IRCULAR PEDESTAL SALT-CELLAR. Grifaille enamel; the flesh of the figures slightly tinted.
The work of Pierre Remond. On the foot, or base, is represented the Creation of Eve, and the Temptation; in the bowl, at the top of the salt, a classical helmeted head, surrounded by a border of cartouche ornament. A most finished and beautiful specimen of the master; in perfect preservation. Height, 3 in.; diam. at base, 41 in.

## No. 235.

AZZA AND COVER, on low stem. Grisaille enamel, on dark maroon purple ground. On the exterior, the under side of the bowl is decorated with four medallion prossle heads—two male and two semale—contained within interlaced quatresoil panels, inscribed respectively "Veneus," "Excus," "Davit," "Arbanie." The cover, on the outside, is painted with a frieze, or procession, of classical draped female sigures, and a car drawn by two horses, in which is seated a god and goddess. In the interior, the hollow of the bowl is silled in with the subject of St. John the Baptist preaching in the wilderness; and the interior of the cover has four prossle portraits—alternately male and semale—within oval compartments,

incribed respectively, "Odenes," "Piramus," "Poxlisene," and "Bersebee." This piece is of unusual type, and the work of an early unknown master. Circa 1530-40. Height,  $6\frac{1}{2}$  in.; diam.,  $8\frac{1}{6}$  in.

## Nos. 236 to 239.

fenting respectively full-length standing sigures of St. Augustin, St. Gregory, St. Ambrose, and St. Martin, clad in full pontificals. Painted in vivid colours and gold. These splendid enamels are probably works of the early and siness time of Pierre Courtois. Circa 1540? The painting is executed with singular care and sirmness, and nothing can surpass the depth and lustre of the colours; in this respect, they are fully equal to those of the "second" Penicaud. The gilding, likewise, is touched with great spirit. The sigures are of somewhat short proportions, but are, nevertheless, of dignished style. They are, probably, from the designs of one of the best French masters of the old school. Height of each plaque,  $8\frac{3}{4}$  in.; width,  $6\frac{1}{2}$  in.

#### VII.

# ANTIQUE AND OTHER ENGRAVED GEMS.

HE Ancients were passionately fond of engraved gems, and the highest art is to be found embodied in these antique relics. Almost every variety of precious stone was employed by the gem-cutter as a vehicle for his art:

engravings being not unfrequently executed on the ruby, or the fapphire even. Engraved gems, as works of art, were, in short, much more esteemed by the Ancients than mere jewels, which depend for their intrinsic value on their colour and lustre only. Intaglios—i.e., stones in which the design is cut in, or hollowed out—are generally of fmaller fize than cameos, in which the work is raifed, or fculptured, in relief. The former were most frequently set in rings, and used as seals; the latter, as brooches, fibulæ, &c. It is well known that the Ancients had a passion for rings, which, at certain periods, and with some individuals, amounted to mania. The fingers of some Roman dandies were often literally covered with them, and enormous fums were given for fingle stones engraved by great artists. Dactyliotheca, -fystematic collections of engraved gems, were, from an early period, formed by princes and private connoifleurs, and were, likewife, often the chief ornaments of the treasuries of the temples, which in antiquity, like the more recent ecclefialtical treasuries of the Middle Ages, corresponded, in reality, to the public museums of the present day. Gems, from their nature, are almost indestructible, except by actual violence. The sea has swallowed up myriads; fire has blanched and shattered no small proportion; many thousands are treasured up in modern collections; and the soil which covers the regions of ancient civilization, doubtless, still holds concealed priceless treasures of ancient glyptic art. Every day the ploughshare of the peasant, or the autumnal rains, lay bare some long-lost gem, which may once have graced the singer of a Cæsar; which may bear the impress of the losty genius of a Pyrgoteles, or a Dioscorides; or affist the scholar by throwing light on some forgotten usage of antiquity.

Antique gems have value and interest from the following points of view:—First, from their intrinsic excellence and beauty as works of art; secondly, in respect to learning, as monuments of ancient civilization; and, thirdly, as interesting relics of venerable antiquity. The art displayed in them is equal to that manifested in ancient sculpture: it has never since been equalled, and can never be surpassed. After many ages of neglect, in the sisteenth and sixteenth centuries, with the revival of art, antique gems became again highly prized. Dactyliotheca were again formed, and a voluminous literature, treating of this branch of the arts of antiquity, sprang up, and, thenceforward to our own days, gems have been universally sought after, and appreciated by connoisseurs.

Ancient gems are fometimes found very much worn, and defaced by long use; whilst, on the other hand, they are sometimes in as perfect a state as when they left the engraver's hands, and, as the latter condition is of not uncommon occurrence, modern imitations are the more easily effected. The copying, or forging, of antique gems has, indeed, been practised, especially in Italy, for the last three hundred years, to such an extent, that it is probable the spurious copies now extant outnumber the original antiques; so that, in no class of works of art, is greater caution, or more long-continued experience, in judging of the authenticity of specimens, requisite, than in this. The following are some general rules, which may affist in judging of the genuineness (i.e., the antiquity) of an engraved gem.

First, the ancient gem engraver seldom bestowed his time and talent on an inferior stone; so that, although coarse and inferior engravings are fometimes found on stones of fine quality, on the other hand, the highly-finished engraving is rarely, if ever, seen on a bad stone; the work and the stone, in short, were generally of corresponding quality, Secondly, as (in intaglios) the Ancients were accustomed to examine them by transmitted light: homogenous and femi-transparent stones were, as a rule, preferred to cloudy and mottled ones, especially for delicate works. of the stone was, in all cases, carefully levelled and highly polished. and, as a rule, the engraving itself is nearly always highly polished: a degree of finish, which, on account of the great extra labour it involves, is feldom bestowed on modern works. Any supposed antique intaglio of highly-finished work, if not polished in the "incavo," or hollows, of the design, should be looked on with great fuspicion, and is, most probably, a forgery.

In tameas, the field, or ground, of the work is generally highly polished, whilst the slesh, or nude figure, is often lest mat; the drapery and accessories are often, however, polished. The field, or ground, seldom shows much margin beyond the subject, and, when the design is small in proportion to the extent of polished background, it is, as a general rule, an indication of recent origin. If there is any signature or inscription on the stone, it should be in relief or cameo, like the rest of the design; inscribed characters are scarcely ever incised, or cut in, on ancient cameos. It is important to observe the material, or peculiar stone, employed in cameos, certain varieties of stones being almost a sufficient guarantee of the antiquity of a work, whilst others are as equally

indicative of a modern origin; experience only can, however, inform the observer on this point; but, after all, the study and observance of the art displayed in the work itself is the surest guide. The connoisseur, imbued with a true feeling for art, will speedily be able to distinguish, as by a kind of intuition, the true from the false; whilst many material indications in the styles and methods of execution of a work, to be acquired only by minute observation, come in aid of his judgment.

The cornelian, or fard, and the many varieties of the onyx, were the favourite stones employed in antiquity. After them, the chalcidony, amethyst, jacynth, aqua marina, red jasper, and heliotrope, are the most frequent.

The names of many eminent antique gem sculptors have come down to us, and many gems are still extant signed by their authors. These, however, are very rarely found, and, as it has been a common practice, for centuries, to affix the names of ancient artists to modern works, or to cut them on inferior antique gems, great caution should be shown in accepting any signed gem.

Generally speaking, Etruscan inscribed gems bear the names of the mythical, or poetical, persons or events represented; Greek gems, the signature of the artist; and Roman gems, the name of the possessor.

It was a constant custom with the Ancients to bury or burn the dead, with their rings and ornaments; and great numbers of antique stones are found, which have been passed through the fire on the funeral pile. These have generally been brought to light in sepulchral urns, in which they were piously deposited along with the ashes of the dead.

As regards the subjects represented, they are almost infinitely varied. Purely historical representations, however, should be excepted; such subjects, for instance, as Curtius leaping into the Gulf, Mutius Scæyola, or the Death of Cæsar, may

always be fafely referred to the cinque-cento, or more recent periods.

The age of a gem, and its origin—whether Greek, Etruscan, Roman; Asiatic or European—can sometimes be inferred from the style of art displayed and the subject represented, and investigations with this view are often in the highest degree instructive.

The study of gems, in fact, is a work worthy of the possession of the highest erudition and the purest taste. Besides the gems themselves, the Ancients were acquainted with the art of making casts in imitation of them in glass—called "antique pastes." In this respect, their skill as far exceeded the similar work of modern times, as their engravers themselves transcended modern artists. Every variety of stone was imitated in glass paste, with an accuracy which is often quite deceptive; whilst the engraving itself was reproduced with the utmost sharpness and perfection. Cameos, as well as intaglios, were reproduced in glass, and the former were often afterwards worked over on the wheel by hand. Antique pastes, when sinely preserved, are as valuable as gems themselves; they are, however, generally much defaced and corroded, and, when well preserved, it is frequently difficult to decide upon their authenticity, from their great resemblance to similar modern casts.

Engraving on hard stones is executed by small steel tools, of various shapes and sizes, which are made to revolve with great rapidity by means of a wheel or lathe—the stone, fastened down to a short stick, or handle, with wax, being held against the tool. The tool itself, however, could make no impression on the stone, were it not affisted by some harder material. The point is, therefore, kept moistened with oil, mixed with diamond dust or sine emery powder, the hard particles of the latter really cutting into the gem. The minor details of the engraving are sometimes executed, or finished, by scratching, or engraving, by hand, with a fine-pointed diamond.

#### CATALOGUE.

#### VII.—ANTIQUE AND OTHER ENGRAVED GEMS.

### No. 250.

CARABEUS, in green jasper, with its original gold wire loop or feal handle, engraved with a lion devouring a stag, within a striated border, which furrounds the margin of the stone. The intaglio is of a flat or shallow character, so as to yield an impression in low relief; and the engraving, as well as the scarabeus or beetle itself, is of exquisitely finished workmanship. The group is artifically arranged to fill the field of the gem, and is of very archaic, though energetic and spirited The border, confifting of two parallel lines encircling the field, and filled in with small diagonal strokes, frequent occurrence in early Greek and Etruscan gems, and is, indeed, a special mark of early date. This gem was found, with many others, at Tharros, in the island of Sardinia, and is an important monument of a very remote era and a peculiar people. Many of the scarabs and other remains—now widely dispersed, and known to the learned as peculiar to this locality-were engraved with Egyptian hieroglyphics; whilft, at the same time, they display an evident admixture of Phœnician art. It is supposed that the necropolis, where this gem was found, was

that of an early Greco-Phoenician colony, fettled in Sardinia as far back as the fifth or fixth century before Christ. 10/16ths by 8/16ths. (See engraving.)

## No. 251.

NTAGLIO, in green jasper. Hercules kneeling, holding ing a bow in one hand, and, with the other, brandishing his club above his head. Behind him, in the field, is an object apparently intended for a bird—striated border—in its ancient gold setting as a ring. This gem, of archaic design and execution, is of early Greek or Greco-Etruscan work; dating probably as far back as 500 or 600 B.C. The setting, though antique, is probably much more recent, and may be Roman. It is probable that the subject of the intaglio represents Hercules killing the Stymphalian birds. 9/16ths by 7/16ths.

## No. 252.

MALL INTAGLIO, on brown fard. Probably cut from a scarabeus. Hermes or Mercury—a standing, nude, male figure in profile, with one hand raised, the other holding a caduceus. Etruscan work. 8/16ths by 6/16ths.

## No. 253.

NTAGLIO on striped fardonyx. A bearded male figure, in a stooping position, holds in one hand a human arm, and appears in the act of taking up a disjointed leg. A single line surrounds the field. Early Greek work. This is the myth or legend of Prometheus, who is here represented as bringing together the scattered limbs of a man, which he had moulded in clay previously to giving it life. 10/16ths by 7/16ths. (See engraving.)

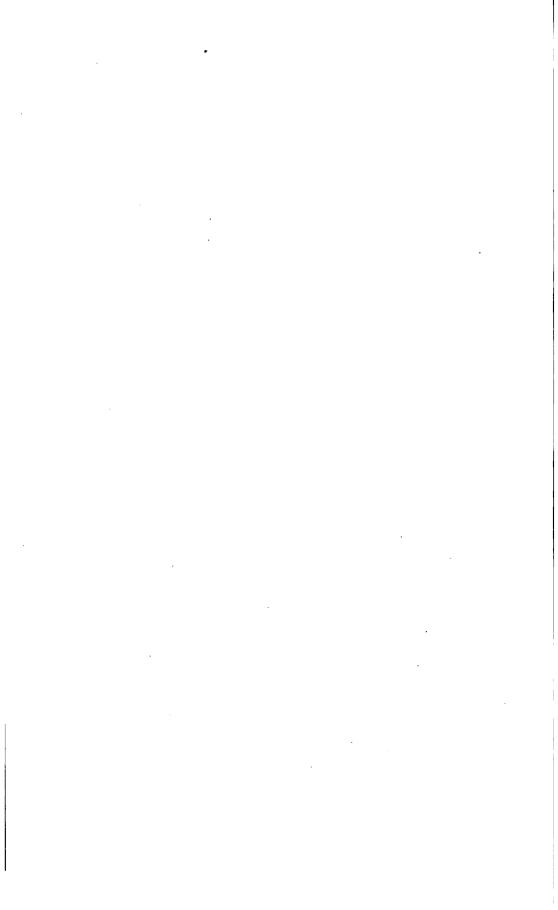

# No. 254.

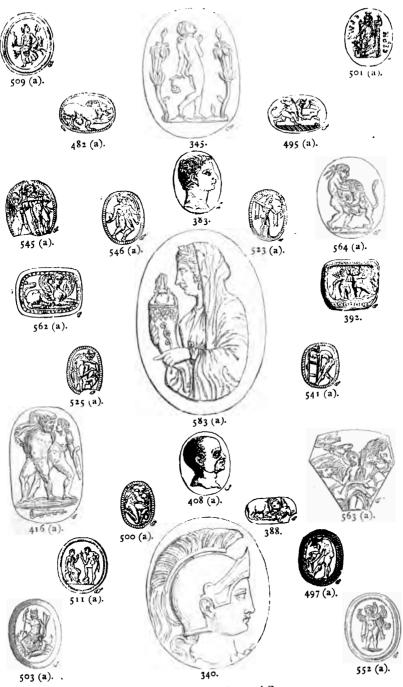

CARABEUS, in Syrian garnet. This gem (which, as a scarabeus, is of unusual size and material), is of uncertain origin and subject. The engraving represents two male figures, both in action, but apparently not in concert. the right, a nude figure, Hercules, with a club over his shoulder, is in a walking or retreating attitude. On the opposite side, another figure, holding a lance, and wearing a crown of rays, appears in the act of advancing; betwixt the two figures, are engraved on the field of the gem, a star and a crescent, or the sun The gem is furrounded by the usual striped border. The style of engraving is coarse and heavy, but the drawing is tolerably correct, and apparently indicates a much more recent period than the fcarabeus and border would oftenfibly denote. It is probable that the engraving is a work of the Roman period executed on an Etruscan scarabeus, which has been rubbed down, to admit a new engraving: the perforation of the stone, which is very near the furface, lends strength to this supposition. 13/16ths by 10/16ths.

## No. 255.

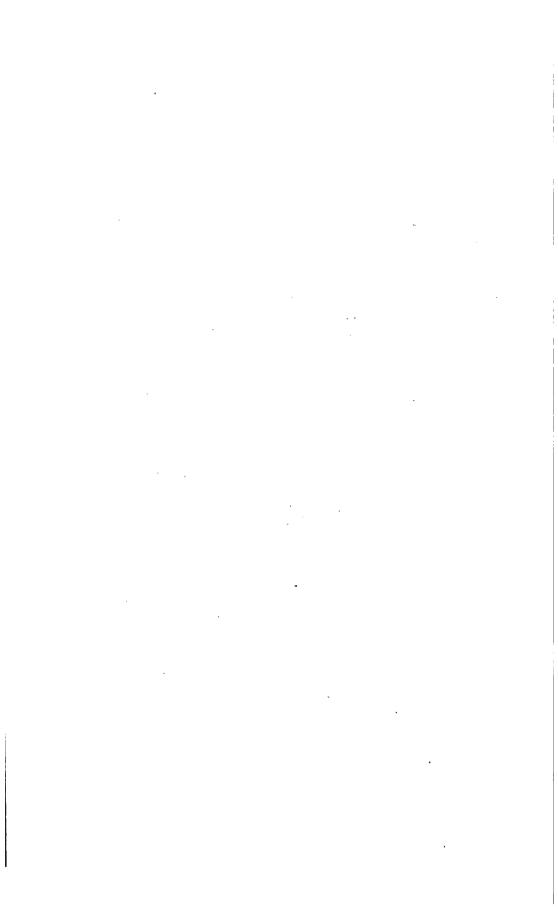

MTAGLIO, in brown striped fard of oblong shape; striped border round the margin. In the centre, a column, with a trophy of arms. On the right, a warrior standing with a lance and a buckler. On the opposite side, a warrior stooping, and apparently taking the cover from a large vase. The subject represents Menelaus and Agamemnon drawing lots, which are thrown into an urn, to determine which of the two should sight with Hector. This interesting intaglio is of early Italo-Greek or Etruscan work. 14/16ths by 9/16ths.

VII. Antique and other Engraved Gems.

## No. 256.

navigating a boat or ship. At the stern is seated an aged man, the head having some resemblance to Socrates. He is managing the sail. At the prow is a sailor wearing a conical cap, apparently also occupied in the navigation of the vessel. It is unfortunate that this gem has been blanched by sire, having in all probability been burnt on the singer of the original possessor. It is of exquisitely truthful and spirited, though very slightly-sinished, workmanship—the relief being very slat. It is undoubtedly of pure Greek work, and, as a cameo, is an object of great rarity. The subject is probably some mythological representation, the signification of which is not very obvious. 11/16ths by 10/16ths. (See engraving.)

## No. 257.

layer, flesh coloured, semi-opaque with transparent spots. A panther couchant—underneath is the inscription MNEMON (i.e., "Remember")—the margin of the stone bevelled and surrounded with a raised filet. This gem, though of slight execution, is touched with great spirit, and the manner in which the peculiarities of the stone are made account of is very interesting. It will be remarked, on looking at the gem by transmitted light, that the natural marks in the upper layer of the stone represent the panther's spots. The Ancients were extremely ingenious in thus appropriately adapting their materials to the required subject: stones of symbolical or suggestive colours being constantly adopted for certain representations. 13/16ths by 10/16ths.

## No. 258.

AMEO of long, oval shape, in pale sardonyx of two layers. A Greek inscription, encircled by a raised filet.

Margin of the stone bevelled—

ΝΙΚΗΣΩ ΜΕΝΕΣΤΡΑΤΟΥ ΠΕΡΓΑΜΕΝΗ " Nikefos
Son of Menestratos
the Pergamenian"

—most likely the name of the original possession of the ring. It is not improbable that these inscribed camei were set in funeral rings and burned with the possession, thus serving as a permanent record of the defunct ashes. I in. by 9/16ths.

## No. 259.

AMEO. Onyx of two layers. Greek inscription within a raised filet. Margin of the stone bevelled—

ΕΥΤΥ ΙΠΑΝΙ

#### No. 260.

NTAGLIO of long oval shape, in dark brown striped fard. A draped nymph or Greek lady in a walking attitude. The figure, seen in front, is as it were, in the act of walking out of the field of the stone. This fine intaglio is of the highest period of Greek art. Although of expeditious workmanship, the figure is characterized by a grandeur of design resembling in every respect the works of the era of Phidias. 14/16ths by 6/16ths.

#### No. 261.

NTAGLIO in golden brown fard. Achilles, wounded in the heel by the arrow of Paris, is crouching down and endeavouring to withdraw the missile. On his left arm he bears a circular shield, the *umbo* of which is formed by a Gorgon's head. This gem, executed in the period of pure Greek art, is an excellent specimen of a design very often represented on engraved stones. The sigure is skilfully composed, and engraved with great mastery in a large and facile style. 11/16ths by 8/16ths.

#### No. 262.

fhooting the Stymphalian birds. The engraving, of minute but grand character, occupies only a small part of the centre of the stone, which is of exquisite beauty. The upper layer, in which the engraving is executed, is of fine transparent hair brown. This is surrounded by a zone of bluish white of perfect regularity, and the under layer or ground is of beautiful deep brown tint. Fine Greek work. 11/16ths by 0/16ths.

## No. 263.

from the Trojan horse. Early Greek work. The horse is represented within the walls of Troy, on which, or above, are seen temples, towers, &c. The Greeks are emerging from a square door in the horse's side, and descending by means of a ladder. One of their number is opening the gate of the city, whilst a figure on the summit of a tower of the wall, probably Cassandra, appears in the act of giving the alarm. The horse is drawn and executed with great

delicacy, in an extremely low style of *incavo*, peculiar to many early Greek gems, and is of archaic design. A fragmented gem of very similar design is sigured in Winckelmann's "Monumenti inediti," pl. 140.

### No. 264.

of Medusa. The stone cut "en cabochon." The mask three-quarter face—deeply cut; the back of the stone hollowed out to admit of the engraving being well seen by transmitted light. Although executed with the utmost expedition as an object of commerce, this small intaglio is as grand in character as would have been a colossal bust. The art displayed in this work of trivial personal decoration is in fact the same in quality as that of the great sculptures of Phidias and Praxiteles. 9/16ths by 7/16ths.

## No. 265.

garnet. Eros or Cupid. Winged profile buft. Greek work. This gem, of fine character and good workmanship, is of well-known type. Cupid is here represented as a youth of thirteen or fourteen years old. The frequent occurrence of fine gems on Syrian garnet or carbuncle evidently denotes that this stone had a higher value in antiquity than it now possess. The ancient garnets are mostly very inferior stones, clouded and full of slaws—whilst at the same time they are nearly always hollowed out at the back to allow of the engraving being well seen by transmitted light. The carbuncles now used in modern jewellery are generally much freer from these defects, and are doubtless obtained from a different locality. It is worthy of note that the ancient garnets are almost invariably cut "en cabochon,"

which of late years also has been the exclusive mode of displaying this beautiful stone. 11/16ths by 11/16ths.

#### No. 266.

NTAGLIO on amethyst. Full-faced Silenus mask. Greek or Greco-Roman work. A beautiful gem. 8/16ths by 7/16ths.

### No. 267.

AMEO—onyx of two layers. Ideal head: Achilles or Alexander. This small work is probably of the Ptolemaic period. The head is executed with a degree of delicacy unusual in a material of so little value—the stone in this instance being a very ordinary one. 9/16ths by 8/16ths.

#### No. 268.

AMEO—Oriental onyx of two layers. Two masks respectively of Bacchus and Silenus crowned with vine leaves, placed side by side in the long oval field of the gem. Executed in low relief. Greco-Roman work. 1 in. by 9/16ths.

#### No. 269.

AMEO—pale fard. A ram's head executed in high relief. The head, which occupies nearly the entire field of the stone, is of unusual dimensions, and indeed in this respect quite enters the domain of sculpture. It affords a striking example of the great talent of the ancient artists in their representation of animals. I 1/16th by  $\frac{3}{4}$  in.

## No. 270.

AMEO—Oriental onyx of two layers. A feated faun caressing a goat—surrounded by a raised filet. This beau-

tiful gem recalls many compositions painted on the walls of Pompeii: it is probably of fimilar Greco-Roman origin.

#### No. 271.

NTAGLIO, "en cabochon." Dark golden fard. A nude female figure, feen in front, holding in one hand a bird with a worm or ferpent in its beak. This gem, though of fmall dimensions, is executed with wonderful delicacy and finish, in a low flat style peculiar to antique glyptic art, and of most difficult execution. The engraving is highly polished, and all the details, notably the extremities are touched with a truth and firmness, which seem little less than miraculous, when the extreme minuteness of these details is taken into account. It is probable that this exquisite figure represents some samous antique statue. It is undoubtedly the work of a Greek artist, probably of the Augustan period. The figure is Venus and the bird, most likely a sparrow—her well-known emblem.

### No. 272.

NTAGLIO. Oriental onyx of three layers—" en cabochon." A minute male figure, with a voluminous mantle, carries a vase or amphora in his arms. A well-finished work. Greco-Roman period. 9/16ths by 7/16ths.

### No. 273.

AMEO—onyx of three layers. Head of the young Hercules clad in the lion's skin. Of coarse yet very effective work. The ground layer of the stone is of slate grey of great thickness, and left rough at the back: the head of brilliant opaque white cacholong, which assumes a vivid orange red in the lion's skin. The profile of the head is deeply

under cut; so as to detach itself in the most striking and effective manner from the ground by casting a deep shadow. Everything denotes that this cameo was intended as an insertion into some object of utility, and was not intended as a personal ornament.  $1\frac{1}{4}$  in. by 14/16ths.

### No. 274.

This fingular gem is executed on a flat stone of irregular shape, apparently left as it was sawn from the pebble. The heads are arranged without any regard to symmetry—one, of larger proportions than the other two, has a wreath of corn round the head and a pendant veil, and somewhat resembles the bust of Livia in the character of Ceres. The two other heads, apparently of girls, are regardent and placed at right angles to the previous one. This singular arrangement and the irregularity of the stone, give the gem the appearance of a trial or work executed for practice. From the irregularity of the stone and its size, it can never have been set. The style of the work is rude yet characterstically antique (Roman work.) I in. by 3/4 in.

#### No. 275.

NTAGLIO in red fard. The god Pan holding an ear of corn in his hand. Roman work. 11/16ths by 8/16ths.

# No. 276.

NTAGLIO in aqua marina. A female figure in a walking attitude, clad in a mantle and carrying in her arms a small animal. An exquisite work of the Augustan period. The stone, which is a most beautiful one, is of unusual shape, oblong with the corners rounded, and is facet cut

round the margin. The figure probably represents Diana returning from the chase—the lithe and slender proportions of the goddess of the chase being clearly recognisable, although the entire design is of very unusual type.  $\frac{3}{4}$  in. by  $\frac{1}{3}$  in.

#### No. 277.

NTAGLIO on nicolo. Venus drinking from a patera—near her, on the ground, is a vase with a palm branch. Roman work. 7/16ths by 6/16ths.

#### No. 278.

wearing a crown of rays—of fine work. The massive gold enamelled setting is a beautiful specimen of Italian cinque-cento design. The gem is probably of Asiatic-Greek origin, the crown of rays generally appearing on the Greek colonial coins of this emperor. 11/16ths by 9/16ths.

# No. 279.

NTAGLIO on red porphyry. A female imperial portrait head wearing a veil or tiara—probably Livia. Roman work. This gem offers a rare instance of the employment of porphyry in the glyptic art. 11/16ths by 9/16ths.

#### No. 280.

MALL CAMEO. Oriental onyx of three layers. A Capricorn of minute dimensions surrounded by a raised filet—the margin of the stone widely bevelled. The Capricorn was adopted by Augustus as his device or emblem, and was thereupon universally affected by his numerous adherents.

This gem is in all probability one of these ancient badges of partizanship. 8/16ths by 7/16ths.

#### No. 281.

NTAGLIO, on Oriental onyx of three layers. A comic actor in a walking attitude, wearing a mask and holding a pedum or staff in one hand. Roman work. \(\frac{3}{2}\) in. by 10/16ths.

#### No. 282.

INUTE INTAGLIO in red fard. A panther holding a thyrsus. Roman work, executed with great dexterity. This subject is a well-known dionysiac symbol or emblem of Bacchus. 4/16ths by 3/16ths.

# No. 283.

NTAGLIO—pale fard, with a white band or stripe across the field. Conjoined portrait busts of an emperor and empress, probably Claudius and Agrippina. Roman work. 3 in. by 11/16ths.

#### No. 284.

NTAGLIO on deep golden fard. An imperial, laureated bust—apparently Claudius. Roman work.

# No. 285.

NTAGLIO on fapphire. Imperial bust portrait— Hadrian. The margin of the stone and the reverse elaborately facet cut. It is worthy of notice that facet cutting, which is of rare occurrence in antique gems, is generally confined to the *aqua marina* and the sapphire. In this example, contrary to the general custom, the engraving is very imperfectly polished. This is owing to the extreme hardness of the stone. The head, which is well finished and masterly in style, must have necessitated great labour, and it is rare to find engravings on sapphire carried to this degree of finish.  $\frac{1}{4}$  in. by 6/16ths.

#### No. 286.

NTAGLIO on aqua marina. Imperial bust portrait—Domitian? Spirited and beautiful Roman work. The gold setting, enriched with black enamel, is an exquisite specimen of Italian cinque-cento art. 7/16ths by 6/16ths.

#### No. 287.

NTAGLIO on red fard, or cornelian. A portrait head, refembling the bust of Cicero. Roman work of good style and period. 1 in. by 6/16ths.

#### No. 288.

NTAGLIO, on Syrian garnet. Roman portrait head. This piece has confiderable refemblance to the preceding, and is probably an idealized portrait of Cicero. 9/16ths by 7/16ths.

#### No. 289.

NTAGLIO in aqua marina. Bust of Harpocrates.

Roman work. 10/16ths by 8/16ths.

## No. 290.

NTAGLIO, on cornelian. Head of Socrates. Roman work. 9/16ths by 8/16ths.

#### No. 291.

NTAGLIO on nicolo. A grotesque composition of a human mask, a ram's head, a vulture or eagle, and an eagle devouring a serpent. Compositions of this nature, judging from the number and variety which have come down to us, must have been very popular with the Ancients. They are nearly always of the Roman period, and should probably be regarded as enigmas or charades expressing certain qualities possessed or affected by the owner of the gem. They are variously termed in conventional nomenclature "chimera," "grylli," or "capricci."

#### No. 292.

NTAGLIO on red fard. Two Amorini in a boat, one rowing, the other fishing with a rod and line. A fish is suspended at the prow of the boat. Early? Roman? work. 8/16ths by 7/16ths.

### No. 293.

NTAGLIO in bloodstone. A dolphin or other marine animal. This gem is in its original antique bronze setting. It is probably an early Christian representation; the style of the intaglio agreeing exactly with works of that period. The fish, the dolphin in particular, was a well-known device of the early Christians, and is frequently found on engraved stones. 10/16ths by 8/16ths.

# No. 294.

CTAGONAL INTAGLIO on brown fard. Late Roman work. A chimera with a lion's head furrounded with rays. The lower part terminating in a ferpent or

the body of a reptile furrounded with zodaical and other mystical signs. Above the head of the *chimera* are several obscure Greek letters. This gem is the work of the Gnostics, a sect of heretics, who seceded from the early Christian church. Gems of this description were used as talismans. 13/16ths by 7/16ths.

### No. 295.

NTAGLIO on lapis-lazuli, in its original antique gold ring fetting. A Triton—the lower extremities formed by two fishes' tails; holding in one hand a trident—in the other a peacock. Above his head is the fun or a star; beneath him, a crescent or half moon. Like the preceding gem, probably of Gnostic origin. 8/16ths by 6/16ths.

### No. 296.

AMEO, in Oriental onyx of three layers. A veftal or mourner, clad in a dark mantle, is feated before a flaming tripod, and with one hand offers a libation with a patera and in the other holds a wreath. Near the tripod is a cippus with an urn. This most beautiful cameo is signed, in minute Greek characters, PEFA. The work, though conceived and executed entirely in the style of the antique, is in all probability the work of some talented Italian artist of the last century.

#### No. 297.

AMEO in jasp—onyx of two layers. Dancing faun with a lion's skin and thyrsus. A spirited work in the style of the antique, probably of the last century. 11 in. by 12 in.

#### No. 298.

NTAGLIO on cornelian. An athlete anointing himself. Signed,  $\Delta IO\Sigma I\Pi\Pi\Omega\Sigma$ . A most beautiful last-century Italian engraving in the style of the antique. 15/16ths by 11/16ths.

#### No. 299.

NTAGLIO in cornelian. Chiron and Achilles. Signed, 'TPT $\Phi\Omega$ NO $\Sigma$  EPIOIEI—i.e., "The work of Tryphon." An Italian work of the beginning of the present century, in imitation of the antique. From the Poniatowski Collection. 1\frac{1}{8} in. by \frac{7}{8}.

#### No. 300.

The Virgin and Child. Infection of Cod," and with the word XAIPE, or "Hail!" Byzantine or mediæval Greek work of uncertain date. 12/16ths by 10/16ths.

# No. 301.

NTAGLIO on Oriental onyx of three layers. In the centre of the stone is a full-faced bust portrait of the youthful Augustus; on the left, Julius Cæsar with the lituus or augur's rod; and on the right, Marcus Agrippa with a vase. These are surrounded by a beautiful wide border of oak leaves and acorns, in which over the head of Augustus is his symbol the Capricorn, a globe, and horn of plenty. This rare and most important gem is of fine work, and executed in a most exquisite and precious onyx, the beautifully contrasting colours of

which greatly add to the value and interest of the work. This gem was evidently cut immediately after Augustus' attainment of power. 1 kg in. by 13/16ths. (See engraving.)

#### No. 302.

NTAGLIO on red fard. Othryades, who has funk upon the ground, writing the news of victory on his shield with his own blood. Greek or early Roman work. This extraordinary composition, offering almost every technical difficulty of which the glyptic art is capable, was frequently repeated by the Ancients. The extreme depth of some parts of the engraving is especially remarkable. 11/16ths by 7/16ths.

### No. 303.

NTAGLIO on red fard. An aged faun is examining the wounded foot of a younger one. In the centre of the composition is a column supporting a vase, and on either side are two vines, the branches of which encircle the field of the gem. The expression of the heads of the two sigures is very admirable—the pain of the younger one, and the serio-comic expression of the elder being most truthfully rendered. Roman work. 12/16ths by 9/16ths. (See engraving.)

### No. 304.

NTAGLIO on striped brown fard. A galloping centaur with a bow and arrow. The sign Sagittarius. Early Roman work. 8/16ths by 6/16ths.

#### No. 305.

MALL INTAGLIO on red fard. A scorpion, two fishes, and two crabs—the figns, Scorpio, Cancer, and Pisces. Roman work of finished execution. 7/16ths by 6/16ths.

#### No. 306.

NTAGLIO on red onyx of three layers, "en cabochon."

Cybele in her car drawn by two elephants. Roman work.

10/16ths by 9/16ths.

#### No. 307.

NTAGLIO on jacynth. Conjoined busts of a bearded philosopher and a bacchante. Highly-finished Roman work. 10/16ths by 9/16ths.

#### No. 308.

NTAGLIO on red fard. Head of Vespasian. On one side is an ear of corn, and underneath, the name "Vesp." Contemporaneous Roman work. 11/16ths by 9/16ths.

### No. 309.

MALL CAMEO in fardonyx of three layers. Winged buft of Cupid or Eros. Greek work. The expression of the head in this charming little gem is exquisitely true. 10/16ths by 6/16ths.

# No. 310.

AMEO AND INTAGLIO CONJOINED—mottled light red fard. This fingular gem is probably a buckle or fibula complete in itself. The intaglio part confists

of a large oval stone slightly convex on the surface, engraved with a tree, from the branches of which two masks are suspended; leaning against the trunk of the tree is a pedum. At the back is attached a large tragic mask in full relief wrought in the mass of the stone and forming as it were a handle, which would enable the gem to be conveniently used as a seal. The mask is hollowed out, and the eyes and mouth are pierced. It is not unlikely that the large aperture of the shell-shaped mouth of the mask was perforated in order to allow of a string passing through, by which the wearer's mantle may have been fastened. The lower part of the sield of the intaglio part is wanting. Roman work. Height of the gem when complete, 15 in.; width, 14/16ths; depth, from back to front, 3 in.

### No. 311.

graved in intaglio. The work of Valerio Vicentino. The subject of this engraving is uncertain. A draped and bearded figure probably a priest or augur, is issuing from a classical portico, and presenting an apple or other fruit to a figure in Roman military costume, who is kneeling and receiving the fruit in a patera. Behind him are three other figures in Roman armour witnessing the ceremony. Background of classical architecture. On a frieze is inscribed, in bold characters, "Valerius Vi—F." There can be little doubt but that this plaque was originally the panel of a casket, such as the famous ones described by Vasari in his life of this artist. Height,  $3\frac{1}{4}$  in.; width,  $2\frac{1}{8}$  in.

### No. 312.

NTAGLIO on red cornelian. Ideal laureated head, probably Apollo. The flight and hasty execution of this gem is redeemed by the exquisite beauty of the

type. The profile has something of an individualized character, and is full of elegance. Nothing can exceed the purity of outline and skilful management of relief shown in the features. The lips, nose, and ear, though evidently executed with the utmost haste, reveal the practised hand of a great master, and the hair and wreath are merely indicated by coarse rapid strokes of the tool. On the whole, the beauty displayed in this trivial work is a remarkable evidence of the high status of ancient Greek Art. 11/16ths by 8/16ths.

### No. 313.

NTAGLIO on a beautiful parti-coloured fard. A nude figure with a lyre, &c., resembling an "Apollo Cytharedus." Early Greek work. The figure, of youthful and fomewhat lengthy proportions, is feen in profile, and is standing on tiptoe; in one hand he holds a lyre, and in the other the plectrum or small stick with which the cords of the lyre were So far this gem agrees with an usual Greek type of Apollo Cytharedus. From the waift of the figure, however, a feries of fingular objects is fuspended, which would be rather the accompaniments of a dancer or mountebank than an Apollo: these are six elongated appendages, apparently bladders, or intestines, tied up at the extremities: they are evidently attached to a belt passing round the waist of the figure, and hang, three in front and three behind, reaching down almost to the knee. It is probable that these appendages were a musical contrivance, the intestines being partly filled with small pebbles, which would cause a rattling sound with every movement of the figure. Height, 11/16ths; width, 5/16ths. (See engraving.)

## No. 314.

NTAGLIO on pale brown fard. A large fly or cicala, feen from the underfide or belly. Fine Roman work. 10/16ths by 9/16ths.

# No. 315.

NTAGLIO on nicolo. A shepherd tending his flock.
On the right, an aged, bearded man stands leaning on his staff or crook. Two sheep lying down in the foreground, and behind them a third, browsing. Roman work. 8/16ths by 7/16ths.

### No. 316.

NTAGLIO—antique green opaque glass paste. Victory driving a biga. In the front of the field of the gem is placed an altar or modius. Minute and spirited Roman work. 7/16ths by 5/16ths.

# No. 317.

NTAGLIO on red fard. Grotesque composition of three conjoined heads of animals—viz., of a bull, a ram with two ears of corn in its mouth, and a hare. Deeply-cut, early Roman work. 7/16ths by 6/16ths.

#### No. 318.

INUTE INTAGLIO. Bust of Jupiter Serapis, wearing on his head the modius or corn measure. Oriental onyx, the margin of the stone widely splayed or bevelled. Roman work. 5/16ths by 4/16ths.

### No. 319.

NTAGLIO on brown fard. Head of a youth wearing a chain or necklace. This gem evidently belongs to the class of Roman portrait intagli. There is no clue to the personage represented. 6/16ths by 4/16ths.

#### No. 320.

age unknown. This characteristic head is probably of the Augustan period; it has considerable resemblance to that of Julius Cæsar, but the emblems which usually accompany the portraits of Cæsar are wanting, and the resemblance is on the whole too uncertain to warrant a decided attribution. 9/16ths by 6/16ths.

### No. 321.

NTAGLIO on red fard. Dædalus fabricating wings for Icarus. Dædalus, represented as an aged man, is seated on a circular stool or cippus, with a table before him, supporting a large wing, which he is manipulating with a tool. Behind the figure, in the field of the gem, are the initials "C. A." (probably those of the original owner). This subject has been noted as a favourite glyptic representation; it is, however, a rare and interesting one. The gem is most probably of early Roman work. 5/16ths by 4/16ths.

# No. 322.

MALL CABOCHON INTAGLIO on plasma. In the centre of the stone is a standing figure of a Muse, leaning on a column or cippus. In one hand she holds a

mask, and in the other a wand or spear, with which she touches or points to a buckler on the ground, near her seet. Behind her, Cupid, or a winged genius, holds up an olive branch, and in front stands a nude male sigure, holding a cornucopia in one hand and in the other a patera, with which he appears to be offering a libation to the Muse. Roman work. 5/16ths by 4/16ths.

#### No. 323.

NTAGLIO on pale fard—the stone square, with the corners rounded. A female profile mask of tragic or heroic character. Greek or Greco-Roman. Of expeditious but very artistic work. 5/16ths by 4/16ths.

### No. 324.

AMEO in precious fardonyx of three layers. The Virgin and Child feated under a rich "gothic" canopy. Highly finished work, probably German or Flemish. Circa 1490. This splendid cameo is one of the few specimens extant of mediæval glyptic art. It was formerly set on the summit of the cover of the jewelled cup, No. 656 in this Collection, where it had been for at least two hundred years; originally, however, it was most likely set as a pendent jewel. The stone is the finest antique sardonyx, and probably originally had a Greek or Roman engraving, which was effaced to admit of the present representation. 1½ in. by 1. (See engraving.)

#### No. 325.

MALL ONYX CAMEO of two layers. Roman work.

Head of the young Hercules; the nose fractured.

7 by 5

### No. 326.

NTAGLIO on cornelian. Head of Omphale, clad in the nebris or lion's skin of Hercules. A beautiful gem, of fine Greco-Roman work, of the Augustan period. 1 in. by 11/16ths.

#### No. 327.

Intaglio on a deep, brown red fard. This exquisite little gem is of the very highest style of Greek glyptic art. It is undoubtedly by one of the great antique artists. The execution is finished to the utmost point of elaboration, and yet with a freedom and decision of manipulation, which is little less than miraculous. The stone is of great beauty and rarity. \(\frac{1}{2}\) in. by \(\frac{3}{2}\) in.

### No. 328.

ABOCHON INTAGLIO on fine dark brown fard. A standing draped figure leaning against a column, holding up two ears of corn in one hand, and one in the other hand hanging downwards. Doubtless the Goddess or Genius of Abundance. Fine Roman work. § in. by 5/16ths.

#### No. 329.

NTAGLIO on dark hair-brown fard. Upright oblong or square, with the corners rounded. Early Greek or Etruscan work of unusual delicacy. Hercules seated on a rock, his head leaning on his hand, the other hand resting on his club. In front, three circular objects with a ribbon or silet hanging from them, or else the stalk or branch of a tree. Around the head of the sigure, following the shape of the stone, is an inscription of six letters in ancient Greek or Etruscan characters, the import of which is not certain. It is possible that the three circular objects to the right may represent the golden apples

of the Hesperides, in which case, the subject of the gem would be Hercules reposing after he had succeeded in obtaining the coveted fruit. The stone is surrounded by the usual early striated border. \frac{1}{2} in. by 7/16ths.

# No. 330.

figure seated on an ear of corn. This truly wonderful little gem must have been engraved almost entirely with the point of the diamond; the figure, though not more than one-eighth of an inch high, is exquisitely finished and full of beauty. Gems of this extreme minuteness are of great rarity, and were evidently "tours de force" of the glyptic art. Roman period. 9/32nds by \(\frac{1}{4}\) in.

### No. 331.

AMEO in very high relief. Bust of a female holding a tragic mask in her hand. Probably the Muse Thalia. Roman work. Fine sardonyx of two layers. 78 in. by 34 in.

### No. 332.

AMEO in low relief. A half draped nymph seated on a rock. Perhaps a fragment of a larger composition, reduced to an oval shape in recent times. Sardonyx of two strata. 9/16ths by 6/16ths.

### No. 333.

NTAGLIO. Nude walking figure of Omphale, carrying the club of Hercules—the lion's skin thrown over her shoulders. Fine Roman work on red sard. 4 in. by 1 in.

#### No. 334.

NTAGLIO. Head of Æsculapius. A splendid Greco-Roman gem. Red sard.  $\frac{3}{4}$  in. by  $\frac{3}{4}$  in.

# No. 335.

NTAGLIO. The Three Graces. Roman work on ftriped fard. ‡ in. by § in.

### No. 336.

NTAGLIO. "Gryllus," composed of a full-faced portrait head of a young man, to which two other heads in profile, apparently of philosophers, are conjoined; over the head of the young man are the head and wing of an eagle, and beneath his neck, forming the bust, are a lion's and a ram's head conjoined. In the field of the gem is a lyre, the club of Hercules, and a trident, round which a serpent is twined. Roman work. Splendid brown sard. I in. by  $\frac{3}{4}$  in.

# No. 337.

NTAGLIO. Portrait head, somewhat resembling Mæcenas. A fine Roman portrait gem. Unfortunately the stone (originally a red sard?) has been spoilt by the action of fire.  $\frac{3}{4}$  in. by  $\frac{5}{8}$  in.

#### No. 338.

NTAGLIO. Vulcan feated on a chair, with a hammer in his hand; before him a pillar trophy of arms. Roman work, on a beautiful cornelian.  $\frac{3}{4}$  in. by  $\frac{5}{8}$  in.

### No. 339.

NTAGLIO. Head of Priam. Onyx or chalcidony. Fine Roman work. 11g in. by 7g in.

 $\mathcal{A}'$ 

### No. 340.

AMEO. Head of Minerva, wearing a helmet with a high plume or crest. Splendid sardonyx of two layers. This magnificent gem was found in Sicily; it is of the purest Greek work. The upper or cacholong layer of the stone has unfortunately slightly suffered from fire. Height, 1-9/16ths; width, 1\frac{1}{4} in. (See engraving.)

### No. 341.

is thrown the skin of a faun, and the hair is bound with a filet of ivy. Sardonyx of three layers. Although composed in the spirit of the antique, this cameo is most likely an Italian work of the seventeenth or eighteenth century. Height, 15 in.; width, 11 in.

### No. 342.

AMEO. A bearded male head, wearing a hood and a wreath of olive leaves. Onyx of two layers. Roman work. Height, 1-3/16ths; width, \( \frac{7}{6} \) in.

### No. 343.

AMEO. Laureated head of Augustus. A fragment. (The upper part of the stone only, containing the head; the lower part with the neck and bust broken away.) Coarse white onyx of two strata. A contemporary work of very striking character; the workmanship precise and masterly but slight, the cameo having probably never been entirely terminated. When complete, this cameo must have measured nearly 3 inches

high by 2 inches wide. Somewhat more than half of the stone only remains. Purchased in Rome in 1859.

## No. 344.

AMEO. Bacchus, a standing nude figure, embracing a draped Ariadne. This group is composed somewhat in the style of the Cupid and Pfyche of the Capitol. Roman work. Onyx of two layers—the lower one colourless and transparent. Height, 13 in.; width, 1 1/16th.

# No. 345.

A nude figure of a nymph or bacchante in an elegant walking attitude, holding in the left hand a bunch of grapes; the head upturned, flanked on each fide by a large lily or other flower growing erect on a short stem, and nearly equal in height to the figure. Onyx of two layers—the ground black and opaque, the upper layer brownish white and semi-transparent. Roman work. Height, 1½ in.; width, 1 in. (See engraving.)

## No. 346.

AMEO. Bust portrait of a Roman youth. Splendid fardonyx of two layers—the lower one fine transparent brown fard, the upper one of pure white cacholong. The head, entirely worked in the white stratum, is in very high relief. Found in Sicily. Height, 15 in.; width, 1 in. (See engraving.)

### No. 347.

ARGE CIRCULAR CAMEO. A lion's head in high relief, the margin of the stone surrounded by a raised border of egg-and-tongue moulding. This important

cameo is carved in the most precious Oriental sardonyx of three strata, and is 3\frac{3}{4} inches in diameter. It is of bold and striking Roman work, and was probably a boss or ornament of a horse trapping. Purchased in Rome in 1859.

#### No. 348.

position of five figures in high relief. Antique onyx of two strata—the lower one of transparent chalcidony. Length,  $4\frac{1}{4}$  in.; height,  $2\frac{5}{8}$  in. Both the material and the style of art displayed in this important cameo are apparently antique (of the Roman Imperial period). The subject, it is true, has seldom or never been found in ancient glyptic art, and is therefore ostensibly suggestive of a recent origin. The internal evidence of the work itself is, however, entitled to more weight than this single fact of the rarity of the subject portrayed. The cameo, in any case a work of very great value, is said to have been found in Sicily. Acquired in Genoa, in 1859, from the representatives of a Neapolitan prince then an exile. (See engraving.)

## No. 349.

RAGMENT OF A LARGE CAMEO OR BAS RELIEF in onyx. A horse's head in high relief; near it a bundle of lictors' rods, the shafts of two spears, &c. Roman work. This remarkable fragment is apparently a portion of a square tablet relievo, which, judging from the proportions of the horse, cannot have been less than a soot square, and may have been much larger. The composition of which it formed part was apparently a procession or triumph of an emperor or consul; from the arrangement of the bridle the

integre.

horse would appear to have had a rider rather than to have been yoked to a chariot. The fragment is of irregular triangular shape, its largest dimensions being 3½ in. by 3½ in., and, measured diagonally, 4½ in. The material, of one strata only, has been subjected to the action of fire, and has also apparently lain in the ground in contact with some bronze object, which has communicated a green stain to the stone.

### No. 350.

Contemporary Florentine work, identical in design, and probably by the same hand as the well known intaglio in the Collection of the Uffizj. As a cameo of most beautiful workmanship and sine material, it is a work of greater importance than the gem alluded to. Purchased in Florence in 1859. Oriental sand, ponnuelé of two bluish white layers. Height, 15 in.; width, 15 in (See engraving.)

### No. 351.

UST in full relief ("ronde boffe") of Cupid or the infant Bacchus, in semi-transparent bluish chalcidony. (From the Hertz Collection.) Height, 31 in.

### No. 352.

UST OF THE EMPRESS JULIA. The margin of the stone surrounded by a raised filet. An exquisite and most highly-finished contemporary Roman cameo. Sardonyx of three layers. (Hertz Collection.) Height, 1-1/16th; width,  $\frac{7}{8}$  in.

### No. 353.

NTAGLIO. Bust of Ariadne. A splendid engraving on Oriental onyx of two layers. This beautiful gem has unfortunately been exposed to the action of fire. Purchased in Rome in 1859. Height, 15 in.; width, 15 in.

### No. 354.

DRAPED FEMALE FIGURE carrying a bowl or patera. Perhaps the vestal virgin, Tuccia, carrying water from the Tiber in a sieve. Onyx of two layers. Height, § in.; width, § in.

# No. 355.

WO REGARDANT COMIC MASKS OF FAUNS OR SATYRS. Cameo, in onyx of two layers. Length, 1 in.; height, 9/16ths.

#### No. 356.

ULL FACED BUST OF CUPID. An exquisite Roman work. Cameo, onyx of two layers. Height, 9/16ths; width, \( \frac{1}{2} \) in.

# No. 357.

EAD OF THE YOUNG TIBERIUS. An admirable contemporary Roman work. Cameo in fardonyx of two layers. Purchased in Rome, 1859. Height, \( \frac{2}{3} \) in.; width, \( \frac{5}{3} \) in.

#### No. 358.

IANA LUCIFERA in a walking attitude, elaborately draped, with torches in her hands; the lower part of the stone wanting. Cameo, onyx of two layers. Roman work. Height, 1 in.; width, § in.

### No. 359.

EAD OF A NYMPH OR ARIADNE? Greek work in low relief, the lower part of the stone wanting. Cameo in fardonyx of two layers, found in Sicily. Height,  $\frac{3}{4}$  in.; width,  $\frac{3}{4}$  in.

#### No. 360.

EAD OF ANTINOUS. Cameo. Onyx chalcidony of two layers. Roman work. Height, 1 in.; width, 13/16ths.

#### No. 361.

YOUNG BULLOCK. Cameo. Oriental onyx pommelé of two strata, the lower one semi-opaque white, the upper one, in which the animal is sculptured, of a warm transparent yellow brown colour. Roman work. Length, 4 in.; height, 5 in.

#### No. 362.

ENTAUR carrying a young fir-tree over his shoulder, and holding in the other hand a cup or cantharos, which he is lifting to his lips. Cameo. Oriental fardonyx pommelé of two strata, the lower one transparent and colourless, the upper one opaque pure white cacholong. Roman. Length, 13/16ths; height, 11/16ths.

# No. 363.

ULL-FACED COMIC MASK. The head bald, the mouth shell-shaped. Cameo. Sardonyx of two strata. Roman. Height, & in.; width, & in.

## No. 364.

AUN SEATED. Near him a tree, on which is sufpended a Pan's pipe. Cameo, sardonyx of two layers. Roman work. The figure beautifully drawn and modelled, and vigorously executed in mezzo-relievo. Length, \( \frac{3}{4} \) in.; height, \( \frac{5}{8} \) in.

# No. 365.

UPID SEATED—his foot caught in a trap. Cameo, pale or light-coloured onyx of two layers. Roman work. Length,  $\frac{3}{4}$  in.; height,  $\frac{1}{2}$  in.

# No. 366.

INUTE CAMEO. A ram's head. Oriental fardonyx of three strata. Roman work. Length 5/16ths; height,  $\frac{1}{4}$  in.

# No. 367.

BALD-HEADED AND BEARDED COMIC MASK. Cameo, pale onyx of two layers. Height, in.; width, 3/16ths. Roman work.

### No. 368.

AMEO. A raven or other bird perched in the branches of a tree, a swan standing beneath. Cameo. Oriental sardonyx of two strata. Length,  $\frac{3}{4}$  in.; height,  $\frac{1}{2}$  in.

### No. 369.

FROM THE MOUTH OF A ROCKY CAVE. Pale onyx of two strata. Cameo. Roman work. Length, § in.; height, § in.

#### No. 370.

over the mouth of a two-handled crater or cantharos; on the right, a comic shell-shaped mask, posed on a Pan's pipe, which serves as a pedestal. Betwixt these emblems are two slutes, crossed at an acute angle. Roman work. Pale onyx of two strata. Length, 11/16ths; height, 9/16ths.

### No. 371.

UPID STANDING, holding a large bearded comic mask, An exquisitely spirited work on a small scale. Cameo in pale onyx. Height, in.; width, 5/16ths.

### No. 372.

UPID, his hands raifed towards a butterfly. The lower part of the stone wanting. Cameo. Roman work. Sardonyx of two layers. Height, 9/16ths; width, \frac{3}{2} in.

#### No. 373.

HE same subject as the preceding, the lower part of the stone also wanting. Cameo. Roman work. Sardonyx of two layers. Height, 5/16ths; width, 7/16ths.

### No. 374.

MALL CAMEO. A quail. The ground of the stone is white cacholong. The upper layer in which the bird is sculptured is reddish, mottled with white and black, the accidental markings of the stone being made available to simulate the plumage of the bird. Roman work. Diam., \(\frac{3}{8}\) in.

# No. 375.

SYREN, in a walking attitude, playing on the lyre. Cameo in onyx, the lower stratum white or slesh-coloured cacholong; the upper one orange red, and slesh colour. The human head and body of the syren are skilfully sculptured in the slesh-coloured portion of the stone, whilst the wings, legs, and the lyre are in the orange-red tint. Roman work. Height, § in.; width, 7/16ths.

### No. 376.

WO QUAILS OR PARTRIDGES AND A TREE. Cameo, onyx of two layers, the lower one opaque white cacholong; the upper, in which the birds are executed, dark hair brown. Roman. Height, 5/16ths; width, \(\frac{2}{3}\) in.

## No. 377.

ASE OR BASKET OF FRUIT. Cameo, pale fardonyx of two layers. Height, 7/16ths; width, 7/16ths.

and three zones of cuneiform. A fplendid specimen in striped sardonyx, described in the Hertz catalogue as "A man standing adoring a deity, who holds a sword; between them two men holding vases and baskets, and three lines of cursive Babylonian cuneiform; the name of the possessor and address to the deity." Length, 17 in.; diam., 9/16ths.

# No. 405 (a).

EAD OF AUGUSTUS? Cameo. Sardonyx of two strata. Height, 11 in.; width, 15/16ths. From Lord Northwick's Collection.

# No. 406 (a).

UST OF VENUS OR AMPHITRITE? The breast and shoulders elegantly draped; in the field of the gem a wand, round which is coiled a small dolphin. Cameo. Sardonyx of three strata. Height, 11/16ths; width, 5 in (From Lord Northwick's Collection.)

# No. 407 (a).

EMPEROR in high relief, probably Augustus; the neck and lower part of the gem wanting. Cameo. Onyx of two layers. Size of the fragment, height, § in.; width, § in. From the Northwick Collection.

## No. 408 (a).

ROMAN PORTRAIT HEAD OF A MAN, executed in high relief, the features having fome refem-

blance to a negro's. Cameo in onyx or nicolo. Height, § in.; width, § in. From Lord Northwick's Collection. (See engraving.)

# No. 409 (a).

CONSUL OR EMPEROR, seated on a rock, being crowned by Victory. At his feet sits a female in an attitude of grief, typical of a conquered province, and behind her stands a trophy of arms. Roman work. Cameo, pale onyx of two strata. Length, 13 in.; height, 1 in. From Lord Northwick's Collection.

#### No. 410 (a).

EATED FAUN. Oriental onyx of four strata. Intaglio Height 7 in.; width, 3 in. From Lord Northwick's Collection.

# No. 411 (a).

NTAGLIO. Hector reproving Paris in the presence of Helen. Oriental onyx of two layers, the lower one semi-transparent, the upper one dark hair brown. This fine intaglio, although in a material which, from its beauty and rarity, should be decidedly classed as antique, is nevertheless to all appearance a modern Italian work of the last century. Length, 3\frac{3}{8} in.; height, 2\frac{3}{4} in. From Lord Northwick's Collection.

#### No. 412 (a).

ARS AND VENUS AND A SATYR playing the Pan's pipes. An Italian feventeenth century work. Cameo, onyx of two layers. Height,  $\frac{7}{8}$  in.; width,  $\frac{5}{8}$  in.

# No. 413 (a).

UPID SEATED ON A COUCH, holding a large comic mask, underneath it a pedum. Cameo, onyx of two layers. Roman work. Length, § in.; height, ½ in.

#### No. 414 (a).

INUTE CAMEO. Victory driving a biga. Oriental onyx of two layers, or nicolo. Most spirited work. (From the Hertz Collection.) Length,  $\frac{3}{2}$  in.; height,  $\frac{1}{2}$  in.

# No. 415 (a).

MAN SACRIFICING A RAM AT AN ALTAR, at which stands a woman, with a mask in her hand, strewing barleycorns into the slames; behind her Silenus playing on the double flute. Cameo. Sardonyx of brown and white strata. Width, 7/16ths; height, 5/16ths. (Hertz Collection.)

## No. 416 (a).

HE DRUNKEN SILENUS LEANING ON A YOUTHFUL FAUN, whose neck he class with one arm; beneath is a flute. A splendid Roman cameo. Sardonyx of two strata. Height, 1 in.; width, 3 in. Hertz Collection. (See engraving.)

# No. 417 (a).

EAD OF HERCULES. A splendid gem on fine jacynth. Intaglio. From the Hertz Collection. Height, 1 in.; width, 3/4 in.

# No. 418 (a).

NTAGLIO. Head of Vulcan wearing the pileus; behind it, in the field, a hammer. Inscribed, ΣΟΛΟΝΟΣ ("Solonos"). Nicolo. From the Hertz Collection. Height,  $\frac{7}{8}$  in.; width, 11/16ths. There can be little doubt but that this fine gem is actually from the hand of the celebrated antique gem-engraver whose name is affixed to it.

## No. 419 (a).

EAD OF DOMITIA. A fine engraving on nicolo. Intaglio. Hertz Collection. Height, 3 in.; width, 3 in.

#### No. 420 (a).

Oriental onyx of two layers, the lower one white cacholong—the upper one, in which the head is executed, dark brown. A beautiful Greco-Roman work. From the Hertz Collection; described in the catalogue as a "Head of Cleopatra." Height, § in.; width, ½ in.

# No. 421 (a).

NTAGLIO. Standing figure of a Persian king holding a flower in one hand. Splendid Oriental onyx of three layers. Height, 13 in.; width, 3 in.

# No. 422 (a).

UPID SEATED, having the head of a bull, finging to the lyre; behind him a club, on which Pfyche, in the

form of a butterfly, is resting. Intaglio in striped sardonyx. Roman work. Height, 7/16ths; width, 5/16ths.

# No. 423 (a).

in his right hand the thunderbolt of Jupiter: in his left the cornucopia of Pluto; on his head is the modius furrounded by the rays of Helios. A Pantheistical representation. On the reverse of the stone is engraved in intaglio Dionysos (Bacchus) with the sceptre in his right hand, and an apple in his left, perhaps in allusion to the pomegranate of Proserpine. A most beautiful highly-sinished Roman gem. Sardonyx of brown and white strata. Height, § in.; width, § in. (See engraving.)

# No 424 (a).

which, besides the engraved gem, is enriched with two small cabochon garnets. The stone is a remarkable striped or fasciated cornelian. The engraving represents various emblems; in the centre is a signet-ring, within the hoop of which is a rabbit, above it a signer drawing a quadriga. On the left is a head or bust wearing a helmet; on the right a circular disc or patera, at the bottom a grasshopper, and also the initials "C. N." Roman work.

## No. 425 (a).

AMEO in nicolo. A Greek inscription, set in an antique gold ring. The inscription is—

ΕΊΥΧΙ ΕΥΣΕΒΙ " Profper Eufebius."

# No. 426 (a).

AMEO. A fragment of a large and interesting composition. The piece, probably about half of the stone, contains three figures and part of a fourth. The subject represented is the Phrygians binding the sleeping Bacchus. A highly-finished Roman work in high relief, in pale onyx of two strata. Size of the fragment: height, 1-3/16ths; width,  $\frac{7}{8}$  in. (See engraving.)

#### No. 427 (a).

EAD AND NECK OF AN ASS, with a bell tied round its neck, an ear of corn in its mouth. Intaglio, red fard. Length, 3 in.; height, 5/16ths.

#### No. 428 (a).

EAD OF AN EAGLE. Intaglio on fine banded fard.
The stone circular, and "en cabochon." Diam., 7/16ths.

# No. 429 (a).

IOMEDES AND ULYSSES mangling the body of Dolon. A fine early Greek or Etruscan intaglio in red fard, with a striated border. Height, § in.; width, 7/16ths.

## No. 430 (a).

ARRIOR kneeling on one knee (seen in front, the legs foreshortened). He has a shield on the right arm, and holds a stone, which he seems to have picked up from the ground, in the other hand. In the field of the gem is a curious mark or monogram. Greek work. Intaglio, on pale brownish yellow sard. Height, \( \frac{3}{4} \) in.; width, \( \frac{9}{16} \) ths.

## No. 431 (a).

LYSSES AND HIS DOG. In the field of the gem two palm branches. Intaglio on beautiful red fard. Greek or early Roman work. Height, § in.; width, 5/16ths.

# No. 432 (a).

RAPED FEMALE FIGURE, holding a staff or sceptre, seated on a car. On her lap is a nude male sigure, seated or reclining. Probably Ceres and Triptolemus. In front a draped semale yoked to the car. Cameo. Roman work. Pale onyx of two layers. Height, § in.; width, 9/16ths.

## No. 433 (a).

AMEO. Fragment, the upper part of a female laureated head of grand character (broken across underneath the mouth). Sardonyx of three strata. Greek work. Size of cameo when complete about 13 in. by 13 in.

# No. 434 (a).

RAGMENT OF A HEAD OR BUST OF LIVIA, full-faced, in high relief. Cameo in plasma. Fine contemporary work—the stone hollowed at the back. Size when complete about 1 g in. by 1 l in.

#### No. 435 (a).

AMEO, fragment. A female idealized head, the lower part of the stone broken away. Greek work. Onyx of two strata. Size of stone when complete, height, 1½ in.; width, 3 in.

# No. 436 (a).

RAGMENT. A male bearded head, the front part or face only, and part of the neck. Roman work. A portion of a cameo probably about 2½ in. high, by 1½ in. wide, when complete.

#### No. 437 (a).

AMEO. Fragment of a head of the young Bacchus.
Onyx of black and white strata. Height when complete,

#### No. 438 (a).

ROMAN PORTRAIT HEAD. The margin of the stone surrounded by a raised border or wreath of olive leaves. At the back of the stone is a sketch of another head. Cameo, in fine Oriental onyx of several strata. Size when complete: height, 1½ in.; width, 1 in.

#### No. 439 (a).

RAGMENT. A cow fuckling a calf. Cameo, in onyx of two strata. Length when complete, 1 in.; height, 2 in.

#### No. 440 (a).

AMEO, fragment. A lion in a walking attitude. Oriental onyx of two strata—the ground bluish opaque white cacholong; the upper layer, in which the animal is executed, brilliant orange red. When complete—length, 1 in.; height, § in.

# No. 441 (a).

AMEO, fragment. A lion in a walking attitude. The margin of the stone surrounded by a raised filet or border. Pale onyx of two layers. Length when complete, 11 in.; height, 7 in.

#### No. 442 (a).

RAGMENT. The hind part of a lion. Splendid Oriental onyx of white and black strata. This cameo, when complete, must have measured nearly 4 in. long by 3 high.

#### No. 443 (a).

ORSO OF A BACCHANTE, lightly draped. Onyx of two layers. Fragment of a cameo of about 1½ in. high by 1½ in. wide.

## No. 444 (a).

ORTION (the ægis with the Medusa's head) of a grand cameo bust of Minerva. Splendid Oriental onyx of three (?) layers. This cameo when complete probably measured 2½ in. or 3 in. high, by 2 in. or 2½ in. wide.

## No. 445 (a).

MALL FRAGMENT OF A LARGE IMPERIAL PORTRAIT CAMEO—(a portion of the hair, with laurel wreath, and two points of a rayed crown or diadem). Onyx of two strata. This cameo when intact must have been 5 or 6 in. high, and proportionately wide.

# No. 446 (a).

AMEO, fragment of a bust of Minerva (the shoulders, over which are thrown the ægis, and part of the neck only). A fragment of a superb cameo, in sine Oriental onyx of three or four strata. When complete, it must have been about 13 in. high by 15 in. wide.

#### No. 447 (a).

ROUCHING VENUS. Cameo fragment in pale onyx of two strata. When complete, about 1 in. long by  $\frac{3}{4}$  in. high. (About one-third of the stone only remains.)

# No. 448 (a).

ENUS? OR PSYCHE? in a crouching attitude. Near her an Amorino leaning on a torch. A portion of another Amorino with uplifted hands, and a branch of a tree. Cameo fragment in pale onyx of two layers. The stone, which is nearly square, would measure when complete about 1½ in. long by 1½ in. high.

### No. 449 (a).

AMEO, fragment. (About one-third only of the stone.)

A female semi-draped sigure seated on a rock. A portion of a composition of two or more sigures. Length when complete about 1 in .; height, in . Pale onyx of two strata.

## No. 450 (a).

AMEO, fragment. (About half of the stone.) A man on horseback. Pale onyx. Size when complete about 11 in. long by 1 in. high.

## No. 451 (a).

AMEO, fragment. (About one-fourth of the stone.)

A winged Eros holding a bowl full of grapes, the hand and knee of a bacchante, and the tail of a horse or centaur. A portion of a beautiful composition. The stone has been calcined and shattered by fire. When complete the gem must have been nearly circular, and about 1½ in. diam. Onyx of three strata.

#### No. 452 (a).

ELMET, AND OTHER PORTIONS OF A TROPHY? A small triangular fragment of a large cameo in onyx of two strata.

#### No. 453 (a).

AMEO, fragment. (About one-third of the stone.)

An Amorino beating cymbals, and the hand of a bacchante holding a thyrsus. Onyx of two layers. Size of the gem when intact about 1 in. long by \(\frac{3}{4}\) in. high.

# No. 454 (a).

AMEO, fragment. (About one-third of the stone.)

A seated rustic wearing a leathern vest or skin thrown over his shoulders. Onyx of two layers in high relief, and of the most exquisite and highly-finished work. Size when complete, about  $\frac{7}{8}$  in. wide by  $\frac{3}{4}$  in. high.

## No. 455 (a).

ARIS SEATED, near him Eros hovering in the air. A portion of a composition of several figures. Camed

fragment. Onyx of two layers. About  $1\frac{1}{2}$  in. high by  $1\frac{1}{2}$  in. wide, when complete.

## No. 456 (a).

The upper half of a standing draped female figure holding in her hand a sheathed sword, or the lower part of a sceptre. Onyx of two layers. Size when intact, about 1 in. high by 1 in. wide.

# No. 457 (a).

Hercules, or apparently wrestling for it. Behind them the trunk of a tree, and on the ground near, the two seet of a Hercules; the sigure itself, which was almost entirely detached from the ground of the cameo, having perished. A fragment of a magnificent cameo in onyx of two layers, almost in full relief. Size when complete about 1 in high by 1 in wide.

#### No. 458 (a).

AMEO. Head, or full-faced mask of a satyr. (About half of the stone.) This interesting fragment is executed in the so-called "Egyptian" style, the work in relief being entirely sunk down beneath the plane sield of the gem as in the Egyptian bas-relief sculptures. Onyx of two strata. Size when complete, \$\frac{2}{3}\$ in. high by \$\frac{2}{3}\$ in. wide.

## No. 459 (a).

EMALE DRAPED FIGURE, holding out a cloth or mantle, in which are two *Amorini*; the head and upper part, and the lower extremities of the figure wanting.

Exquisite Greek work in splendid Oriental sardonyx of three strata. A fragment of a cameo, probably, when intact, upwards of 2 in. high by about  $1\frac{1}{4}$  wide.

## No. 460 (a).

NTAGLIO in banded fardonyx, probably fawn from a fearabeus. A standing male figure in long robes, with a spear in his hand, standing by a goat. Etruscan work. Height, in.; width, in.

# No. 461 (a).

NTAGLIO, fragment, in red fard. A fwan. Length,

#### No. 462 (a).

fard. A portion of a composition of several figures. The upper part of a faun hounding on a panther; the hand of a bacchante, and a piece of flying drapery; also a vine tree growing erect. When intact, this gem must have been upwards of 2 in. long by about 11 in. high.

# No. 463 (a).

IRCULAR FLATTENED BEAD OR DISC in cornelian. Round the margin is sculptured in cameo relief a vine scroll, a hare running, and a frog sitting under a branch of a tree. Diam., 1 in.; thickness, § in.

# No. 464 (a).

AMEO, fragment. A portion of a grand composition.

(About one-third only of the stone.) A draped female and a nude male figure, the latter holding the reins

of a chariot, in which both are standing. Splendid Oriental sardonyx of three strata. This gem was probably fractured whilst in progress of execution, the figures being little more than sketched out in a spirited and masterly manner. The stone, like so many fine Oriental onyxes, is perforated through its entire length. The size when complete was probably about  $2\frac{1}{4}$  in. long by about  $1\frac{1}{4}$  in high.

# No. 465 (a).

AMEO. Antique glass paste of green and white strata. Cupid seated on a couch, holding up a comic mask—near him a pedum. The same composition, and probably moulded from the gem No. 413 (a) in this Collection. Length, § in.; height, § in.

## No. 466 (a).

AMEO. Antique glass paste of brown and white strata. Venus victrix? standing, her back turned towards the spectator. Cupid near her, holding up a helmet. Height,  $\frac{7}{8}$  in.; width,  $\frac{5}{8}$  in.

# No. 467 (a).

AMEO. Antique paste of blue and white strata. A female reclining on a couch, on which a nude male figure is seated, playing the double slute. Near them Cupid, dancing. Length, 1 in.; height, 3 in.

# No. 468 (a).

AMEO. Antique paste, in imitation of brown fard. Hermaphroditus seated, near him two Erotes, one playing the lyre, the other holding up a fan or heart-shaped

leaf. The lower part of the stone broken away. Length, when complete,  $1\frac{1}{4}$  in.; height, 1 in.

## No. 469 (a).

AMEO, fragment. Antique glass paste, of black and white strata. Head of Ariadne. Size when complete, about 11 in. high by 1 in. wide.

## No. 470 (a).

AMEO. Antique glass paste of green and white strata. Two standing nude female figures, one of them pouring water from a vase into a bowl-shaped bath or crater, the other drying herself with a towel after the bath. Height, § in.; width, 9/16ths.

# No. 471 (a).

tion of fine Oriental onyx of dark brown and bluish-white strata. A helmeted head of Minerva. This remarkable paste cameo, unfortunately considerably fractured, is a most deceptive imitation of a fine onyx, and was apparently executed on the wheel, like a real stone cameo. Height, 15 in.; width, 11 in.

### No. 472 (a).

AMEO. Antique light-blue opaque glass paste. Head of a nymph, crowned with a chaplet of roses. Height, 13 in.; width, 13 in.

# No. 473 (a).

AMEO, fragment. Antique glass paste of black and white strata. The upper half of a draped female figure.

of fine Greek design, apparently in a slying attitude. Size when complete, 13 in. by 1 in.

## No. 474 (a).

AMEO, fragment. An Egyptian female head. Glass paste of brown and white strata. A fragment of a Roman cameo vase, probably of the age of Hadrian.

#### No. 475 (a).

NTAGLIO. Blue antique glass paste. Venus Vitrix writing on a shield. Height, 14 in.; width, 7 in.

#### No. 476 (a).

NTAGLIO. Light green antique glass paste. Full-faced bust of a female. An idealized personage, probably Ceres. Height, \( \frac{3}{4} \) in.; width, \( \frac{5}{8} \) in.

#### No. 477 (a).

NTAGLIO. Antique paste in imitation of brown fard.

A veiled head of Ceres. Fine Greek work. Diam., § in.

#### No. 478 (a).

AMEO. Antique blue glass paste. Full-faced head of Medusa. An ornament for horse trappings. Diam., 13 in.

#### No. 479 (a).

NTAGLIO. Antique glass paste—an imitation of nicolo.

A laureated female idealized head. Height, \(\frac{3}{4}\) in.; width, \(\frac{5}{2}\) in.

# No. 480 (a).

NTAGLIO, fragment. Antique blue glass paste. A dying warrior leaning on his shield. A composition of the purest Greek period. Unfortunately much eroded and fractured. Height, 11 in.; width, 7 in.

#### No. 481 (a).

NTAGLIO. Antique glass paste, in imitation of brown fard. A Greek amphora, with the inscription, ΛΑΜΙΕΩΝ. Diam., in.

#### No. 482 (a).

NTAGLIO on a scarabeus-shaped stone. A roaring lion, surrounded by a minute striated border. Early Greek work. Chalcidony or sapphirine. Length, in.; height, 9/16ths.\* (See engraving.)

#### No. 483 (a).

NTAGLIO on a scarabeus. A charioteer driving a biga; within a striated border. Early Etruscan. Cornelian. Length,  $\frac{1}{2}$  in.; height,  $\frac{3}{2}$  in.

# No. 484 (a).

NTAGLIO on a scarabeus. A sow standing with a litter under her. Etruscan. Length, 1/2 in.; height, 2/3 in.

<sup>\*</sup> The gems described from No. 482 (a) to No. 812 (a) inclusive, were purchased at the sale of the "Hertz Collection," in 1859. The present descriptions are based on those of Dr. W. Koner, of Berlin, and of Professor Edward Gerhard, given in the "Hertz Catalogue."

# No. 485 (a).

EAD OF CYBELE. Intaglio in red jasper. Roman work. Height, § in.; width, § in.

# No. 486 (a).

UPITER SEATED ON A THRONE, with a glory of pointed rays round his head, holding a sceptre and patera in his hands; at his feet an eagle. Intaglio on sard. Height, 7/16ths; width, 3 in.

## No. 487 (a).

front of him an eagle, the outspread wings of which conceal the lower part of the figure of the god. The eagle grasps a wreath and a palm branch in his claws. Intaglio in fard. Width, 9/16 in.; height, 7/16 in.

### No. 488 (a).

ANYMEDE, holding in his hand two spears, carried off by the eagle. Intaglio, fard, § in. high; § in. wide.

## No. 489 (a).

EDA STANDING, embracing the fwan. Green antique paste, with violet and white stripes. Intaglio. Height, 11/16ths; width, 7/16ths.

#### No. 490 (a).

ANYMEDE, seated on the ground, holds a patera on his knee, from which the eagle of Jupiter is drinking. Cameo, sardonyx of three strata. A circular gem, 3 in. diam.

#### No. 491 (a).

EAD OF NEPTUNE. Cameo, violet antique paste. Width, § in.; height, 9/16ths.

## No. 492 (a).

DOLPHIN, with a raised border round the margin of the stone. Cameo, onyx of four strata. Width,  $\frac{3}{8}$  in. height,  $\frac{1}{4}$  in.

## No. 493 (a).

HIPPOCAMPUS, OR SEA HORSE. Cameo, onyx of two strata. Width, 11/16ths; height, ½ in.

## No. 494 (a).

INERVA, armed with a helmet and a shield, leading a facrificial bull. Cameo, Oriental onyx of two strata. Width,  $\frac{1}{2}$  in.; height,  $\frac{3}{8}$  in.

## No. 495 (a).

NTAGLIO on a scarabeus. A combat betwixt a lion and an Arimasp. In the very ancient Greek style; of similar work and origin to the scarabei recently found at Tharros in the island of Sardinia. (From Dr. Nott's Collection. Reproduced in the "Impronte di Monumenti Gem," Cent. 1, No. 14.) Green jasper. Width,  $\frac{5}{8}$  in.; height,  $\frac{3}{8}$  in. (See engraving.)

#### No. 496 (a).

NTAGLIO on a scarabeus. A standing warrior with a lance decorated with tenia, and leaning his right hand on a shield. Black jasper. Height, 11/16ths; width  $\frac{3}{8}$  in.

# No. 497 (a).

NTAGLIO on a scarabeus. A naked warrior, bending forward, in the act of drawing his sword from its sheath. Fine Etruscan work, with a striated border. Cornelian. Height,  $\frac{1}{2}$  in.; width,  $\frac{3}{8}$  in. (See engraving.)

#### No. 498 (a).

NTAGLIO on a scarabeus. A kneeling warrior, with a shield and lance. Etruscan work. Cornelian. Height,  $\frac{1}{2}$  in.; width,  $\frac{3}{8}$  in.

## No. 499 (a).

NTAGLIO on a scarabeus. A kneeling warrior protecting his body with a shield, and holding in his other hand a leaf-shaped sword. Etruscan work. Cornelian. Length, 7/16ths; height, 7/16ths.

# No. 500 (a).

NTAGLIO on a scarabeus. A dying warrior armed with a shield, dropping on his knees. Fine Etruscan work on a striped onyx. Height,  $\frac{1}{2}$  in.; width  $\frac{3}{8}$  in. (See engraving.)

## No. 501 (a).

LUTO SEATED ON A THRONE, with the modius on his head, and the sceptre in his hand; at his side stands Cerberus. There is the obscure circumscription EPMHΣIPN. Intaglio, red jasper. Height, § in.; width, § in. (See engraving.)

# No. 502 (a).

ERES SEATED ON A THRONE, holding a patera and a cornucopia. Intaglio, plasma. Height, 9/16ths; width,  $\frac{1}{2}$  in.

# No. 503 (a).

CEANUS, with the claws of a lobster on his head, is feated on the back of a crab. He holds in one hand a trident and in the other an oar. A beautiful Roman gem. (Reproduced in the "Impronte," &c., of the Roman Archæological Institute. Cent. 5, No. 69.) Very dark brown fard. Height, § in.; width, ½ in. (See engraving.)

#### No. 504 (a).

EAD OF NEPTUNE. Onyx of brown and white strata. Height, \( \frac{3}{2} \) in.; width, 9/16ths.

# No. 505 (a).

ONJOINED HEADS OF NEPTUNE AND THE BEARDLESS BACCHUS, accompanied by their respective symbols a trident and a thyrsus; above is an eagle, and beneath are a star and a sea-crab, with the inscription AIH. Intaglio sard. Height, 9/16ths; width, 7/16ths in.

#### No. 506 (a).

EPTUNE STANDING, with his left foot on the prow of a vessel, and holding a trident. Intaglio—brown antique paste. Height, ½ in.; width, 7/16ths.

### No. 507 (a).

EPTUNE STANDING, with his left foot on the prow of a vessel. Intaglio—yellow antique paste. Height,  $\frac{3}{2}$  in.; width,  $\frac{3}{8}$  in.

# No. 508 (a).

MPHYTRITE, borne through the waves by a fea-horfe.

A fplendid gem, on a magnificent hyacinth-coloured fard, but unfortunately broken, and a portion wanting. Intaglio. Width, 1 in.; height, \( \frac{7}{2} \) in. (See engraving.)

## No. 509 (a).

MPHYTRITE, in flowing garments, holding a dolphin in her right hand and a trident in her left, is feated on a fea-goat. Intaglio, fard, flightly blanched by fire. Height, 9/16ths; width, ½ in. (See engraving.)

# No. 510 (a).

MPHYTRITE, feated on a fea-horse, holding a shield in her right hand; in the field of the gem are the letters "T. E." Intaglio, sard. Width, ½ in.; height, ¾ in.

# No. 511 (a).

EPTUNE, offering a flower to Amymone, who is feated on a rock. Intaglio, fard. Height,  $\frac{1}{2}$  in.; width,  $\frac{3}{8}$  in. (See engraving.)

# No. 512 (a).

CAPRICORN, with the inscription "C. TALONI." Intaglio, cornelian. Width, \( \frac{8}{3} \) in.; height, \( \frac{5}{16} \) fths.

# No. 513 (a).

WINGED FULL-FACED HEAD OF MEDUSA, encircled by two dolphins, carrying two wheat-ears

laid cross-wise and a star; most delicately wrought in low relief. Cameo, onyx of three strata. Height,  $\frac{1}{2}$  in.; width,  $\frac{1}{2}$  in.

# No. 514 (a).

ENUS, feated on a rock, holding the peplos, which is falling from her shoulders. Cameo, fardonyx of two strata. Height,  $\frac{1}{2}$  in.; width,  $\frac{1}{2}$  in.

## No. 515 (a).

ENUS SEATED, chastising Cupid, who stands on her knee. Cameo—violet antique paste. Height, 9/16ths; width, 7/16ths.

## No. 516 (a).

WO KNEELING WARRIORS, apparently wounded. Cameo, fardonyx of three strata. Width, 11/16ths; height, § in.

# No. 517 (a).

UPID, seated on the ground, holding the serpents of the caduceus in his hand. Cameo. Antique paste of violet and white strata. Height, § in.; width, ½ in.

# No. 518 (a).

UPID STANDING, bound to a pillar. Cameo, fardonyx of brown and white strata. Height, 9/16ths; width, 7/16ths.

# No. 519 (a).

WO CUPIDS, in a ship with spread sail. Cameo. Fine fardonyx of three strata. Width, 7 in.; height, 4 in.

# No. 520 (a).

SQUIRREL. Intaglio—fard. Diam., ½ in.

No. 779 (a).

N EAGLE'S HEAD. Intaglio—onyx of three strata. Width, 1 in.; height, 3/16ths.

No. 780 (a).

ARROT HOLDING A BASKET IN ITS BEAK. Intaglio—fard. Width, & in.; height, 7/16ths.

## No. 781 (a).

ARROT ON A BRANCH OF LAUREL. Intaglio—onyx of three strata. Width, 1/2 in.; height, 2/3 in.

#### No. 782 (a).

WO PARROTS YOKED TO A CAR, which is driven by a smaller bird. Nicolo. Intaglio. Height, 3 in.; width, 7/16ths.

# No. 783 (a).

RAVEN PECKING AT A WHEAT-EAR; in the background is a column, and above, in the field of the gem, a caduceus. Intaglio—fard. Width,  $\frac{2}{3}$  in.; height,  $\frac{1}{4}$  in.

#### No. 784 (a).

OCK FIGHTING WITH A SERPENT. Intaglio—greenish grey antique glass paste. Height, ½ in.; width, ¾ in.

# No. 785 (a).

COCK, with outstretched wings, pursuing a lizard. Intaglio—fard. Height, 5/16ths; width, 3 in.

### No. 786 (a).

COCK, standing in front of a mirror, is about to fight with his reslected image. Intaglio—red jasper. Width,  $\frac{1}{6}$  in.; height,  $\frac{1}{2}$  in.

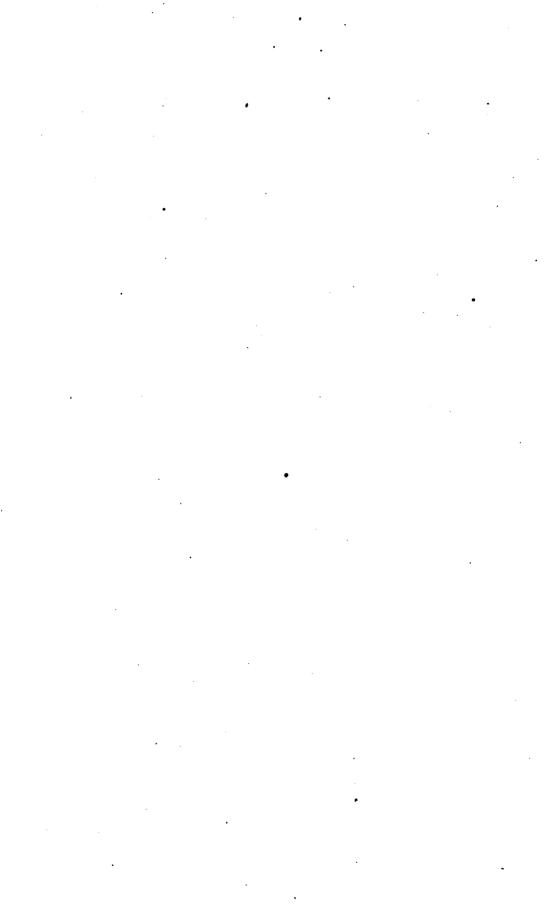

C.C. Rabin in dicext

# No. 787 (a).

OCK, holding a palm branch. Intaglio—fard. Height,  $\frac{3}{8}$  in.; width,  $\frac{1}{4}$  in.

#### No. 788 (a).

FROG. Very deeply engraved. Intaglio—on red jasper. Height, 7/16ths; width,  $\frac{3}{8}$  in.

#### No. 789 (a).

WO GRASSHOPPERS FIGHTING—one armed with a fword and shield, the other with the net and trident of a retiarius. Intaglio—fard. Diam., § in. (See engraving.)

## No. 790 (a).

OCUST on an acanthus leaf. Intaglio — fard.

## No. 791 (a).

OCUST holding a fishing-rod, from which a line, with a fish attached, is suspended. Across its shoulders is a pole or yoke, at one end of which hangs a hare, and at the other a bird. Intaglio on plasma. Height, 7/16ths; width, 3 in.

## No. 792 (a).

RYLLUS—a ram's head, the under part formed by a bearded man's face. Intaglio—fard. Diam., ½ in.

## No. 793 (a).

HIMERA OR FANTASTIC BIRD-LIKE ANIMAL. The neck and head are those of a horse; the body is formed by a male and semale mask. It is

standing on a dolphin, and on the left, in the field of the gem, is a thyrsus. Intaglio—red jasper. Height, 9/16ths; width, 7/16ths.

No. 794 (a).

portion of its body formed by a dolphin's tail, the lower part by a bearded man's face and a ram's head; behind is a cornucopia with flowers and fruit. Intaglio—fard. Height, \( \frac{1}{2} \) in.; width, \( \frac{3}{2} \) in.

### No. 795 (a).

ANTASTICAL BIRD, with the head of a horse, the body formed by a bearded man's head, and a ram's head with a bunch of grapes in its mouth; it carries a trophy. Intaglio—sard. Height, 1 in.; width, 2 in.

## No. 796 (a).

ANTASTICAL BIRD, bearing on its shoulders a cornucopia, from which issue a Capricorn and a bee; in one of its feet or paws it holds two wheat-ears. Intaglio—sard. Width, 9/16ths; height,  $\frac{3}{8}$  in.

# No. 797 (a).

ROTESQUE MONSTER OR SEA-HORSE, its tail formed by a ferpent, its body by a ram's head, with a human mask on its breast; beneath is a dolphin with two human faces. Intaglio—sard. Width, 1 in.; height, 7/16ths

## No. 798 (a).

AUTILUS OR SNAIL SHELL, from which an elephant is iffuing; in the field are the initials, "C. F." Intaglio—fard. Width, 7/16ths; height, 5/16ths.

## No. 799 (a).

IGMY FIGHTING WITH A CRANE. Height, 7/16ths; width, 1 in. fard.

### No. 800 (a).

AMEO, with a Greek inscription-

ΩΛΙΦΥΩ

ΜΗ ΠΛΑΝΩ

ΝΟΩ ΔΕ ΕΥ

ΚΑΙ ΓΕΛΩ.

(" I love not

left I go aftray;

but I observe well, and I laugh.")

Length, 1 in.; height, 3 in.

## No. 801 (a).

**NSCRIBED CAMEO-**

("Good luck to you!") ETITXI

Length, 1 in.; height, 1 in. Nicolo.

## No. 802 (a).

NTAGLIO, with the inscription-

XEPETI

("Be greeted.")

Chalcidony. Length, 1 in.; height, 3 in.

## No. 803 (a).

Clasped hands, with the inscription-AMEO. OMONOIA ("Concord!")

Onyx of two layers. Length, \(\frac{3}{2}\) in.; height, \(\frac{1}{4}\) in.

#### No. 804 (a).

AMEO. A female hand, wearing a bracelet round the wrist, holding a human ear with the thumb and the first finger. In the field is the inscription—

MNHMONETE ("Remember.")

Onyx of two layers. Length, \( \frac{1}{2} \) in.; height, \( \frac{3}{8} \) in.

## No. 805 (a).

AMEO, with a Greek inscription—

**ΕΥΦΑΜΕΙ .** ΤΩ . ΑΙΘΗΡ . . ΚΑΙ . ΓΑ . ΣΤΑΩ . ΠΟΝΤΟΣ . ΣΤΑΤΩ .  $\Delta$ ΑΗΡ

("Praifed be heaven and earth," &c.)

Onyx of two layers. Length, 13 in.; height, 3 in.

## No. 806 (a).

AMEO, with an inscription-

VENI NOLO ("Come." "I will not.")

Sardonyx of two strata. Length, 4 in.; height, 3/16ths.

(" Annya Procula cum fuis.")

**OCVLACS** 

Cornelian onyx. Length, 1 in.; height, 3/16ths.

No. 810 (a).

AMEO. Latin inscription-

SOROR ("Sifter.")

Cornelian onyx. Length, 3 in.; height, 3/16ths.

No. 811 (a).

ACET-CUT SARD, the furface blanched by fire, and cut into chequers. Set as a ring.

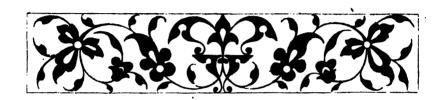

### No. 812 (a).

Bust of Alexander de Medicis, the head in plasma, laid down on a background of gold; the drapery also chiselled in gold. A beautiful contemporaneous work. Height, 11 in.; width, 1 in.

# No. 813 (a).

YLINDER, in hæmatite. Aflyrian or Persian work. A continuous frieze of figures, standing erect on a band or belt of a species of "Guilloche" ornamentation. Length, in: diam., in.

#### VIII.

#### PORTRAIT MEDALLIONS.

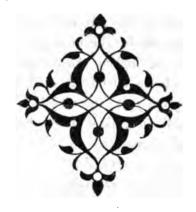

HERE are few works of mediæval art more really valuable than the Italian portrait medallions of the fifteenth and fixteenth centuries; they are for the most part the work of artists of the highest talent—painters, sculptors, or goldsmiths. Besides being intrinsically most beautiful, they also, like their antique prototypes, the medals of classical antiquity, transmit to us the most authentic portraits of the great men of the

age in which they were produced.

The antique medals were invariably struck from a die or matrix, and are consequently always of comparatively small dimensions; but in the Middle Ages the art of stamping coins was even less understood than in antiquity, and the process was confined to the small and rudely-fashioned coinage generally in use. To produce medals of the large size affected by the early Italian artists, an entirely different method was of necessity had recourse to; the renaissance medals were consequently always cast in a mould by the process called "à la cire perdue," and the impressions in bronze thus obtained were retouched, and often elaborately chased by the artists themselves.

From about 1440 till the end of the century was the great age of this art, which developed itself mainly in the northern Italian

cities—Verona, Milan, Venice, Mantua, &c. Of the artists who devoted themselves to this branch, Vittore Pisanello, a celebrated painter of Verona, is entitled to the highest rank. After him may be named, Sperandio of Mantua, Matteo de Pastis and Pomedello of Verona, Giovanni Boldu of Venice, and the painter Francia of Bologna. Original examples of these beautiful medallions have now become extremely rare, and must be distinguished from the numerous modern castings or "surmoulages," which have at various times been made from them.

#### CATALOGUE.

#### VIII. - PORTRAIT MEDALLIONS.

## No. 350 (b).

TALIAN BRONZE MEDALLION. Diam., 41 in Federigo di Montefeltro, Duke of Urbino. Obverse, bust in armour, the margin of the medallion encircled with the garter and motto, "Hony. soyt. qy. mal. y. pence." Reverse, a group of Amorini upholding a shield, on which is a spread eagle, slanked by two cornucopiæ, standing on a globe, and supporting a shield. Across the field the inscription, "Fe. Dux." Circa 1450.

## No 351 (b).

RONZE MEDALLION. Diam., 3½ in. Isotta da Rimini, wife or mistress of Sigismond Malatesta. Bust to the right, with the legend, "D. Isottae. Ariminensi. Reverse, an elephant, and the date, 1446. Probably by Matteo de Pastis. Circa 1450.

## No. 352 (b).

RONZE MEDALLION. Diam., 3\frac{7}{8} in. Filippo Maria Visconti, Duke of Milan. Bust to the right, wearing a cap or beretta, inscribed, "Philippus.

Maria. Anglus. dux. Mediolani. etcetera. Papie. Anglerie. que. comes. ac. Genue. dominus." Reverse, two knights on horseback, armed at all points, and an esquire, also on horseback. Inscribed, "Opus. Pisani. Pictoris." The work of Vittore Pisanello. Circa 1450.

## No. 353 (b).

RONZE MEDALLION. Diam., 4 in. Hercules Marescotti, of Bologna. Bust, to the right, in armour, wearing a cap or beretta. Reverse, Atlas bearing the globe on his shoulders, standing with one foot on a boat in the sea, and the other on the land. In the field of the medal the initials "S. B." Probably by Sperandio of Mantua. Circa 1450.

## No. 354 (b).

LION. Diam., 4 in. Marino Caraccioli, Marshal in the army of Ferdinand, King of Naples. Bust to the left, in armour, wearing a beretta or conical cap. Inscribed, "Marinus. Karazolus. Neapolitanus. Ferdinand. regis. exercitus. marescallus." Reverse, a man in Roman armour, with a marshal's baton, seated on the back of a lion. Inscribed, "Opus. sperandei." The work of Sperandio of Mantua.

## No. 355 (b).

RONZE MEDALLION. Diam., 2 in. Borfo, Marquis of Este. Bust, in very high relief; with the legend, "Dominus. Borsius. Marchio. Estensis." Reverse, a singular device of a sunslower, with a cockatrice or basilisk in the centre. Round the margin the signature of the artist, "Amad. Mediolan. arfex. fecit"—i. e., "The work of the gold-smith Amadeus of Milan."

## No. 356 (b).

RONZE MEDALLION. Diam., 3\frac{1}{4} in. Lionel Marquis d'Este. Bust to the left, inscribed, "Leonellus Marchio Estensis." Reverse, a cat? blindfolded (a scart tied round the eyes, with the two ends slying in the wind), seated on a cushion. Inscribed, "Qua vides ne vide." In the field the signature of the artist Nicholaus, "F." Circa 1450.

#### No. 357 (b).

RONZE MEDALLION. Diam., 21 in. Lionel Marquis d'Este. Bust to the lest, inscribed, "Leonellus Marchio Estensis." Reverse, two naked men seated on the ground; betwixt them a mast, with a sail instated with the wind. Inscribed, "Opus Pisani pictoris." The work of Pisanello.

## No. 358 (b).

RONZE MEDALLION. Diam., 24 in. Pope Pius II. (Æneas Silvius). Bust to the left, inscribed, "Enaeas Pius Senensis Papa secundus." Reverse, a pelican in her piety, with the legend, "De sanguine natos, ale suthec cordis pavi."

## No. 359 (b).

RONZE MEDALLION. Diam., 17 in. Scipio Buzakreni, of Padua. Bust to the right, inscribed, "Sipio. Buzakrenus. Pat." Reverse, a classical standing figure and legend, "Nec. do." Circa 1500.

## No. 360 (b).

RONZE MEDAL. Diam., 11 in. Count Baldwin del Monte. Bust to the left, inscribed, "Balduinus de

1.0

Monte comes." Reverse, a horseman overcoming another. Inscribed, "Magis. vict. fed. tibi." Circa 1520.

## No. 361 (b).

RONZE MEDALLION. Diam., 23 in. Ulyffes Musotti, Doctor of Laws. Bust to the left, inscribed, "Ulixes. Musotus. id. Ant. filius." Reverse, books, implements of writing, and philosophical instruments. Circa 1500.

## No. 362 (b).

RONZE MEDALLION. Diam., 2 in. Pope Julius II. Bust to the right, inscribed, "Julius Ligur. Papa. Secundus. 1506." Reverse, a pastor and his flock, with the legend, "Pedo. Servatas. ques. ad. requiem. ago."

## No. 363 (b).

RONZE MEDALLION, without reverse. Diam., 2\frac{3}{4} in. Bust portrait of a lady to the right, inscribed, "Hieronima Sacrata." 1555.

## No. 364 (b).

RONZE MEDALLION. Diam., 2\frac{2}{4} in. Francesco Sangallo, sculptor and architect. Bust portrait to the left, inscribed, "Francesco da Sangallo, scultore et architetto Fioren. 1550." Reverse, a terminal figure caressing a dog. A garland of slowers encircling the field, with the motto, "Durabo."

## No. 365 (b).

EADEN MEDALLION, without reverse. Diam., 23 in. Leonora Gonzaga, Duchess of Mantua. Bust to the left, inscribed, "Leonora Duchessa Mantua."

## No. 366 (b).

RONZE MEDALLION, without reverse. Diam.

#### No. 367 (b).

EAD MEDALLION. Diam., 3 in. Without reverse. Bust to the left of Bilibald Pirkheymer, the friend of Albert Durer. In the field the monogram of A. Durer, and date, 1514.

#### No. 368 (b).

RONZE MEDALLION. Diam., 2 in. Lavinia Fontana. Head to the left, inscribed, "Lavinia Fontana Zaphia Pictrix, 1611," and with the fignature of the medallist, "Ant. Casoni." Reverse, a female, with dishevelled hair, seated painting at an easel, with the legend, "Perte state goioso mimantene."

## No. 369 (b).

RELIEVO, carved in boxwood, enclosed within its original turned wood box or case. Profile portrait of "Ulric Ehinger," inscribed around the margin, "Ulric. Ehinger. com.cons.et.aulicus.ces.nutif. M. D. 3.3." An admirable portrait medallion of the school of Albert Durer. Probably executed at Nuremberg.

## No. 370 (b).

# ANTIQUE JEWELLERY.

NTIQUE personal ornaments in the precious metals are found almost exclusively in tombs—the dead having been frequently interred with the jewels they were in the habit of wearing during their lifetime. It should be remarked, however, that although many antique specimens of the goldsmith's art display wonderful technical skill and exquisite taste in design, it seems probable that the majority of the specimens found in tombs were manufactured at comparatively

taste in design, it seems probable that the majority of the specimens found in tombs were manufactured at comparatively little cost, expressly as funereal ornaments—being deposited in lieu of the richer and more valuable jewels worn during life; and that, therefore, the specimens preserved in collections do not adequately represent the status of the jeweller's art in antiquity. Indications sufficient, however, are perceptible in these specimens to show, that here, as in almost every other art, the Ancients attained to a degree of excellence, which the Moderns may have equalled in various ways, but not surpassed. The Etruscans appear to have been the greatest patrons of the jeweller's art; the Asiatic Greeks next in degree; whilst amongst the Romans, singer or signet rings, and a few simple types of ear pendants of female use, are almost the only articles discovered.

#### CATALOGUE.

#### IX.—ANTIQUE JEWELLERY.

#### No. 400.

Ancient Greek work? This specimen of the skill of the antique gold worker is very remarkable. It is a cord of gold, woven like a piece of modern circular braid, with minute plaited links of gold wire. It is circular, every mesh or plait of entire regularity, and so closely and compactly woven as almost to present the aspect of a solid mass; nevertheless, the chain is perfectly slexible, admitting of being tied into knots. Its diameter is rather more than one-eighth of an inch; extreme length, 12 in. At each end it is protected by a sheath or socket of gold, terminating in a loop.

#### No. 401.

IRCULAR CONVEX BUTTON, of transparent blue glass, ornamented with a spiral stripe of opaque white. In the centre, which is perforated, is affixed a small raised boss or rosette of gold, ornamented with minute granulated work, and on the opposite side a gold loop shank is still attached. Greek work. Diam., 1 in.

#### No. 402.

OLD FINGER RING. Antique Etruscan work. In front is attached an oval tablet, on which are executed "en repoussé" regardant figures of a lion in the act of springing, and a dragon or hippocampus; surrounded by a granulated border.

#### No. 403.

Greek work. It is difficult to describe this interesting and important specimen. It consists of a deep circlet or band, enriched at the back with a running scroll of ivy leaves, pierced "à jour;" in front is a square tablet containing a crouching tiger or lioness—the ground likewise perforated. On the summit of the central panel, which forms, as it were, a pedestal, is a group of two lions rampant; their heads in contact, and fore feet resting on a bell-shaped vase, which is placed betwixt them. The originality and ingenuity of the design of this piece are equalled only by the beauty of execution. The entire work is evidently chiselled out of the solid gold, and the lions are modelled in a vigorous painter-like style, which, notwithstanding the minute scale, recalls the spirited chasing of the antique bronzes. Found at Corcyra—now Corfu.

### No. 404.

MALL INTAGLIO in cornelian, the back rounded as a scarabeus, engraved with an Egyptian hawk-headed figure; set as a swivel ring with a looped seal handle. Antique Greco-Phoenician work, found at Tharros in the island of Sardinia.

#### No. 405.

in the style of a scarabeus, in green glazed earthenware. The scarabeus part formed by a couchant goat, the tront engraved with hieroglyphics. Gold swivel setting of three conjoined bands of stout gold wire, the ends terminating in a beautifully executed representation of the papyrus. The centre wire ending in the expanded flower, and each lateral one in a bud. Beneath the flower, the three bands are bound round with fine gold wire, as if tied by a string.

#### No. 406.

The stone is set in a large boss or globular bulb of thin stamped gold, and a minute ring, to which a fragment of gold chain is attached, is appended to the hoop of the ring. Roman work, of very unusual type. Found in Corfu, the ancient Corcyra.

#### No. 407.

MALL FINGER RING in massive gold, set with a minute intaglio in red sard. The engraving represents the sun surrounded with rays and a hedgehog. These devices have much resemblance to modern heraldic crests. Roman work.

#### No. 408.

GOLD EAR PENDANT. Antique Greek work.

The upper part formed by a circular shield-shaped boss, from which hangs a drop or pendant formed by six solid gold balls, soldered together, somewhat resembling a bunch of

grapes, and ornamented with fmaller knobs. This defign is in most elegant taste.

#### No. 409.

AIR OF EAR PENDANTS in thin stamped gold. Etruscan work. The circular loop is a band of thin gold, enriched with filets and two rows of circular knobs or bosses: from this ring hangs the pendant, the upper part forming a wide band or loop decorated with three parallel rows of circular bosses; beneath this is a canopus vase, or a species of amphora, crowned by a female head of marked Egyptian type.

#### No. 410.

CARABEUS IN CORNELIAN set as a swivel ring, the circlet formed by a flat thin band of gold, the stone rudely engraved with a dancing fawn, in the characteristic Etruscan style.

#### No. 411.

WIVEL RING, the gold wire circlet of an elegant granulated or plaited pattern, the stone a cameo of a lion couchant in burnt cornelian. Etruscan work.

#### No. 412.

AIR OF EAR-RINGS OR PENDANTS, in thin gold repoussé work—Greek or Etruscan; the hoop is formed by a figure of a winged Cupid. Above the head of each is a rosette set with a cabochon garnet. (Hertz Collection.)

# No. 413.

AIR OF GOLD EAR PENDANTS, the upper part a leaf or heart-shaped plate ornamented with granulated scrolls, beneath it an hexagonal cylindrical bead in blue glass, from which again hangs a pointed oval or vase-shaped ornament, Greek or Etruscan. (Hertz Collection.)

#### No. 414.

ECKLACE formed of true-love knots in gold, and large irregular rubies and emeralds, rounded or "en cabochon," perforated and strung as beads. Length, 114 in. Greek or Roman work. (Hertz Collection.)

## No. 415.

ENDENT ORNAMENT suspended from a short gold chain. The principal detail is a large cabochon garnet, set in a frame or "chaton" of gold ornamented with granulated filets; from this is suspended a vase-shaped ornament, the body formed by a garnet bead, the vase, handles, &c., in gold. (Hertz Collection.)

#### No. 416.

ECKLACE, composed of large circular beads of gold, richly ornamented with varied patterns in minute granulated work; from the centre hang three pendent ornaments. Entire length, 16 in. Greek or Etruscan.

### No. 417.

ASSIVE GOLD RING fet with an octagonal Oriental amethyst, on which is deeply engraved a full-faced bust of a female. The ring itself is twisted, or cable-shaped,

the strands increasing in size towards the *chaton* or tablet in which the stone is inserted. A very elegant and simple arrangement, admirably wrought in solid gold—probably late Roman work.

### No. 418.

markable ring has a large circular "chaton" or tablet 11/16ths in diam., the margin of which is surrounded by a beautiful moulded filet. This encloses a narrow ring or zone of dark sardonyx or glass paste, engraved with minute sigures of birds and animals, which in turn is bounded on its inner margin by another raised moulded gold filet. This again encircles a light green glass paste engraved with a head of Bacchus; the glass paste, however is exposed only in the "incavo," or engraving of the head, the field or ground of the paste being covered with a leaf or plate of gold, which is cut or perforated to the outline of the head. Purchased in Rome in 1859, having been found in the neighbourhood in the same year.

#### No. 419.

OLD EAR-RING. A plain gold wire hoop ornamented with a four-fided rofette strung on, and moving round as a swivel; in the centre on one side is set a minute emerald. Roman? work.

#### No. 420.

OLD FINGER RING, fet with an onyx cameo of two layers; representing a quail or partridge. Roman work.

## No. 421.

OLD FINGER RING, fet with a cameo head of a child in garnet; the circlet and "chaton" formed of beautiful

plaited and granulated filagree work. Greek - faid to have been found at Milo.

#### No. 422.

OLD FINGER RING—the hoop granulated or beaded, the tablet or "chaton" forming a small square or cubical tessera, on the part of which is engraved the Greek monogram of the name of Christ, the "X. P." An interesting early Christian ring, probably of the third or fourth century.

#### No. 423.

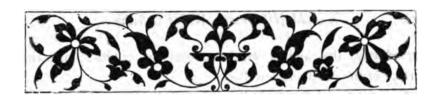

GOLD FINGER RING, inscribed in deeply engraved characters round the outer margin, "Marci. Marciani. volcasi. tegellii." This very remarkable ring was evidently intended as a seal or signet, the inscription being reversed, i.e., running from right to left. The form of the characters and other indications seem to point to the Roman Consular period.

#### No. 424.

RIANGULAR GOLD BROOCH OR FIBULA, of most minute and delicate workmanship, richly adorned with filagree work, granulated bosses, wreaths, &c., and set with three small cabochon garnets. An exquisite specimen of antique Etruscan jewellery.

#### No. 425.

BRACELET, formed by a flat filet of gold, the two ends terminating in involuted ferpents, which tie or loop together, so as to form the fastening of the bracelet. At each extremity is a ferpent's head, chiselled in a spirited and life-like style. This elegant and probably unique object is most likely of Greek origin.

#### Χ.

# MEDIÆVAL AND CINQUE-CENTO [EWELLERY.

HERE can be little doubt but that the jeweller's art attained to its utmost perfection in the fixteenth century—the age of Benvenuto Cellini. In abstract beauty of design, the finest productions of the artificers of antiquity may

perhaps have transcended all that has been since produced; but the technical resources of the goldsmith were then more limited. The art of enamelling on the precious metals, if not entirely unknown to the Greeks and Romans, was at any rate only very imperfectly practised; and thus one of the chief means of producing rich decorative effects was wanting.

The rich and showy costumes of both sexes in the Middle Ages and period of the cinque-cento, were more favourable to this art than the more simple and primitive habits of costume of the Ancients. Chains, medallions for the hat, pendent ornaments or jewels, singer rings, pomanders or scent cases, bracelets, buckles, class of sword-belts and girdles; the hilts of daggers, portable reliquaries, pectoral crosses, and a hundred other objects of luxurious adornment, were the delight of the noble and wealthy classes in times when personal display was regulated strictly according to the social rank of individuals; and

accordingly, the highest artistic talent was enlisted into the service of the goldsmith jeweller.

Costly and elaborate jewels were esteemed as veritable works of art; and Cellini, in his Life, has left us accounts of his special works in jewellery, from which it is evident that his labours in this direction were deemed by himself not inferior in value and repute to the contemporary works in high art of a Bandinelli or a Giovanni di Bologna.

From the inexhaustible variety of design and exquisite taste displayed in these precious works, it is natural that they should constitute a favourite category in the domain of vertu, and equally to be expected that fraudulent dealers should exert their perverse ingenuity in the production of modern counterfeits. There is consequently now scarcely any other class of works of ornamental art in which it is necessary to exercise more caution in collecting specimens than in that of cinque-cento jewellery.

#### CATALOGUE.

#### X.—MEDIÆVAL AND CINQUE-CENTO JEWELLERY.

#### No. 460.

OLD ENAMELLED FINGER RING, fet with a pointed diamond, the circlet enriched with strap-work ornamentation. Sixteenth century Italian? work.

OLD FINGER RING, fet with a brilliant, the loop enriched with elaborate strap-work ornament, chifelled in high relief, and picked out with white, black, and green enamel. Sixteenth century.

#### No. 462.

OLD FINGER RING, of fimilar style, set with a small table diamond, the setting elaborately chiselled, and enriched with white and black enamel. Cinque-cento.

#### No. 463.

INGER RING, set with a fine emerald, and with six small brilliants, the loop enriched with Guilloche ornament in white enamel, filled in with raised spots of turquoise. A beautiful ring, of simple yet very elegant taste, probably French. Seventeenth century work.

#### No. 464.

OURNING RING, with a scull and cross bones in relief.
White and black enamel on gold. Seventeenth century.
French or Flemish?

#### No. 465.

INGER RING, fet with a fapphire and two brilliants.

The circlet elegantly chased and enriched with white and black enamel. French? Seventeenth century.

#### No. 466.

INGER RING, fet with a fine garnet, the fetting enriched with black enamel. Sixteenth century work, of fimple yet very elegant pattern. Flemish?

#### No. 467.

ASSION RING. A gold hoop ring, fet with a square garnet, engraved with an Agnus Dei, and the circlet composed of sixteen small square garnets, engraved with various emblems of the passion. The intaglio parts silled in with white enamel. Italian. Sixteenth or seventeenth century.

#### No. 468.

VAL PENDENT RELIQUARY in filver gilt. On each fide is a reprefentation of the crucifixion, chifelled in relief, and the margin is furrounded by a bold border of twifted cable-work, and projecting boffes. Spanish. Date, fecond half of the fixteenth century.

#### No. 469.

ENDENT JEWEL in rock crystal, representing a hippocampus, or sea-horse. It is suspended by three gold chains, and is enriched with imitation harness, &c., in thin gold filagree work. Spanish? Sixteenth century.

### No. 470.

ENDENT JEWEL. This beautiful ornament confifts of a circular frame of cartouche work, enriched with cherubs' heads, highly decorated with opaque and transparent enamels. The frame is set with a plate of rock crystal. It is suspended by three chains from a loop formed by an oval shield of arms, with mantling surrounded by an electoral crown. The arms are those of Bavaria. This jewel is most likely of Augsburg work. Circa 1580.

#### No. 471.

ENDENT LOCKET JEWEL. A miniature "Calvary." Within an egg-shaped case formed of two segments of polished rock crystal, with enamelled gold rim or margin, is a representation of "Calvary," or the crucifixion of Our Saviour, with the two thieves and numerous small figures at the foot of the cross, all minutely executed in gold in full relief and enamelled. German. Sixteenth century work.

#### No. 472.

ENDENT JEWEL, representing an eagle perched on a branch, round which is twined a serpent. The body of the bird is formed by a large "perle baroque;" the head, outstretched wings, and feet of the bird, the branch and the serpent, are in gold, richly decorated with transparent enamel,

in which the beautiful ruby or "fang-de-bæuf" tint is predominant. From the front of the branch projects a rosette set with a fine ruby, and from the point of each wing, as well as the under-side of the branch, hang circular pendent pearls. The jewel is suspended by a small chain and loop. Italian cinque-cento work.

# No. 473.

ENDENT JEWEL. Probably an order of the St. Esprit. A dove with outstretched wings pendent from a long gold chain. The body, wings, and tail, are set with large triangular brilliants, and a glory of brilliants surrounds the head. From the point of each wing, and from the tail, is suspended a sine pearl; on the back of the bird, the feathers are beautifully chased and enamelled. An exquisite specimen of French sixteenth century work.

#### No. 474.

ENDENT JEWEL in enamelled gold. Within an oval frame or border of rich cartouche work, fet with pearls, is an alto-relievo of Jupiter and Juno embracing, with Cupid feated near them; on the reverse, a chasing in gold represents a horseman approaching a lady clad in rich vestments. The figures and accessories of the relievo subject, and likewise the ornamental border, are richly adorned with opaque and translucent enamels. Augsburg? work. Circa 1600. A splendid jewel, in excellent preservation.

## No. 475.

ENDENT JEWEL, forming a reliquary. On each fide is a small oval plaque of crystal, apparently painted at the back with medallion heads respectively of Our

Saviour and the Virgin. The border, or body of the jewel is of gold filagree *cloifonné* work, filled in with translucent enamels, and small pearls are attached as pendents. Spanish or Italian work. Circa 1570.

## No. 476.

gold. Probably of a Knight of Malta. The jewel is formed from a plate of gold of scolloped or quatrefoil shape, in the centre of which is a circular medallion, embossed so as to assume a convex shape on one side and a concave one on the other. The convex side is ornamented with a white cross on a blue ground, the border or margin silled in with coloured slowers painted on a ground of white enamel. The concave medallion has a minute painted subject of St. John the Baptist preaching to his disciples, and pointing to Christ, who appears in the distance advancing towards them. The border compartments similarly enriched with minute painted flowers. These designs are executed on an uniform ground of white enamel. Date, second half of the seventeenth century.

#### XI.

# ANTIQUE GREEK PAINTED VASES.

N respect of beauty of form, Ancient Greek Pottery is unrivalled. Colour there is none; and it never seems to have seriously occurred to the Ancients, that pottery could be made a vehicle for colour. It is scarcely too much to reek vase is perfectly adapted to its use, and that,

fay that every Greek vase is perfectly adapted to its use, and that, notwithstanding the absence of the adventitious charms of colour, it is as beautiful as that use will allow of.

The history of Greek art pottery is to be gleaned only from the ware itself. The beginnings of the art are lost in the depths of mythic antiquity; the earliest works, the vases often designated Greco-Phœnician, though generally found in Italy—have a decidedly Asiatic character; and it is probable that the ancient Greek colonies of Asia were the earliest seats of ceramic art properly so-called. All the specimens of the red and black Greek painted pottery are found in tombs: it having been the ancient practice to surround the corpse with vases containing libations, &c.; and perhaps in some cases to deposit in the tomb as marks of affection or respect, the sinest specimens of the potter's art, which had been the admiration of the individual when alive. Specimens of this pottery, wonderfully similar in design and technical characteristics, are found alike in Greece proper, at Athens

and Corinth, at Vulci and Chiusi in Central Italy, and in Campania in the extreme south; in Sicily, Asia, Africa, and in the Crimea even—everywhere in short where Greek civilization at any time penetrated.

Most authorities are agreed in referring the first beginnings to about A.C. 700, and the final décadence and the discontinuance of the manufacture to the second century before Christ. This term of about five hundred years, assigned as the duration of the period of production of the painted wares, is probably sufficiently near the truth, is quite sufficient to account for the extreme perfection to which this pottery had arrived, and would even seem an inordinate time, when the general uniformity of style displayed from first to last is considered.

Nothing is simpler or more obvious than the technical formative processes employed. Nineteen out of every twenty Greek vases were simply thrown on the potter's wheel, and, generally speaking, there is little difference betwixt the ancient and modern processes of production. The ancient workmen, however, were gifted with wonderful manual skill; throwing on the wheel, and the subsequent turning of the piece on the lathe, were carried to a pitch of perfection far beyond even the most laborious and commendable efforts of modern potters; the exquisitely smooth and polished surface of the red clay, indeed, seen on Greek vases, is due, not to any super-added glaze, but to the polish communicated to the surface on the lathe before the pieces were fired.

The decoration of the ware was executed exclusively by two distinct media:—First, a black vitreous enamel or true glaze; and secondly, engobes or variously-tinted clays, applied to the surface in a liquid state. The black glaze is painted on the surface of the ware in a liquid state like any other pigment, and then vitrified by the heat of the surface. It is a distinct and notable characteristic of the ware. We do not know the secret of its composition, and consequently it has never been successfully reproduced.

It is a beautiful pigment, in appearance more like a refinous varnish than a true enamel; and not the least remarkable characterstic is its extreme thinness: in this respect, it exceeds all other coverings applied to pottery, and this quality is one of very high value in an artistic point of view; inasmuch as the delicate contours and mouldings of the pieces are absolutely unchanged by the glaze, which, in almost every other pottery, alters and vitiates the forms by its thickness.

#### CATALOGUE.

#### XI.—ANTIQUE GREEK PAINTED VASES.

No. 530.

Height, 13 in.; diam.,  $5\frac{1}{4}$  in. ECYTHUS. figures on red ground. Early or archaic style. Subject, probably the combat of Hercules and Telamon with the The figures are painted round the fide or drum of the vafe, and reprefent three warriors fighting with three Amazons. The foremost warrior is engaged with an Amazon, who is apparently overcome, and is kneeling on one knee; both are in the act of hurling their spears. Behind the first warrior is another in the same attitude, and behind the fallen Amazon are two of her companions, also in the act of hurling their spears. The principal warrior has a cuirass and a large oval or Bœotian shield; the figure behind him has a helmet and a circular shield, and is apparently nude. The Amazons have helmets with lofty crests, cuirasses, scanty drapery reaching partly down the thighs, and circular shields with devices, one of which is a bended leg; the others of uncertain fignification. The faces, arms, and legs of the Amazons are coloured white by an engobe applied on the black glaze, and fome of the devices on the shields and other details have apparently been coloured red, also on or over the black glaze; but the red pigment has disappeared, leaving only a dull mark where it. was applied. The neck of the vafe is decorated with zones of

ornament of the usual patterns. The shape of this piece is in keeping with its early date; the body of the vase being much wider than that of the more recent or more characteristic Athenian lecythus. The present specimen is one of the largest of this class of vases. Its date is probably circa 500 before Christ.

# No. 531.

Height, 8½ in.; diam., 5½. Black figures on red ground. Archaic style, circa 500 A.c. The subject is on the front of the piece, and is included within a square compartment or tablet. The ground of the picture is left in red—the rest of the surface covered with the black glaze. A male figure, nude, with the exception of a drapery round the loins, class a draped semale figure round the waist; the latter appears to be struggling playfully to free herself. The face and arms of the semale are coloured white, and the hair of both sigures is bound round with a filet in red or crimson. In the background is the spreading vine. This subject, which, in spite of the archaic stiffness, is characterized by great elegance and truth of action, belongs evidently to the class of Dionysiac or Bacchanalian representations.

## No. 532.

"Early" style—circa 650 to 550 B.C. Pale drabcoloured terra-cotta, painted with a zigzag pattern in black, on the shoulder of the piece; the rest of the body of the vase surrounded with narrow, horizontal, parallel lines or zones. Height, 2\frac{3}{4} in.; diam., 2\frac{3}{4} in.

# No. 533.

ALPIS OR THREE-HANDLED WATER VASE. Circa 400 B.C. "Beautiful" Greek style. Figures in red on black ground. On the shoulder of the vase, within a compartment, is a Bacchanalian representation, consisting of two groups, of two figures each. On the right, a naked faun stands playing the double slute, and a draped semale is dancing; betwixt them is an altar or cippus. On the left, a draped bacchante, holding a thyrsus in her hand, is advancing towards a faun, who is in a grotesque dancing attitude. A most beautiful vase. Height, 11 in.; diam., 8½ in.

## No. 534.

WO-HANDLED TAZZA OR CUP—"Cylix." "Fine," or "perfect" Greek style. Circa 400 B.C. Nola ware. In the centre of the bowl is a medallion or circular compartment surrounded with a border of fret-work, and containing a figure of a beautiful youth clad in a voluminous cloak or mantle; his head encircled with a wreath, and with long pendent filets or ribbons. He is in a momentary attitude, bending forward in the endeavour to catch a hooked stick, which appears to have fallen from his grasp.

## No. 535.

Circa 400 B.C. Red figures on black ground. Found at Nola. Subject, a composition of three figures, probably a scene from a tragedy. In the centre, a draped female figure holds out a patera towards another, who, clad in a voluminous mantle or mourning robe, and with an expression of defer-

ence, advances towards her. On the other fide, a grave and majestic male figure, with a wand or staff, stands regarding the other two. On the side, under the handle, is an elegant composition of palmette ornament. The design and execution of this vase are, alike, of the highest merit, and the enamel glaze is of the dark lustrous character for which the Nola wares are so specially noted. Height, including handle, 9 in.; diam., 6 in.

## No. 536.

INE-JUG—"PROCHOUS." "Perfect" Greek style.

Nola ware. Circa 400-350 B.C. A beautiful specimen of the plain black ware, the enamel glaze being of great perfection. Height, 7 in.; width, 5 in.

## No. 537.

MPHORA. "Perfect" Greek style. Found at Nola. Circa 400 B.C. Red sigures on black ground. This beautiful vase is painted with subjects on both sides. In front, a draped semale sigure is presenting a helmet to a young warrior, who carries a large circular buckler, on which is a device of a serpent, and a lance with the point downwards. On the opposite side is a single draped sigure of a bald middle-aged man, with a crooked walking staff or stick in his hand. Height, 13½ in.; diam., 7¼ in.

## No. 538.

IMILAR VASE; also from Nola; precisely the same arrangement of the figures is seen as on the preceding specimen. The characters are, however, different. In front, a draped semale sigure, with large wings ("Nike," or Victory), is haranguing or addressing, apparently in an attitude of

expostulation, a young man clad in a simple mantle, and who with one hand points down to the ground. On the opposite side is a draped youthful sigure in a walking attitude, holding a knotted walking staff. Height, 13½ in.; width, 7 in.

These splendid vases are of the highest quality both in "technique" and design, and are in a perfect state of preservation. They were probably specially intended as sepulchral amphoræ.

## No. 539.

RAND NOLAN AMPHORA, with twifted handles. "Perfect" Greek style. Circa 400 B.C. This folendid vase is painted with a subject on each side: on the one, a youthful warrior, holding two spears in his hand, is receiving a libation from a draped female; behind her, and feparated from the group by a doric column, flands "Nike" or Victory, with a buckler, on which is a device of a chariot wheel. On the oppofite fide, a warrior wearing a helmet with ear or cheek plates, and holding a large shield, stands before a low altar, on the side of which is represented a bull's head, whilst a fire is burning on He holds in his hand a patera over the altar; whilft a draped female pours a libation into it from an anochoe. him stands another draped figure with outstretched hands. the handle and round the neck, the vafe is painted with beautiful antefixial fcroll ornaments. The lip is encircled with a bold olive wreath and a painted egg-and-tongue moulding. The figures stand on a band or zone of meander or key ornament. 22 in.; width, 111 in.

These subjects evidently represent a warrior about to depart on a journey or expedition, and have probably a sepulchral import, as an allegory of the departure of the soul on its wanderings.

## No. 540.

WER, probably an oil cruet—"Prochous." Fine Nola ware. "Perfect" Greek style. Circa 400 B.C. This beautiful specimen, in perfect preservation, is painted red on back ground, with two semale draped sigures, one of whom (probably Venus) is presenting a mirror to the other. Extreme height, 94 in.; diam., 74 in.

## No. 541.

men of the later Greek style. Circa 300 B.C. In the centre of the composition, Venus, richly attired, seated on a folding stool, holds in one hand a patera and in the other an object resembling a flower, which appears to be suspended from a double cord or silet. On the left, Cupid, nude, with splendid wings, holds in one hand a heart-shaped fan with a long handle, and with the other presents a lily to Venus. On the opposite side a nude youthful sigure or genius presents a mirror to the goddess. The opposite side of the vase, under the handle, is silled with an elaborate composition of "antesix" or honeysuckle ornament. The red sigures on black ground are copiously heightened and adorned with white and yellow. On the shoulder and neck of the piece is a zone of egg-and-tongue ornament, and a pattern of inverted rays in white. Height, 13 in.; diam., 4 in.

## No. 542.

LASK OR BOTTLE, with handle and narrow neck—
"Aryballos." Later Greek period. Circa 300 B.C.
In front, Cupid, with magnificent wings, and richly adorned with strings of pearls, is seated on a rock, holding

a heart-shaped fan. A female draped figure advances towards him, carrying in one hand a patera, apparently full of fruit, and in the other holds a tambourine, with pendent ribbons. Above, in the field, betwixt the figures, a girdle or cestus is seen suspended. Height,  $10\frac{1}{2}$  in.; diam.,  $4\frac{1}{2}$  in. Elaborate antesixial ornamentation under handle.

# No. 543.

LASK—"Aryballos." Period of the "décadence." Circa 250 B.C. A femi-nude female figure, seated in a chair, offers a patera to a bacchante, who stands before her, holding a thyrsus in one hand and a basket in the other. The semi-nude female, probably Venus, also holds a diadem of pearls in her right hand. Wave scroll and fluted ornament round neck and shoulder of the piece. Elaborate antesixial ornament under the handle. Height, 9\frac{1}{2} in.; diam., 4\frac{1}{2} in.

# No. 544.

MALL CIRCULAR DISC-SHAPED VESSEL, with loop handle and projecting fpout—"Afcos." In the fummit, a concave opening pierced with small holes to serve as a strainer. Painted with three couchant panthers. Circa 400-300 B.C. This piece may either have been an unguentarium, or vessel for perfumes, an oil pot or lamp feeder, or a lamp itself. Diam., 3\frac{3}{4} in.

## No. 545.

VIFORM AMPHORA. Period of "décadence." Circa 250? B.C. The subjects of this vase have reference to the games. On one side are three standing sigures: the centre one, a bearded man clad in a rich tunic, his head

encircled with a laurel or olive wreath, and holding in one hand the double flutes. He is conversing with a nude youthful figure, who holds up a discus or quoit. On the other side of the centre figure stands another nude youth, holding a dumb-bell in one hand, and two spears in the other. The opposite side of the vase has two semi-nude youths, apparently in conversation, one having a walking-stick or staff in his hand. Height,  $16\frac{1}{2}$  in.; width, to in. Bands of sluted and antesix ornament round the neck, and a bold olive wreath enriches the bevelled lip of the vase.

## No. 546.

WO-HANDLED VASE—"Pelice." "Late" period. Circa 300 B.C. The decoration is executed in white "engobe" colour, applied on the furface of the black glaze, which was painted entirely over the piece. In front, on the shoulder of the vase, betwixt horizontal bands of egg-and-tongue ornament and pearls, is a head or bust of Cupid, with outstretched wings, slanked by tusts of scroll foliage. The details are executed on the white ground in yellow, warm orange brown, and red. Height,  $8\frac{3}{4}$  in.; width,  $5\frac{1}{2}$  in.

## No. 547.

MALL OVIFORM VASE, without handle—"Alabaftron" or "Cymbe." "Late" period. Circa 250 B.C. Ornamentation in white "engobe" colour, on the black glaze, with zones of red, pale blue, and pale yellow. The body of this simple yet elegant piece is covered with a wide zone of reticulated lozenge pattern, above which is a wave scroll ornament. The neck is enriched with vertical flutings. Height, 6½ in.; width, 3½ in.

## No. 548.

with cover—"Thymaterion." "Late" period. Circa 250 B.c. Decoration in white "engobe" on the black glaze. The body of the vase painted in front with a female head betwixt tusts of scroll soliage; above and below it, the vase is encircled by two zones of egg-and-tongue ornament, and a running scroll pattern. The cover is enriched with a meander or fret ornament. Height, 4 in.; width, 3½ in.

## No. 549.

YRIFORM VASE, without handle—"Cymbe." "Late" period. Circa 250 B.C. Decoration in white "engobe" on the black glaze. The body of the vase in front painted with a female bust, probably Venus, flanked by elaborate scroll work; and with a zone of egg-and-tongue ornament. The neck enriched with vertical fluting. Height, 6½ in.; width, 3½ in.

## No. 550.

ASE—"Cymbe." The "pendant" of the preceding piece, and in every respect similar.

# No. 551.

WO-HANDLED CUP OR TAZZA—"Cylix."

"Late" period. Circa 250 B.c. Decoration in red

"engobe" painted on the black glaze. On the infide of
the bowl is a fwan, furrounded with a bold wreath or chaplet of
olive leaves. The under fide has also a bold olive wreath.

Height, 27 in.; diam., 7½ in.

## No. 552.

ELL-SHAPED VASE—" Cantharos"—with knotted or twisted handles; the lower part enriched with flutings in relief. "Late" period. Circa 250 B.C. Round the neck or shoulder of the piece is a wreath of ivy leaves painted in yellow "engobe." Height, 6 in.; width, 5\frac{3}{4} in.

## No. 553.

IMILAR BELL-SHAPED VASE. Around the neck, a wreath of olive leaves painted in white on the black enamel furface. Height, 6 in.; width, 6 in.

## No. 554.

MALL EWER OR CRUET—the lower part cylindrical or box-shaped. "Prochous." "Late" period. Decoration in white "engobe" on the black enamel ground. The body of the piece surrounded by a vine wreath. Height, 6½ in.; width, 3¾ in.

## No. 555.

LMOND-SHAPED CRUET OR "PROCHOUS." Fawn-coloured terra cotta ground. Painted with a bird. Height, 6½ in.; width, 2½ in.

## No. 556.

MALL UNGUENTARIUM—"Cymbe." Decoration in white and yellow on black glaze. Painted with a bird betwixt tufts of foliated ornament. Height, 4½ in.; width, 2½ in.

## No. 557.

MALL GLOBULAR BOTTLE—"Aryballos." "Late" period. White decoration on black ground. Round the shoulder is a beautiful wave scroll pattern. Height, 3½ in.; width, 2½ in.

# No. 558.

MALL LECYTHUS. "Perfect" Greek period. Painted with "antefixial" ornament. Black on a red ground. Height, 4 in.; diam.; 13 in.

# No. 559.

ROUP OF THREE SMALL VASES, with covers, united together, and with an upright loop handle in the centre. "Late" period. Painted with "antefixial" ornament. Extreme height, 5\frac{1}{4} in.; diam., 6 in.

#### XII.

#### "ART BRONZES."

ITH the Ancients, bronze was esteemed the most excellent of all vehicles for ornamental sculpture, and from the humblest utenfil to the greatest colossal statue, it was in constant use. Owing to the great durability of the material,

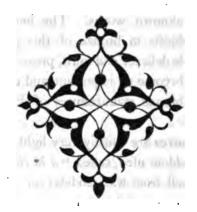

many ancient bronzes have furvived the viciflitudes of time, and, after flumbering for centuries in the ground, have been again brought to light, and fedulously preserved by collectors. fuperficial oxidation of the metal-induced by long exposure to the atmosphere or by contact with the foil, when, as is frequently the case in antique bronzes, it assumes the shape of a hard, compact, crystalline crust of very varied tints of green, blue, or redis highly esteemed, not only as the best evidence of antiquity, but also for its intrinsic beauty: this natural rusting or oxidation is called the patina of the bronze; it cannot be produced by artificial means, and although fraudulent imitations of some varieties are frequently made, it is generally very easy to detect the im-Such imitations are generally produced by the action position. of acids on the metal, aided by refinous varnishes, which are eafily foluble, and are foft or friable in texture.

Mediæval or cinque-cento bronzes were at their first manufacture usually tinted or lacquered with coloured varnishes; and, although they have very rarely acquired the natural or true patina, have still by the lapse of time, inducing gradual chemical changes in the material, assumed peculiar and very agreeable tones and qualities of surface, which are almost as difficult to imitate as the antique patina.

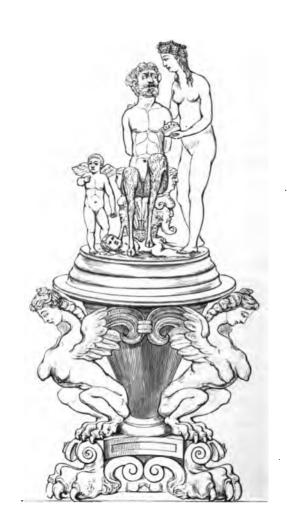

In the fifteenth, fixteenth, and feventeenth centuries, Florence was especially noted for the fabrication of art bronzes; so much so, that "Florentine bronze" has now become a generic term applied to all minor Italian works of the cinque-cente and later periods in that material. Reproductions of antiques, reduced copies from celebrated works, and original compositions on a small scale, were often executed by the most celebrated sculptors of the epoch. The Pisani, Donatello, Lorenzo Ghiberti, Verocchio, Baccio Bandinelli, Benvenuto Cellini, and Giovanni Bologna, are a few of the great artists of whom, it is possible, we thus possess many small and unknown works. The immense number and variety of minor objects in bronze of this period, often distinguished by admirable delicacy and spirit, prove that the production of such works had become an important and recognized industry, analogous to the bronze manufactures of Paris at the present day.

Cinque-cento bronzes are usually very light; being cast hollow by a process now seldom used, called "à la cire perdue"—that is to say, they were cast from wax models; or rather from models, the superficial coating of which was in wax, whilst the interior part or core was of some infusible material, such as plaster, a species of terra-cottà or stucco. After the mould, or matrix in which the bronze was to be cast, was made around the model, the wax was melted away by the application of heat, and a cavity thus left betwixt the core and the mould, into which the melted metal was poured, taking the place of the wax. The castings by this ancient process were, generally speaking, sar more perfect than those by the modern and more expeditious methods—every touch of the

modelling tool of the artist on the surface of the soft wax being reproduced in the metal with the utmost delicacy and precision—whereas at the present day the practice of sand casting produces only rough casts, which require retouching and polishing up with the chasing tool—a process seldom or never, on account of the trouble and expense, performed by the sculptor or original author of the work, but unfortunately nearly always consided to mere workmen, whose unintelligent labours too often result in the entire facrisice of the spirit and truth of detail of the original work, to the attainment of a laboured and mechanical finish, in which art has no concern.

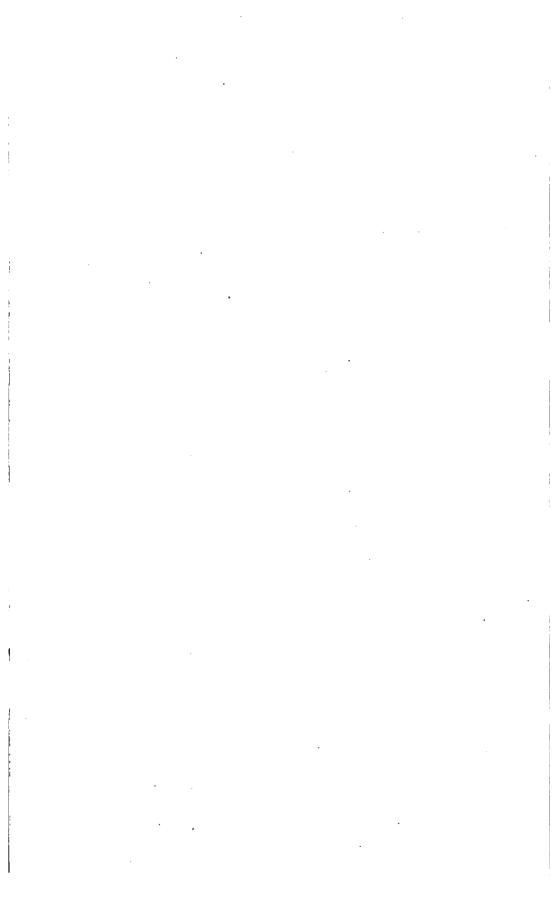

No. 600. Florentine cinque-cento Bronze Inkstand.

. 

#### CATALOGUE.

#### XIL—BRONZES:

#### No. 600.

NKSTAND, "Calamaio." Florentine cinque-cento bronze. On a triangular plinth, supported on lions' feet, are three sitting sphynxes with outstretched wings, coupled together; a circular moulded rim or margin rests on their heads and wings, within which is placed a funnel-shaped glass for ink. The cover forms a richly-moulded pedestal, on which stands a group of statuettes representing Pan or a satyr, seated, with his hands bound behind him; Venus or a nymph, standing near, offers him a basket of fruit; and Cupid, standing on the opposite side, is in the act of shooting an arrow. This splendid bronze dates about 1530. (From the Bernal Collection.) Entire height, 14 in.; height of statuettes, 6½ in. (See engraving.)

## No. 601.

NKSTAND. Florentine cinque-cento period. A statuette of Pan or a satyr, in "ronde bosse," is seated cross-legged: in one hand he holds a two-handled vase or inkstand, and in the other a cornucopia intended to hold the pen. This sine bronze is of the first half of the sixteenth century, and has a splendid colour or patina. Height of sigure, if erect, about 12 in.

#### No. 602.

ROUP. Florentine bronze. Samfon flaying a Philiftine. Date, first half of fixteenth century. Proportion of figures, about 12 in. high.

# Nos. 603 and 604.

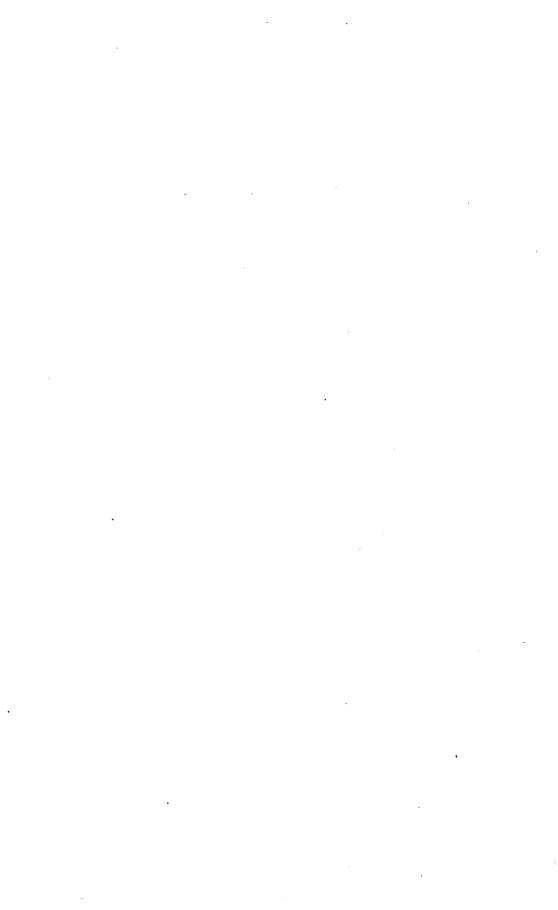

Circa 1700-20. Height, 144 in. These vases, though in general style and aspect they resemble analogous works of the early cinque-cento period, belong, nevertheless, to the eighteenth century—the details of ornament being decidedly of the Louis XIV. style. They are splendid examples of highly-sinished workmanship, the chasing being of the utmost sinish and precision, whilst the natural colour of the bronze is of a beautiful tender olive-brown tint. (See engraving.)

## No. 605.

VAL FRAME IN BRONZE. Venetian or Florentine work. Circa 1570. Height, 12 in.; width, 9 in. Formerly a frame attached to a benitier, the cup having been fawn away. The defign confifts of bold strapwork ornament, picked out in gold, with cherubs, lions' heads, pendent garlands, &c., in high relief; and the upper part is flanked by two standing angels in alto relievo; at the top is an escutcheon, with the emblem of a pelican in her piety, and the motto, "Semper ardentius." (From the Roussel Collection.)

#### No. 606.

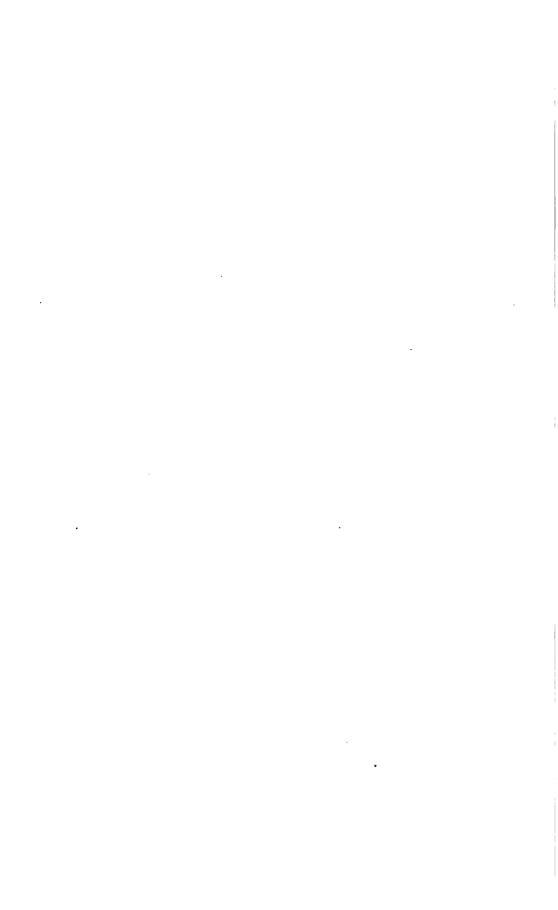

MALL ANTIQUE BRONZE BUST OF HER-CULES. Of fine Roman work of the Augustan period. The patina, unfortunately, is not well developed,

· · . . ·

No. 603. Florentine Bronze Vase, circa 1700-20.

probably from the bronze having long lain in a boggy soil, or in the bed of a stream. The square pedestal is of antique workmanship, though it did not originally belong to the bust; it is ornamented with a fret or *meander* ornament, inlaid in silver. Height, exclusive of pedestal, 3\frac{3}{2} in.

# No. 607.

MALL ANTIQUE BRONZE PORTRAIT BUST.

An exquisite miniature work in bronze, in all probability of the Augustan period, and perhaps a portrait of some member of the Imperial family. It is elaborated with all the perfection of an antique cameo, and is covered with a beautiful dark olive green patina. Height, exclusive of pedestal, 3 in.

#### No. 608.

UST OF OUR SAVIOUR. A highly-finished Florentine "cire perdue" bronze of the cinque-cento period. Purchased in Florence in 1859.

## No. 609.

TATUETTE OF A SLAVE OR PEASANT, feated, with a mantle bound round him. An Italian cinque-cento fur-moulage of an antique bronze. Purchased at Genoa, 1859. Height, 6 in.

#### No. 610.

RIANGULAR INKSTAND, the cover furmounted by a statuette of St. Paul. Florentine bronze of the quattrocento period. From the Collection of the Marchese della Gherardesca, Florence, 1859.

#### No. 611.

VAL BRONZE INKSTAND, with cover, the lower part in the shape of an antique oval bath or cistern. On the cover, a recumbent nude female figure reading from a book, surrounded with utensils emblematic of literature and the arts. An elegant Italian cinque-cento bronze. Purchased in Rome, 1859.

## No. 612.

TATUETTE OF VENUS OR PSYCHE, standing, the lower part of the figure draped. An Italian quattrocento bronze; attributed to Giacomo Francia. Purchased in Florence, 1859. Height, about 9 in.

## No. 613.

ENUS. A standing statuette; the left arm upraised, holding one end of a scarf or mantle, the other end of which is held in the right hand, and is supposed to be floating in the wind, forming an arch above the head of the sigure. A highly-sinished Florentine cinque-cento bronze. From the Collection of the Marquis della Gherardesca, Florence, 1859. Entire height about 18 in.

## No. 651.

ASKET, formed of enamel plaques mounted in gold. German or Dutch. Early eighteenth century work. This costly object is in the form of a small square cabinet, standing on four chased knob feet. The front opens with two hinged doors, disclosing six small drawers, the metal fronts of which are richly chased with various animals, amongst which, dragons, panthers, crocodiles,  $\mathfrak{C}_c$ , are conspicuous. exterior of the piece is encased with seven large, and numerous fmaller, plaques of enamel in brilliant colours on white ground. The larger plaques in front represent respectively—Venus bathing, furrounded by Amorini, intended as an allegory of water; and the companion subject, an allegorical representation of fire, impersonated by an aged figure in a red mantle, accompanied by Amorini, seated round a fire. At one end of the casket is a multifarious composition of Bacchus and Ariadne surrounded by bacchantes; and at the other, a nuptial procession, probably of Alexander and Roxana. At the back, the two plaques represent

Bacchus furrounded by Amorini, and an analogous composition The fummit of the floped cover or roof has an oblong plaque, with a subject apparently of Venus and Adonis, and the fides of the cover are ornamented with Amorini, &c.: at the angles of the piece are four small pinnacles or pedestals, enriched This casket is an important and with bouquets of flowers. probably unique example of its kind. It was brought from the island of Java, when taken from the Dutch in the early part of the present century, and is said to have been given, early in the preceding century, as a costly present to some native prince. There can be little doubt but that this is a correct account: and this beautiful object may be regarded as one of the rarest and most costly bijoux that the epoch could produce. The enamels are in the finest state of preservation, of unusual size, and high finish, and are of the kind known as the Dresden tabatière Height,  $5\frac{1}{2}$  in.; length,  $4\frac{1}{2}$  in.; width,  $3\frac{1}{2}$  in. enamels.

## No. 652.

MALL CASKET, with arched cover in filver gilt, enriched with foliated scrolls in filver appliqué filagree work, filled in with coloured enamels. Circa 1600. German work. Length, 5 in.; width, 2 in.; height, 2\frac{3}{4} in.

## No. 653.

MALL SQUARE CASKET, of similar work and period. In the interior of the lid, is a most elaborate lock in blued steel, and at the bottom an engraving of a marriage subject. Length, 27 in.; width, 2 in.; height, 18 in.

enamel on copper, with margin in ormolu. Dutch? Circa 1660. In the centre of each cover is an oval cartouche: one containing the Virgin and Child and St. John with a lamb, in a landscape; the other, the Visitation of Elizabeth. Amorini in camaieu flank the cartouches, and the rest of the cover is filled in with elaborate flower and scroll work. The ground is of white enamel, On the back are allegorical figures of Hope and Charity, within cartouches. (From the Debruge-Dumesnil Collection.) Dimensions of the cover, opened out: width, 6 in.; height,  $4\frac{2}{8}$  in.

# No. 663.

ENITIER, in rock crystal, decorated with relievi in enamelled gold, set with rubies and turquoises. Italian work. Circa 1570. The cup of the benitier, hollowed out of a block of crystal, is attached to the bottom of a

large oval plaque or tablet, likewise in crystal. The margin of this plaque is bordered with heart-shaped ornaments cut in the mass, in the centre of each of which is inserted a fine turquoise. The centre of the tablet is occupied by an appliqué relievo picture in gold, representing the rood or crucifix; our Saviour on the cross, with the Virgin and St. John. The draperies of the figures are enriched with the most vivid translucent enamels, and the cross is set with a series of precious table rubies. This splendid specimen of the goldsmith's art is probably of Florentine origin. Height, 12 in.; width,  $6\frac{1}{4}$  in. (See engraving.)

# No. 664.

SASE OR FRAME FOR A MINIATURE, in enamelled gold, the front formed by a plaque of rock crystal, the back perforated in open work; the design is an elaborate interlaced cypher standing on two palm branches, and furmounted by a ducal coronet; a plain narrow border The work is in gold, enamelled white, and furrounds it. touched with black. On the band of the coronet, above the cypher, is inscribed, "Ces noms inseparables;" and on the border the following verse: "Ce chiffr' entrelasse faict moins voir de meslange que ne fait les réplis de nos cœurs bien unis, n'y l'envie du temps jamais par un eschange ne pourra pas troubler l'amour de The edge or margin is ma Philis." French. Circa 1670. furrounded by a twifted cord, also enamelled white and black. 23 by 21.

#### No. 665.

VAL GOLD SNUFF-BOX, the furface arranged in panels of "vernis" in imitation of lapis lazuli; on the lid is an enamel miniature of Louis XIV., by Petitot, or of his school The gold mounts are chased in the highest style

of early eighteenth century art; the ornamentation, in varicoloured gold, confifts of rocco scroll and cartouche work,
Amorini, bouquets of flowers, garlands, &c. This splendid box
is probably one of the most sumptuous and tasteful works of its
kind ever executed. Length,  $3\frac{1}{2}$  in.; width,  $1\frac{3}{4}$  in.; depth,  $1\frac{1}{2}$  in.

#### No. 666.

BLONG GOLD SNUFF-BOX, inlaid with panels of lapis lazuli. In the lid is an enamel miniature of a lady, by Petitot, the margins of the box fet with feed pearls. A splendid tabatière of the Louis XIV. period. Length,  $2\frac{1}{8}$  in.; width,  $1\frac{3}{8}$  in.; depth,  $1\frac{1}{8}$  in.

# No. 667.

# No. 672.

IRCULAR SNUFF-BOX in Dresden porcelain, mounted in gold, the exterior painted with hawking subjects; in the interior of the lid a highly-finished miniature of a lady in the character of Flora. Circa 1740. Diam., 2\frac{3}{2} in.

# No. 673.

VAL SNUFF-BOX in Dresden porcelain, the exterior painted with *Amorini*; on the under side of the lid a miniature of a lady reclining on a couch. The mountings in gold richly chased.

# No. 674.

MALL CASKET, formed of flabs of agate or jasper, mounted in silver gilt. German work. Circa 1560—1600. Length, 3½ in.; width, 2¾ in.; height, 2½ in. This casket, like the others of analogous design in this Collection,

was doubtless intended as a wedding present, and it is not unlikely that it may have been intended to contain the ring. The design is very chaste and simple, and the workmanship of unusual solidity and sinish.

## No. 675.

ARVED COCOA-NUT DRINKING CUP, mounted in filver. This quaint piece is mounted as a species of rhyton; the stem or handle is formed by a bull's head. The silver margin of the cup and the vertical bands connecting it with the stem are engraved with elegant arabesque ornaments. The relievo subjects carved on the surface of the nut are three in number—two of them represent the history of Lot and his daughters; and the third, Bacchus with attendant satyrs. German work. Circa 1550.

### No. 676.

OLD ENAMELLED WATCH. French work. Circa 1640-50. Diam., 21 in. The entire exterior of the case is covered with painted subjects. On the circular lid in front is a medallion picture of the Virgin and Child, with St. Elizabeth and Joseph, after Rubens; and the corresponding miniature on the opposite side of the case is the Virgin and Child, after Mignard. The margin or circular edge of the watch is painted with a continuous band or frieze, in which the Massacre of the Innocents, the Flight into Egypt, and the "riposo," are also given. The inner sides of the case contain respectively portraits of Louis XIII. and of Cardinal Richelieu, painted in the highest style of miniature art. This magnificent watch is certainly one of the very finest old French enamelled watches in existence, and must have been made for some great personage

of the Court. Although the enamel colours are less deep and lustrous than those of the fine time of Petitot, the execution and design of the subjects are quite up to the level of this great artist.

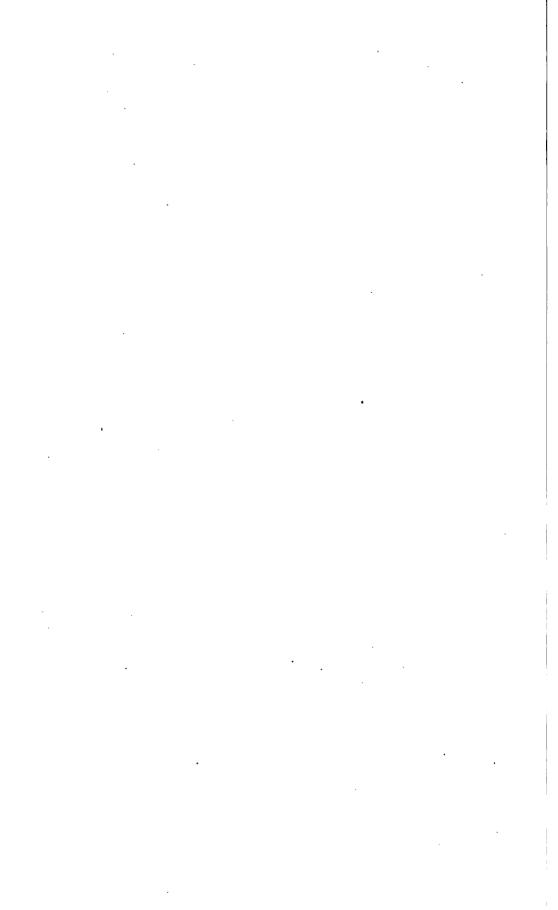

## No. 677.

height, 16½ in.; width across the base, 10½ in. This splendid specimen is of the usual form—namely, an oblong upright time-piece, with semi-detached angle columns, and wide moulded base, resting on four grotesque feet. At the summit is a cornice, above which are two heights of perforated galleries, the lower one representing an open arcade; the roof or cover is domical or ogee-shaped, and crowned by an obelisk. The clock has in all eight separate dials, and is profusely ornamented with arabesque ornamentation and allegorical sigures, chased or engraved with the burin.

## No. 678.

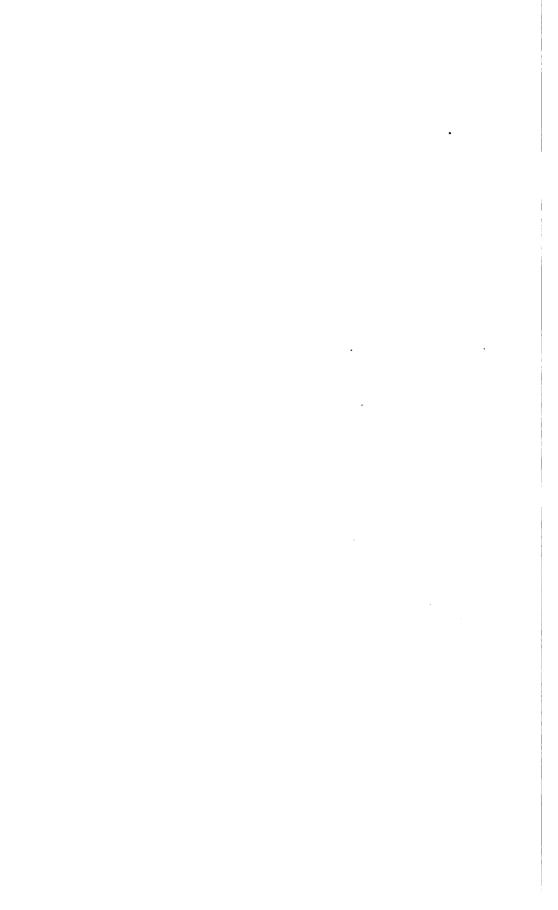

ENTRE PIECE, SALT-CELLAR, OR "DRA-GEOIR," in gilt bronze and filver. Italian, probably Venetian, work. Circa 1570. Height, 14\frac{3}{2} in. On an elaborate triangular base of strap-work ornamentation, dolphins with interlaced tails, syrens, &c., are posed three marine horses, with tails ending in rich foliage; these surround a central stem or column of open work, and on the summit rest three shell-shaped bowls in silver, with silver dolphins in the angles; the summit of the piece is crowned by a statuette of Neptune with his trident. The piece is very richly gilt, and the chasing is in the highest degree vigorous and artistic. (See engraving.)

. 

No. 678. Salt-cellar in Gilt Bronze and Silver. Italian work, circa 1570.

## No. 679.

work of the ground, a chequered mosaic or marqueterie, of striped or ribbon agate and fardonyx, appliqué on a ground of transparent agate, out of which the box itself is hollowed. On the lid is a small oval medallion in white Dresden porcelain, exquisitely painted with a bouquet of slowers in colours; this medallion is surrounded by a gold border inlaid with forget-me-nots, in turquoises, with leaves of green jasper, and tied with a ribbon of red sard. The margins of the box are bound round with gold silets. An exquisite specimen of German lapidaries' work of the second half of the eighteenth century.

#### No. 680.

OLD SNUFF-BOX, of "shaped" or irregular form, chased, with rococo architectural ornamentation. A splendid specimen of French gold chasing. Circa 1720.

#### No. 681.

LD FRENCH GOLD ENAMELLED WATCH. Circa 1670. The back of the cover painted with the triumph of Galatea, or tritons and a fea-nymph, with *Amorini*, failing in a car drawn by dolphins.

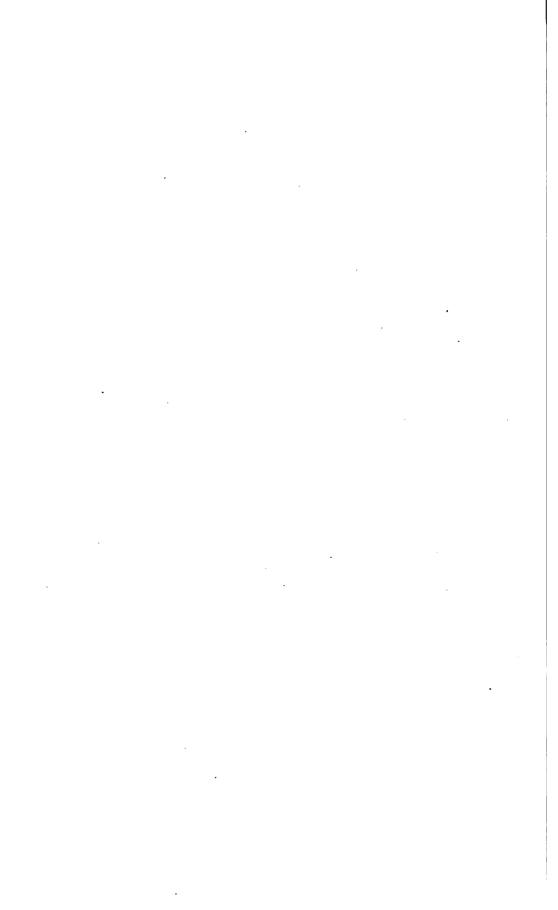

#### No. 682.

NUFF-BOX in black shell, with an oval enamelled miniature on gold, let into the lid. Portrait of a lady in costume of circa 1670, by Petitot.

No. 684. Silver Gilt Dish or Bowl, with centre medallion in translucent enamel. Flemish or German work, circa 1380.

raised to the lips. She is habited in a pale green tunic, and yellow robe or skirt, opened on the thigh, and fastened by a sibula. The figure is detached, on a blue background. This beautiful figure, in almost perfect preservation, and retaining much of its original freshness of tint, probably formed part of a system of grotesque decoration of a room, the extremity of a scroll or volute being visible near the left foot. The fragment of stucco itself is of irregular shape, as it was broken off from the wall. From the sine style displayed, it is presumable that it is of the early Imperial epoch. Purchased in Rome, 1859.

#### No. 686.

NTIQUE ROMAN MOSAIC, representing a mackarel.

Length of the slab, 9 in.; height, 4 in. This most truthful and lifelike representation is effected by minute tesser of coloured glass pastes; the background composed of tesser on a somewhat larger scale, apparently in white marble. It is doubtless of the Roman Imperial age.

### No. 687:

IMILAR MOSAIC, representing a red mullet. Length of the slab, 8 in.; height, 31 in.

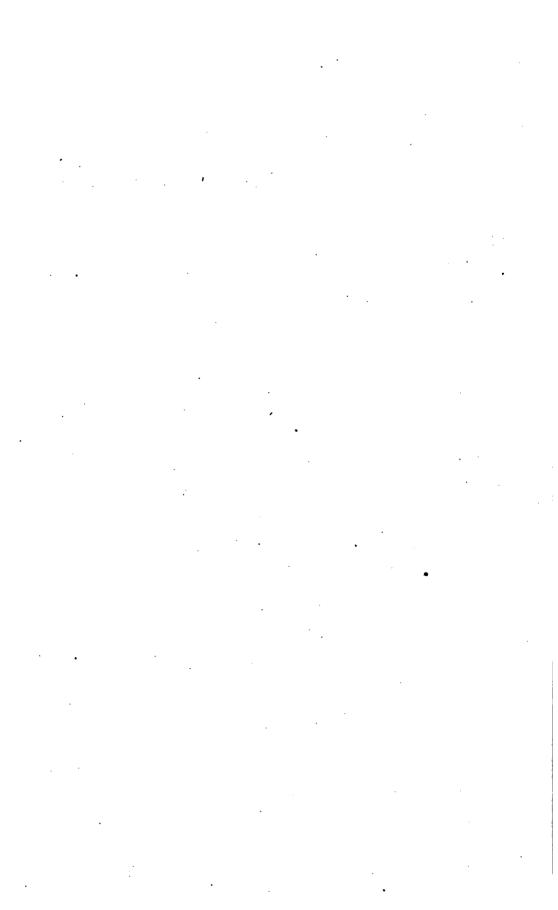

#### No. 688.

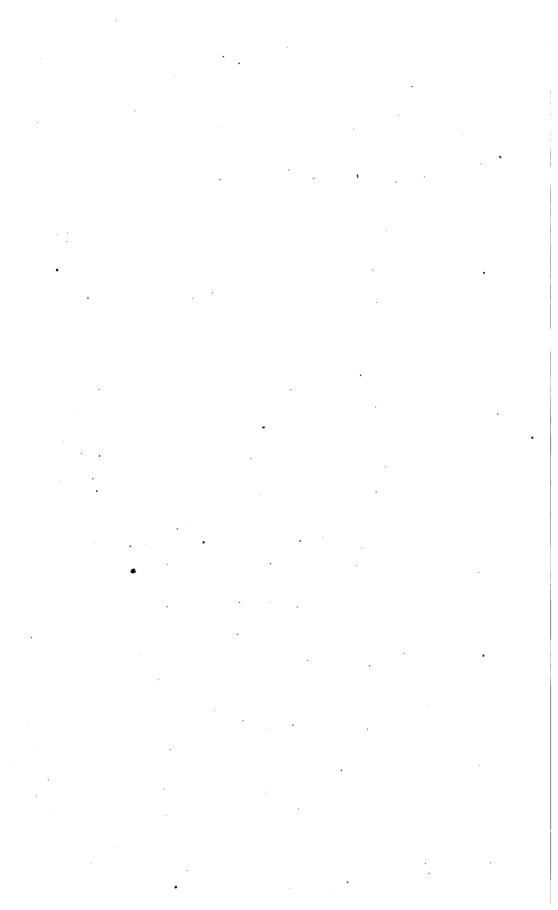

ONSTRANCE OR CIBORIUM for the custody of the Host, in copper gilt, enriched with champlevé enamels. Italian (probably Florentine) work, circa 1350. The general form of this splendid specimen of mediæval goldsmith's work is that of an octagonal turret of two stories, surmounted by a conical spire, and supported on a tall stem, with a knob in the centre. The entire design is of an architectural character, the various details being miniature reductions in metal of similar ones

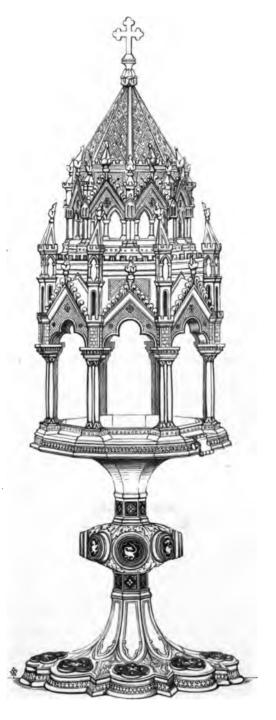

in stone or marble displayed in the Italian Gothic churches of the period. Proceeding from the foot or base upwards, the latter is enriched with eight quatrefoil-shaped plaques of champlevé opaque enamel, rapportés or foldered on to the body of the foot, which is also octagonal in plan. The enamels, which are of highly finished workmanship and in perfect preservation, contain grotesque animals, birds, and rosettes: the designs or figures are in the gilt metal on blue, red, and green enamel grounds. metal spaces of the base are engraved with arcaded panels and The knop is likewise set with eight small floriated fcrolls. circular enamel plaques, also containing grotefque animals. lower story of the body of the ciborium is formed by open arcades, furmounted by trefoil cusped arches and triangular canopies with finials and recurved crockets. The piers or supports of these arcades are flender coupled columns, which support square openwork piers of three heights of arcades, terminated in battlemented square pinnacles; the upper story, diminished in height and diameter, is of fimilar defign to the lower one, the arcades only affuming the form of mullioned windows. Both stages are crowned with moulded and battlemented parapets. roof or spire is richly ornamented with an engraved lozenge diaper, and terminates in a finial fupporting a cross. glass or crystal lining of this beautiful monstrance is alone wanting; in every other respect it is perfectly intact, and in a marvellous state of preservation. Purchased at Prato 1859, in which city or the neighbourhood it had undoubtedly always remained. Entire height, 151 in. (See engraving.)

# No. 689.

YLINDRICAL BOX, with cover, in bronze, sufpended from a ring by chains. An antique Greek or Roman pyxis or toilet-box. The lid, sides, and

No. 688. Monstrance or Ciborium in Gilt Metal, enriched with Champlevé enamels.

Florentine work, circa 1350

bottom are ornamented with elegant turned mouldings, and the arrangement of the suspending chains, to which the loose lid and the box itself are both attached, is very ingenious. (From the Rogers Collection.) Diam. of box,  $3\frac{5}{8}$  in.; height of ditto,  $3\frac{5}{8}$  in.

# Nos. 690, 691, and 692.

No. 702. Tankard in Carved Ivory. Dutch or Flemith work, circa 1670.

### No. 702.

ANKARD in carved ivory, mounted in filver gilt. Dutch or Flemish. Date about 1670. Height, 51 in.: diam, across base, 41 in. The composition carved in Around the drum of the tankard is a bacchanalian high relief. scene of recumbent nymphs and fauns, with Amorini; one of the latter holds up an oval tablet, on which is sculptured in bas-relief, on a minute scale, the bust portrait of a gentleman in costume of the period of the work, probably a portrait of the artist himself. The filver-gilt mouldings are perfectly plain, but in excellent tafte. and are coeval with the carving. This beautiful work is by one of the greatest of the Italo-Flemish ivory sculptors of the school of François du Quesnoy, called "Il fiammingo." The perfect drawing and modelling of the figure, noticeable especially in the extremities, raifes it quite to the level of the high art sculpture of its epoch. (See engraving.)

# No. 703.

ferted into the cover of a book. German work of the tenth or eleventh century. Height,  $5\frac{1}{2}$  in.; width,  $3\frac{1}{2}$  in. The costly manuscripts of the early periods of the middle ages were bound in the most sumptuous manner; and it was a constant habit to employ tablets of sculptured ivory for this purpose. They were usually let into the centre of the covers, and surrounded with a border of silver-gilt silagree work, interspersed with small plaques of Cloisonné enamel, glass pastes, and real gems, antique cameos, &c. The present tablet has been, doubtless, so framed. The usage in general may be traced back to the Roman diptychs, which were two plaques of sculptured ivory, hinged like a book. The subject here represented is

Daniel in the lions' den, a not uncommon representation at this early period, being understood as a type of Christ's descent into In the present instance, Daniel is seen in the centre, his head furrounded by a nimbus, feated in the midst of feven lions within a fquare space or den, above which, in the background, are conventionalized reprefentations of stately buildings, intended as the king's palace. On the right a figure in long drapery is being let down into the den by a flying angel, who suspends it by the hair of the head. This figure holds in its lap feveral loaves of bread (the action here represented is evidently a curious interpretation of Dan. vi. 22, "And God fent his angel and shut the lions' mouths," &c.). On the opposite side stands the King wearing a royal tunic and crown, holding in one hand a fceptre, with the other raifed as if in astonishment; behind him is an attendant bearing his fword. The composition is surrounded by a narrow border of leaf moulding.

# No. 704.

ROUP OF FIVE FIGURES, statuettes in full relief, standing on a common ground or plinth. Carved in box-wood. German work, circa 1540-50. Length of the plinth, 2 ft.; height of the figures, 9 in. The subject of this group is somewhat obscure; apparently, it represents a King abdicating his crown in favour of one of his sons to the prejudice of another. The figures are habited in the German costume of the period of the work, though in some respects slightly idealized in the direction of the antique. It is not impossible that the subject represented is the abdication of the Emperor Diocletian, and may have been suggested to the artist by the recent abdication of the Emperor Charles V.

# No. 705.

RAME in carved wood. Flemish work. Circa 1670-1700. This admirable work was probably originally a mirror frame. It is now adapted as a case for miniatures.

## No. 706.

YLINDRICAL BOX, the fides and cover perforated with a Moresco geometrical pattern. Around the side of the lid, and near the bottom of the box, are two bands of Arabic inscriptions in relief, the ground spaces filled in with a black mastic. Arabic or Egyptian, probably made at Cairo in the sisteenth or sixteenth century. Height, 3½ in.; diam., 4 in. (From the Collection of the Marchese della Gherardesca, of Florence, 1859.)

### No. 707.

VAL BOWL OR TAZZA, in variegated marble. Italian work, first half of sixteenth century. The margin of the tazza is fringed with a beautiful design of strapwork, with involuted serpents and a *Mascherone* carved in full relief, perforated "à jour." Length, 8 in.; width,  $7\frac{1}{2}$  in.; height,  $3\frac{1}{2}$  in. (From the Marchese della Gherardesca's Collection, Florence, 1859.)

#### No. 708.

#### PORCELAIN WARES.

ORCELAIN is a substance intermediate betwixt common pottery, or *terra-cotta*, and glass: it is semi-transparent, and of a brilliant white colour, and the glaze or covering is a transparent colourless glass, thinly spread over its surface.

It is a much more perfect fubstance than any other ceramic product, and, both in composition and manipulation, demands greater In the words of an eminent French chemist, it is scientific skill. effentially composed of two distinct parts or elements: the one fusible, which gives to it the transparency by which it is distinguished; and the other infusible, giving it the power to support, without fostening or losing its shape, the high temperature necesfary to transform the fusible element into a glass. main varieties: the one called the hard body or "Pâte dure;" the other, the foft body or "Pâte tendre." The former of these is usually composed of natural minerals; the latter, on the contrary, is an artificial chemical compound. These varieties are hard and foft respectively, in two senses:-first, in being able to refift a high temperature or the contrary; and, fecondly, in admitting of being scratched by the point of a knife, or in resisting it, as the case may be. The hard porcelain is of the most ancient The Chinese and Japanese, the German porcelains generally, and the modern French, are of this variety; whilst the old French, especially the famous old Sèvres porcelain, and all the English porcelains, are of the latter kind.

The invention of porcelain is unquestionably due to the Chinese, and, on the authority of this people themselves, must be referred at least as far back as the first century before Christ. It was not till comparatively modern times that Europe followed in the wake of the Chinese, and for a long time the ambition of European potters was confined to a humble imitation of the Oriental products. Many specimens of Chinese porcelain, however, found their way to the civilized countries of the west during the Middle Ages even, but it is probable that the Portuguese, in the early part of the sixteenth century, first imported it in any quantity. In the succeeding century, the Dutch made a regular article of traffic of porcelain, and, confequent on its speedy general use by the wealthier classes, attempts were made on all hands to manufacture it. It has been recently ascertained that a prince of the Medici dynasty, Duke Francesco I., towards the year 1590, succeeded in fabricating a species of true porcelain of the soft or artificial variety, at Florence. This was probably the earliest successful attempt made in Europe. Several pieces of this fo-called "Medici porcelain" are still extant. It was not, however, till towards the close of the seventeenth century, and in particular at St. Cloud, near Paris, that porcelain of the Soft variety was fuccessfully manufactured in Europe as a commercial product. As respects the Hard variety, it is certain that its composition was discovered at Meissen, near Dresden, by an alchemist named Böttcher, in the service of the then Elector of Saxony, betwixt the years 1709-1715.

#### No. 745.

AIL-SHAPED CUP AND COVER, without faucer. Dresden porcelain. Period of Marcolini. White ground, painted with figure subjects—wreaths and festoons of minute flowers, &c., and with a cypher and royal crown in gold; round one of the vignette subjects is the motto, "Le cœur pour vous, Les yeux pour tous."

## No. 746.

porcelain, with flowers in low relief; the flowers filled in with a minute appliqué mosaic of black lacquer, mother-of-pearl, and gold piqué work. A rare and curious instance of the combination of lacquered work, mosaic, &c., with porcelain, probably suggested by some Japanese examples, and by analogous decorative processes in use with the "tabatière" artists of the beginning of the eighteenth century.

# No. 747.

OFFEE CUP AND SAUCER, old Vienna porcelain, grounded infide and out with burnished gold, with decoration of wreaths of flowers and festoons of green convolvulus leaves, painted in colours in reserved spaces. A fine and costly specimen of the Vienna fabrique, which is noted for the richness and beauty of the gilding.

# No. 748.

WO-HANDLED CUP AND COVER, with oval faucer-stand. Old Dresden white porcelain, decorated with garlands of appliqué flowers in full relief. The interior of the cup grounded with burnished gold. A beautiful specimen of the old Dresden raised flower work of early period. First half of eighteenth century.

# No. 749.

White ground, with painted vignette subjects of Nymphs and Cupid bathing, &c.; gilding and coloured roses and forget-me-nots round the borders. A cypher and imperial crown on the cover. Dresden porcelain.

### No. 750.

lain. Lavender-coloured ground, with referved oval compartments in white, filled in with groups of flowers. Rich gilding. Reverse: mark of the fabrique, but without date or fignature.

# No. 751.

TATUETTE OF A WINGED SYREN, riding on a dolphin, and upholding a scallop shell—probably intended as a falt-cellar. Porcelain, picked out in colours. Old Capo di Monte ware. Period, middle of the eighteenth century.

# No. 752.

UP AND SAUCER. Old Capo di Monte porcelain, decorated with coloured *relievi* of Tritons and fea-nymphs, and garlands of flowers.

## Nos. 753 and 754.

AIR OF ORIENTAL PORCELAIN BOTTLES—Old Chinese or Japanese. White ground, painted with groups of coloured flowers. Mounted in ormolu as ewers. The mounts, French, of the period of Louis XV. Height, 12½ in.

# No. 755.

Brownish crackle; painted with a tree or flowering shrub in blue, up the stem of which an ape is climbing, and with various small figures of animals, birds, insects, &c. Mounted in ormolu (marginal bands and cover only); the mounts old French. Circa 1690. This piece is doubtless of great antiquity. Height, 14 in.

# No. 756.

ARGE WHITE CRACKLE PORCELAIN VASE.

Old Chinese. The ground of this vase is covered with large cracks; it is, in addition, ornamented with large

circular medallions of grotesque dragons and foliage work in blue; and it should be noticed that the cracks do not extend over these medallions. The vase has two lions' heads, with rings hanging from their mouths, arranged as handles; these, and the lip or margin of the piece, are enamelled in imitation of bronze. Height, exclusive of the carved wood stand, 17 in.

# No. 757.

HINESE PORCELAIN VASE, white ground, with arabefque and diaper decoration in blue. An ancient and very elegant specimen, with an hexagonal carved rosewood stand. Height, 10 in.

# No. 758.

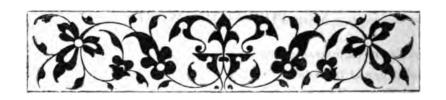

ARGE OBLONG PLAQUE. Old blue and white cameo Wedgwood ware. A classical subject, apparently a facrifice to the goddes Flora. Length, 16 in.; depth, 63 in.

# No. 759.

ARGE OBLONG PLAQUE. Old blue and white cameo Wedgwood ware. A frieze of infant fatyrs, in the manner of the Antique. Length, 12½ in.; depth, 5 in.

# No. 760.

in Sèvres Porcelain, of the time of the Empire. Gros bleu ground, with gilded palmette and other ornamentation, in the Antique Greek style. The centre vase contains, in front, a circular medallion, painted with the portrait of Napoleon in his robes of state, and wearing a laurel wreath. In the highest style of nineteenth century French art. Height of each vase, 16 in.

# PICTURES AND DRAWINGS BY ANCIENT MASTERS.

#### CATALOGUE.

#### No. 801.

Head of the Madonna—the hands classed in adoration. She is clad in a blue and red drapery, with a linen veil on her head. Very little is known of this excellent and popular painter. Lanzi states that he was born at the castle of Sasso-Ferrato, near Urbino, in 1605, and that he died at Rome in 1685, and was a pupil of his father, Tarquinio Salvi, and of Domenichino. 19 in. by 15 in.

### No. 802.

ENAIN. Group of fix peasant children or itinerant musicians; one of them is playing a pipe and another a small violin. There were three brothers of the Lenain family: Louis, Antoine, and Matthieu, born, it is supposed, at Laon, respectively in 1583, 1585, and 1593. The two first died about the year 1648. It is supposed that Louis and Antoine were conjointly the painters of the usual rustic subjects

of which this picture offers an example. Very little is known, however, about these eminent artists. (From the Rogers' Collection.) 9½ in. by 7½ in.

# No. 803.

fubject. A young man, dressed in fancy costume, is presenting a corbeille of flowers to a lady who is seated on the turf. In the background, a grove of trees, with two ladies and a cavalier. In the foreground, a child with flowers in her lap. Jean Batiste Pater, born at Valenciennes, 1695—died, 1736—was one of the most celebrated pupils of Watteau. His pictures are now scarcely less esteemed than those of his master. (From Mr. Goding's Collection.) 12 in. by 1034 in.

# No. 804.

OUCHER, François, born at Paris, 1704—died, 1768.

Drawing in coloured chalks. Head of a young girl.

(From Mr. Utterson's Collection.) 7\frac{7}{8} in. by 6\frac{1}{4} in.

### No. 805.

TURY, INITIAL LETTERS, painted on vellum, filled in with miniature paintings. The subjects represent respectively the Ascension of the Virgin, the Nativity, and an uncertain legendary subject, in which is depicted Christ on the cross on an altar, with blood pouring from his wounds into a chalice, and various figures standing near beholding the miracle. These beautiful initials have been cut from a fine choral book, and are the work of some eminent artist of the school or immediate period of Pietro Perugino. They are mounted in the same glazed frame.

### No. 806.

IOVANNI-BATISTA TIEPOLO. Venetian school. Born, 1697; died, 1770. Finished sketch in oil. Uncertain religious or allegorical subject. Height, 22½ in.; width, 11½ in.

### No. 807.

Venetian school. Born, 1712; died, 1793. View in Venice. 4 ft. 10 in. by 4 ft. 7 in. (From the Collection of Dr. Veron, of Paris.)

fchool.) Died 1779. Drawing in black, red, and white chalk, on light brown tinted paper. Study of the head of a youth in a three-cornered hat; lower down on the sheet the two hands of the same figure holding a portfolio. Height, 8\frac{3}{4} in.; width, 6 in.

#### No. 812.

1702; living in 1776. Highly-finished drawing in black and red chalks. Portraits of two ladies in Turkish costume, seated on a divan. In 1738, Liotard went to Constantinople with two English noblemen, and there made the acquaintance of the Earl of Bessborough, then ambassador to the Porte. He returned with that nobleman to England, where he lived many years; and, having continued to wear a Turkish dress and a long beard, he was known as "The Turk." This beautiful drawing was formerly in Lord Bessborough's Collection. Length, 8½ in.; height, 5¾ in.

# No 813.

of the last century, holding a palette and brushes in her hand. A portrait sketch from the life, probably of one of the infant princesses, daughters of George III. Johan Zossany was born at Frankfort in 1735, but lived the greater part of his life in England, where he became a member of the Royal Academy. Height, 22 in.; width, 16½ in.

# No. 814.

NTOINE WATTEAU—born at Valenciennes, 1684; died 1721. Finished sketch in oil. A fête champêtre—composition of many figures. Height, 15\frac{3}{4} in.; width, 12 in.

### No. 815.

NTOINE WATTEAU. "Conversation galante." Composition of seven figures in a landscape. Height,  $14\frac{1}{2}$  in.; width, 18 in. (From the Hon. E. Phipps' Collection.)

#### No. 816.

AVID TENIERS. Born at Antwerp, 1610; died, 1690. Village fête: a crowd of peasants affembled, feasting before a cabaret, to the music of a bagpipe, which a man who stands on a tub is playing; to the right, in the distance, is seen Teniers' château, with the artist, his wife and family, walking in front. (From Lord Northwick's Collection.) Height, 2 ft.; width, 1 ft. 81/2 in.

### No. 817.

ENOBIO DE MACCHIAVELLI. Florentine school. Painted circa 1473. "Sacra conversazione." Picture in distemper on panel. Width, 4 st. 11 in.; height, 4 st. 5 in. Composition of six small life-sized figures. In the centre is the Virgin seated on a throne, with the infant Saviour standing in her lap; in her left hand she holds a white rose. On her right hand stands St. Bernardino of Siena, holding a medallion inscribed with the monogram of Christ, and another saint, with a book in his hand, but without any other emblem. On the left of the Virgin is a sainted bishop, with a crosser, the border of his cope embroidered with sleurs-de-lys (probably the

Florentine, St. Zenobio), and St. Ierome, in the habit of a cardinal, with a book and a pen in his hands. In the right hand lower corner is the fignature of the painter, "Cenobii de Macchiaveli." Nothing is known of Macchiavelli except the bare mention of him in Vafari's Life of Benozzo Gozzoli, from which he would feem to have been Benozzo's principal pupil. This admirable picture is probably unfurpaffed by any eafel or panel picture of Benozzo himself now extant. It was originally in the church of Santa Croce, in Fosfabonda, without the walls of Pifa, together with another picture' by the fame artist, signed and dated 1473, representing the coronation of the Virgin. latter was taken to Paris at the period of the French occupation of Italy, and is now in the Louvre (No. 245); it is, however, far inferior to the present work. In the last Florentine edition of Vasari (Lemonnier, 1848, vol. 4, p. 191, note 2) is a notice of the two pictures, contributed by the Cavaliere Tommaso Puccini. The faints represented in the present picture are there, however, called "San Ranieri, San Francesco, San Giacomo," "e un altro fanto;" they are, however, evidently so designated in error. picture, after having been long deposited by its previous owner in the Accademia di belle Arti, in Pifa, was purchased for the present possessor in Florence in the spring of 1859. It is probable that this and the Louvre picture are the only works of the painter now extant, which are recognifable as fuch; they, however, alone suffice to entitle him to take rank with the greatest malters of the quattro-cento period. (See engraving, No. 1.)

### No. 818.

ORENZO DA CREDI. Born in Florence, 1452; died about 1536. The Virgin seated under a canopy, with the infant Saviour on her lap; in the background, a landscape with water and distant mountains; and on the right a church, with conventual buildings attached. Painted in oil

on an oval panel. An admirable work of the finest time of the master. In perfect preservation. (From Lord Northwick's Collection.) Height, 22½ in.; width, 14 in.

## No. 819.

IERO DELLA FRANCESCA. Born at Borgo San Sepolcro towards the beginning of the fifteenth century; living at an extreme old age in 1404. Picture in diftemper on panel. Height, 5 ft. 5 in.; width, 3 ft. 11 in. John baptizing our Saviour. In the centre are the principal figures, our Saviour and St. John, standing in a rivulet under the foreading branches of an acacia. On the left, a group of three standing angels. On the right, in the middle distance, a nearly nude figure of a disciple standing in the water; whilst in the distance a group of four minor draped figures completes the com-The landscape background is a view of the country around Borgo San Sepolcro—the city itself appearing, surrounded with gardens and vineyards, at the foot of the olive-covered Appennines. Piero della Francesco has always been reputed one of the luminaries of art. By the testimony of Vasari and other ancient writers, it is evident that he was regarded in his own time as one of those great inventors to whom the revival of art in the fifteenth century was due. Like his fucceffors—Leonardo da Vinci, Michael Angelo, and Raffaelle-Piero was an universal genius, and, amongst other labours, he acquired especial renown for his writings on geometry and perspective. Very few works of this great artist have descended to us. His principal labours as a painter were executed in Fresco, and have in most instances This picture was formerly in the facrifty of the catheperished. dral of Borgo San Sepolcro, from whence it was only removed in the spring of 1859, having been purchased by the author for its present possessor, from the Bishop and Chapter, who were desirous

of felling it in order to raife funds for the erection of a new high In its original locality it formed the centre division of a large altar-piece in three compartments; the original fide divisions, however, and the predella, had disappeared, and had been replaced by fimilar portions of another altar-piece, by a later and far inferior hand; these latter, therefore, were not removed. In addition to the present picture, which is believed to be the most important work of the master extant, the following are probably the only indubitably authentic panel pictures of the master now known:-1. In the Chiefetta dello Spedale, at Borgo San Sepolcro, a panel picture representing the Virgin, as "Nostra donna della Miserecordia;" also several portions of the predella of the same picture, let into the panels of an altar-piece of the seventeenth century.-2. In the facrifty of the cathedral of Urbino, a small picture reprefenting the flagellation of Christ.—3. A picture in very damaged condition, in the possession of the family Marini Franceschi (descendants of the painter), now resident in Florence, representing the Nativity.-4. In the Accademia at Perugia, a "facra conversazione," or Virgin with faints. - 5. In the gallery of the Uffizi, Florence, a diptych or picture in two compartmentsportraits of Federigo, Duke of Urbino, and his confort, Batista Sforza.

#### No. 820.

CHOOL OF FRA FILIPPO LIPPI. "Sacra conversazione." The Virgin and Child, with three angels. Half-length figures. A beautiful early distemper picture, purchased at Prato in the spring of 1859, from the representatives of a family of that city, in whose possession it had been from time immemorial. Height, 2 st. 4½ in.; width, 1 st. 8 in.

ENRI LEYS, of Antwerp. Mary of Burgundy giving alms to the poor. Commissioned from the artist by the present possessor. "Mary, daughter of Charles the Bold, succeeded in 1475, by the death of her father at Nancy, to the Duchy of Burgundy, which formed at that time one of the most powerful states in Europe, comprehending Burgundy, properly fo called, as far as Switzerland, Belgium, the Low Countries, French Flanders, Franche-Comté, Picardy, Artois, and the county of Boulogne: a great part, therefore, of France as it is to-day. A short time after ascending the throne, she married Duke Maximilian of Austria. Philip the Handsome, father of the Emperor Charles V., was the offspring of this union. young princels, whose memory is so endeared to her subjectsespecially to the Flemings-on her accession to power in the quality of Countefs of Flanders, took the oath which was administered to her, and which contained, among others, the following clause: - 'You swear also to revoke and annul all the dues imposed upon the burgesses of Ghent since the year 1450, to protect the widows and orphans, and to do all that a worthy Countess of Flanders can be expected to perform: and fo may God and all his faints affift you.—Oath of Mary of Burgundy.—Keroyn

de Lettenhorn.'-Histoire de Flandres, p. 219. By the terms widows and orphans, inferted in the formula of the oath, were understood, above all, those women whose husbands, or those children whose parents had belonged to the guilds of the cities of Ghent and Bruges, in which Mary of Burgundy alternately refided. and above all to the guilds of 'petits metriers,' which were unable to afford fufficient funds for the maintenance of their poor. denomination also included disabled artifans. The artist has treated the fubiect in the following manner: -Mary of Burgundy, accompanied by two ladies of honour, one of whom bears a casket, and followed by an attendant carrying a basket full of loaves of bread, has quitted her palace in order to perform her works of charity. The day is cold and mifty; a group of poor persons, who seem to have had notice of her arrival, are advancing to meet her, or rather appear to await her without the gate of the city of Bruges, then the metropolis of the commerce of the entire world, and which is to be feen in the background. middle distance appears the Duke Maximilian, accompanied by a lady of the court, coming to join the princess, and in passing he also bestows an alms upon a child, who holds his hat to him; behind him, on the bridge, the court fool is feen approaching; whilst curious spectators may be perceived on the towers and at the windows of the town. As may be feen, the artist has been daunted by no difficulty: he places his scene in the open air, and his perfonages, as well as the background of the picture, are illumined but by the doubtful light of a funless day in the month of November. Let us now examine with what talent the great artist has executed his subject. One is struck with the resemblance of this work to those of Van Eyck and Memling: but Leys, treating a subject of the fifteenth century—a period contemporary with those two great masters-could do no otherwise: such refemblance entered into the very nature of his subject—the rich and heavy stuffs of their time must naturally be disposed as he

represents them, and it is, besides, one of the finest qualities of his work, for although the principal group is treated with all the simplicity and finish of those two great painters, he surpasses them incontestably in the force and contrast of his colouring. mantle worn by Mary of Burgundy is of an intense blue; one of her ladies of honour wears a black boddice: the other a headdress of a brilliant white, a small cloak of dark vellow, and a robe of a vellow so pale as to be almost white, ornamented with a flowered pattern; beside her stands the page in the livery of Burgundy, entirely in red. Levs has not only fucceeded in obtaining the most perfect harmony between colours so opposed, but he has also had the talent to bring out his principal personage, for although the is furrounded by perfonages in fuch brilliant colours, although before her, and in a position nearer the spectator, is a woman wearing a dress of whitish grey, and a white headdrefs, and although the herfelf wears only fombre colours, the figure of the princess is the first which attracts the eye. principal group, together with the details, is painted with a finish to which few artists have attained: they are real miniatures in oil. Although the faces of Mary of Burgundy and Maximilian possess the merit of resemblance with known portraits, Leys has imparted to them a fitting expression. With what an air of nobility and happiness Mary performs the beneficent actions required by her oath; she is not beautiful, but everything about her bespeaks so much gentleness and denotes a heart so good, that she must be loved by her subjects. The eye rests with fatisfaction on the two charming faces of the ladies of honour following their mistress. The one with black hair and eyes intensely watches the movements of the princess, and seems to share in them; whilst she with the golden tresses, which she allows to fall upon her shoulders-their colour being then esteemed a beautyhas an angelic physiognomy; her carriage is full of dignity—she feems to be still advancing, but on the point of arresting her steps.

The page in red in the livery of Burgundy is treated with a master hand; his attitude is eafy, and he appears accustomed to the fervice he is performing. The group of poor perfons to the left of the picture is of great beauty: it denotes a profound acquaintance with the fufferings and miferies of humanity-each face bears upon it, so to speak, the history of a life-one sees that that kneeling female figure receiving the alms, as well as the one in a white head-dress, standing behind her, have once been in affluence: that they have been plunged into poverty, but by the death of a husband and by sickness. What gradations has not the artist imparted to the expressions of the other figures! the infirm artizans behind the women have faces which we feem to have feen again and again; whilft the orphans, according to their feveral ages, have their attention fixed upon the fubject which interests them in a more or less decided manner: the youngest appears to have knelt down mechanically—he is inattentive, and feems to be looking at the spectator. It is evident that the orphan kneeling befide the female receiving charity has long known poverty,—all this is treated with a master hand. In the middle distance, on the right, Duke Maximilian, wearing a blue furred mantle, is also giving alms to a child. He is placed and treated fo as not to interfere with the principal group, which the artist makes still further prominent by the superior finish he has The more the eye wanders to the right, the less given to it. carefully are the details made out, as compared with the principal figures. The sky, as well as the panorama of the city of Bruges in the background, have a magical effect if one gazes long upon the picture. Shutting out furrounding objects, the illusion is complete, and one might believe one's-felf transported to the very scene four centuries ago. When, in 1855, Leys obtained the medal of honour, it was the opinion of all connoisseurs that his talent had reached its culminating point, and that he would never furpass the work he there exhibited. The present picture proved victoriously the contrary, and should be considered as the masterpiece of the artist, surpassing all that he has as yet produced. It is destined to mark an epoch, and it is not without reason that all the journals of Belgium which have spoken of it have uniformly expressed regret that it cannot remain in their country."

#### MINIATURES.

ORTRAIT painting in miniature came prominently into vogue towards the beginning of the fixteenth century, and the great painter, Hans Holbein, was not only one of the earliest miniature painters, but to this day is un-

doubtedly the greatest. Previous to his time a few small portrait miniatures may have been executed in Italy (during the fecond half of the fifteenth century); these however, were in reality, small fquare oil or distemper pictures on panel—the circular and oval forms of miniatures fo constantly adhered to fince, having apparently been first affected in Germany. The Italian bronze portrait medallions, which were popular, as far back even as circa 1440-50, and which afforded occupation for the talents of fo many of the great quattro-cento painters and sculptors, may in truth be regarded as miniatures in bronze. They were fucceeded (in Germany) by fmall medallion portraits in carved wood, lithographic stone, and wax, generally enclosed in circular turned wood or ivory boxes. Several fuch carvings are extant from the hand of Albert Durer himself, and they are generally the work of excellent artists of his school and period. Finally came paintings in distemper or body colour, on vellum; these were at first nearly always circular in form, and the admirable miniatures by Holbein

in this Collection (Nos. 950 and 990) may be adduced as examples of this stage. These miniatures on vellum were at first enclosed in boxes like the carved medallion portraits already alluded to. The miniature by Hildyard (No. 952 in this Collection) is enclosed in one of these boxes. Later in the sixteenth century the oval shape came into sashion, and miniatures were usually painted on smooth cards—generally pieces of playing cards rubbed down with pumice stone. They were mounted in silver gilt or ormolu frames, and frequently also in costly enamelled gold settings as jewels or pendent ornaments.

The fortunate fojourn of Holbein in this country (1526-54) was the origin of the celebrated English school of miniature painting, which remains to this day even, the first in Europe. Nicholas Hildyard (born 1547, died 1619). Hoskins (period of Charles I.). The two Olivers: Isaac (born 1556, died 1617) and Peter (born 1601, died 1660)—Samuel Cooper (born 1609, died 1672) are the greatest English miniature painters of the seventeenth century.

On the Continent, one pre-eminent name should not be passed over: this is the celebrated enameller Petitot (born at Geneva 1607, died 1691); Petitot, moreover, resided long in England. This great artist, working on a more minute scale than his predecessors, and with a vehicle not more durable in its nature than brilliant and forcible in tint, has left us chefs d'œuvre of art in his particular province. His exquisite works are indeed the triumphs of enamel painting on metals. Petitot should be classed with the French school, and his style may be taken as the most prominent type of continental miniature painting.

#### CATALOGUE.

#### XVIII.—MINIATURES.

# No. 950.

Large circular miniature on vellum, in body Diam., 33 in. Portrait of a gentleman of apparently about forty-five years of age, clad in a ruffet or "murrey"-coloured filk veft, over which he wears a black filk doublet and a cloak or coat of the fame murrey-coloured filk, lined with fable fur, and with wide fleeves enriched with gold loops or tags. On his head is a flat cap of black velvet, ornamented with jewelled medallions. He grasps a gold-hilted sword with the left hand. He is of a corpulent habit, with long golden or red hair, cut straight across the forehead, and although apparently of a fomewhat phlegmatic temperament, has a physiognomy indicative of confiderable capacity and force of character. figure is a half length, and is detached on a blue background. This miniature is faid to represent Sir Thomas Pope, founder of Trinity College, Oxford; the engraved portrait, however, of this person, given in Fabers' "Founders," has but little refemblance to this, and the attribution is therefore by no means certain. As a work of art this miniature is unfurpassable; it is on a level with the finest works in oil of the great artist from whose hand it unquestionably proceeded.

## No. 951.

OLBEIN (or one of his immediate scholars). Small circular miniature in oil, in its original moulded ebony frame, formerly fitted with a box cover. Diam., 15 in. This interesting miniature is unquestionably Holbein's own portrait. He is represented clad in black, and wearing a black skull-cap; the right hand uplifted, and holding a brush, with which he is evidently supposed to be painting. In the left hand he holds what appears to be a small metal phial. Blue background.

### No. 952.

ICHOLAS HILDYARD. Oval miniature on vellum or card, in its original elaborately turned circular ivory box. Height, 2 in.; width, 15 in. portrait of a gentleman in black, wearing a ruff, detached on a background of ultramarine; inscribed round the margin, "An. dni. 1598—ætatis sua 50." On the reverse is painted a tree, on the branches of which a shield of arms is suspended, above a glory with a word in Hebrew characters inscribed within The following motto is written round the margin, "Tui benedictione florebit." This personage is said to be Nicholas Harborne, of Mundham, county of Norfolk, ambaffador from Queen (See Hakluyt's "Voyages" and Blom-Elizabeth to Turkey. field's "Norfolk.")

# No. 953.

ARGE CIRCULAR MINIATURE on vellum, attributed to Giulio Clovio, but more probably by an artifle of the school or following of Angelo Bronzino. Portrait of Bianca Capella. Half length. She is represented clad

in a simple undress of white, her blonde hair brushed back and confined within a silken net. Ultramarine blue background. This celebrated, or rather notorious, lady, was the mistress, and afterwards the second wife of Francis de Medicis, Grand Duke of Tuscany—secretly married in 1578, and again publicly in 1579; she and her husband both died in 1587. For a resumé of her eventful history see the "Biographie Universelle." (From the Poniatowski Gallery at Florence.)

# No. 954.

of the Queen of Bohemia, daughter of James I.  $2\frac{1}{8}$  in. She wears a rich figured or embroidered dress (coloured flowers on a white ground), with trimmings of bright green. A wide frill ruff of point lace, with a falling collar beneath it. Her hair is brushed back in the usual style of the epoch, and ornamented with jewels. A breast-knot of green silk en suite with the trimmings of the dress. She has a black braid round her neck, probably to suspend a jewel, and an ear-drop with a bow or knot of black braid, complete the costume. The background is a crimson curtain. The monogram of Oliver is painted in gold on the background space to the left.

### No. 955.

of Lady Hunsdon, temps James I.  $2\frac{1}{8}$  in. by  $1\frac{3}{4}$  in. She wears a low dress of black silk or satin, with shoulder and breast-knots of pink ribbon, and trimmed with a wide falling vandyked border of point lace. Wide and very elaborate full ruff. Her hair arranged in the usual lofty structure in parallel curls, and trimmed with bows of pink ribbon. A thin black braid or cord round the neck. Mat ultramarine background, with the monogram of Oliver in gold on the left.

# No. 956.

SAAC OLIVER. Oval miniature on card. 2½ in. by

1½ in. Portrait of Anne of Denmark, Queen of

James I. She wears a low black dress, trimmed with
point lace, and a large vertical puffed gauze or muslin ruff. The
hair brushed back from the forehead, and arranged in a very
formal manner. On the summit of her hair is an open jewelled
diadem, and round her neck a rich necklace of pearls with
enamelled gold jewels and pendent ornaments. Mat ultramarine
blue background, with the monogram of the artist to the right.

### No. 957.

SAAC OLIVER. Oval miniature on card. 2 in. by 15 in. Portrait of Sir Philip Sidney. He is dreffed in a black cut or flashed doublet, with a wide falling collar, edged with point lace. His brown hair is brushed back, and he wears a jewelled ear-drop in one ear. Ultramarine background, with the monogram of Oliver to the right. This famous courtier, poet, and accomplished gentleman was born in 1554, and slain at Zutphen in 1586.

# No. 958.

SAAC OLIVER. Oval miniature on card. 2\frac{1}{8} in. by 1\frac{5}{8} in. Portrait of a gentleman about thirty-five years old, with dark brown hair and a dark moultache. He wears a black doublet and a puffed frill ruff. Ultramarine background. A beautiful miniature in Oliver's most vigorous manner.

# No. 959.

AMUEL COOPER. Oval miniature on card. 2½ in. by 1¾ in. Portrait of the Earl of Carnarvon. Circa 1630-40. A young man of about twenty-four years

of age, with long auburn hair; falling collar, with wide vandyked border of point lace, and taffels attached. He wears a light green doublet slashed with vertical stripes of white. The background, a crimson velvet curtain.

# No. 960.

COOPER. Large oval miniature on card. 4\frac{3}{4} in. by 3\frac{7}{8} in. Portrait of "John Lord Bellasis, uncle to Lady Talbot, 1646." He is represented as about forty-five years old, in armour, and holding a commander's bâton in his hand. He is bare-headed, with long brown hair falling on his shoulders, and a scar, apparently from a sword-cut, covered with a strip of black plaister, on his forehead over the left eye. This nobleman was a distinguished leader and partisan of Charles I., in the civil war betwixt the King and the Parliament.

# No. 961.

COOPER. Oval miniature on card. 2 in. by 17 in.
Portrait of a young man with long black or dark
brown hair, clad in a black doublet with white linen
fleeves, and a falling collar of point lace. Ultramarine background, with the initials of the artift, S. C., and date, 1653, in
gold.

### No. 962.

COOPER. Oval miniature portrait of a lady, 2 in. by 1½ in., faid to be a Countess of Newcastle. She has long black curled hair, wears a low yellow satin dress, and has a necklace of two rows of pearls round her neck. Circa 1640.

# No. 963.

COOPER. Oval miniature on card. 3 in. by 2½ in. Portrait of Henry Jermyn, Lord Dover, dated 1667. Three-quarter face. He is in armour, and wears an immense light brown peruke, a voluminous falling band collar of rich point lace, tied with a black ribbon, and ornamented with bows of pink ribbon and a red scarf over his armour. Landscape background. Initials of the artist and date (1667) in the left hand lower corner of the background.

# No. 964.

COOPER. Oval miniature on card. 3 in. by 25 in. The Earl of Chestersield, in armour, wearing a blue scarf, falling collar of point lace, and voluminous peruke. Landscape background. Initialed by the artist, and dated 1667.

# No. 965.

when which is the proper with the proper with

# No. 966.

VAL MINIATURE on card. Painter unknown. 2½ in. by 1½ in. Portrait of Mary Claypole, daughter to Oliver Cromwell. At the back of this interesting miniature, in a hand evidently of the period, are the initials of the master, and date 1656, and "Mrs. Mary Claypole,

dr. to O. Cromwell." The lady is represented in a plain blue dress. She has long brown hair, with voluminous side curls, and the only ornaments are a plain head-band, ear-drops, and necklace of pearls en suite, and a breast-knot of narrow black ribbon, with a pendent pearl attached. This lady died in 1658, aged twenty-eight—she was therefore twenty-six years old at the time this miniature was painted, doubtless from the life. There is a strong family likeness to the Protector; and although the miniature has suffered considerably from the white-lead pigment having turned black, and being afterwards scraped away, the lineaments of the countenance have been in no way affected. Her death at Hampton Court is said to have hastened that of the Protector himself. (Mary Claypole died August 6, 1658, and Oliver Cromwell September 3, in the same year.)

# No. 967.

ENRY DANCKAERTS. Oval miniature in oil on copper. 2 in. by 15 in. Portrait of King Charles II. He wears a black doublet, wide falling collar with taffels, and a deep border of Bruffels lace. Black peruke and moustache. Charles II. was born in 1630, ascended the throne in 1660, and died in 1685. Judging from the apparent age of the King as represented in the miniature, it must have been painted about A.D. 1670.

### No. 968.

MALL CIRCULAR MINIATURE in its original filver case. Master unknown. Spanish. Diam., 7 in. Bust portrait of a young girl, probably an Infanta of Spain. Circa 1630.

# No. 969.

VAL CASE OR LOCKET, enamel on gold. one fide, Anne of Austria, in a widow's dress; and on the other, Louis XIV.—apparently nine or ten years The young King wears a scarlet striped doublet, broad blue ribbon or fcarf, falling collar, and a fcarlet oftrich feather in his hair, falling on to his shoulders. This interesting work is by one of the early French enamellers of the Toutin or Bordier school, and probably originally contained locks of the hair of the two royal personages. Anne of Austria, eldest daughter of Philip II., King of Spain, married Louis XIII., King of France, in 1615, and became mother of Louis XIV. in 1638. On the death of her husband, 1643, the young Louis XIV. being in his minority, she became Regent, and died in 1666. Judging from the apparent age of the young King, these miniatures must have been painted about 1650. Louis XIV. was five years old when he ascended the throne in 1643, and died in 1715, having reigned feventy-two years.

# No. 970.

OUARE MINIATURE in oil on copper. Painter unknown—probably by a follower of Velasquez. Circa 1650. Portrait of a Spanish lady in a low black dress trimmed with yellow. Her long black hair is ornamented with bunches of yellow ribbon, and with two falling lapels or bands of parallel strings of pearls. This striking miniature is singularly fresh and piquant in colour. 23 in. by 23 in.

### No. 971.

ETITOT. Small oval miniature—enamel on gold. 1 in. by 7 in. Portrait of Louis XIV., aged about thirty-five, probably painted about 1670-75.

## No. 972.

ETITOT. Small oval miniature—enamel on gold. If in. by I in. Portrait of the minister Louvois, aged about thirty-five. François Michel Letellier, Marquis de Louvois, Prime Minister to Louis XIV., was born in Paris in 1641, became powerful on the death of Colbert in 1683, and died in 1691.

### No. 973.

ETITOT. Minute oval miniature on card.  $\frac{7}{8}$  in. by  $\frac{3}{4}$  in. Portrait of a gentleman in costume of circa 1670, faid to be the Duke of Orleans, brother of Louis XIV., in the original gold locket-setting of the period. Philippe de France, Duc d'Orleans, only brother of Louis XIV. (born 1640, died 1701). This exquisitely beautiful miniature is unquestionably by the great artist to whom it is attributed, and is a rare example of his work in water colours

### No. 974.

chool of Petitot. Small oval miniature—enamel on gold. 1 in. by § in. Portrait of Henriette Anne d'Angleterre, Duchesse d'Orleans, daughter of Charles I., King of England, born at Exeter, 1644; married the Duke of Orleans, 1661 (see previous number); died at St. Cloud, 1670.

### No. 975.

CHOOL OF PETITOT. Small oval miniature on gold.
Portrait of a lady. 3 in. by 5 in. Circa 1700.

# No. 976.

CHOOL OF PETITOT. Miniature, enamel on gold.

11 in. by 1 in. Madame de Sevigné. Marie de
Rabutin Chantal, born 1617, married in 1644 the
Marquis de Sevigné, who was killed in a duel in 1651. Died
1696. Celebrated for the admirable collection of letters to her
daughter—esteemed as the most perfect models of French epistolary composition.

# No. 977.

N OVAL MINIATURE on ivory, in seventeenth century enamelled locket case. 11 in. by 1 in. Portrait of a lady, period of Louis XIV.

# No. 978.

INCKE. Miniature—enamel on gold. 13 in. by 13 in. Portrait of Lord Chestersield, dated 1735. Philip Dormer Stanhope, Earl of Chestersield, the celebrated orator, statesman, and writer; born 1694, died 1773.

# No. 979.

INCKE. Oval enamelled miniature on gold. 1\frac{1}{8} in. by 1\frac{1}{8} in. Portrait of Sir Robert Walpole, Earl of Orford, Prime Minister to George II.; born 1676, died 1745.

### No. 980.

N OVAL MINIATURE on gold. 13 in, by 13 in. The painter, François Boucher; figned, "Hornes, 1773."

### No. 981.

BLONG MINIATURE, in body colours or "guash," on card. 2\frac{3}{4} in. long, 2\frac{1}{4} in. high. Portrait of Louis XV. (half length), standing in a garden, and holding a rose in his hand. Born 1710, was the only surviving son of the Duc de Bourgogne, eldest son of Louis, the Dauphin, son of Louis XIV.; ascended the throne in 1715, became of age in 1723, and died in 1774.

### No. 982.

ASTER UNKNOWN. Oval miniature on ivory. 23 in. by 28 in. Portrait of Catherine II, of Russia, in her robes. Born 1729, became Empress by the dethronement and subsequent murder of her husband in 1762. Died in 1796.

### No. 983.

VAL MINIATURE on ivory. French, period of Louis XVI.  $2\frac{1}{8}$  in. by  $1\frac{3}{4}$  in. Portrait of a lady, probably an actress, in fancy costume.

# No. 984.

VAL MINIATURE on ivory. French, period of Louis XVI. 2\frac{3}{4} in. by 2\frac{1}{4} in. Portrait of a lady, probably an actress.

### No. 985.

ISABEY. Large oval miniature on ivory. Portrait of the Duke of Wellington in the forty-eighth year of his age.  $5\frac{1}{2}$  in. by  $4\frac{3}{8}$  in. On the reverse

is written, evidently in the handwriting of Isabey, "Peint par ordre de sa Majesté pour son cabinet particulier, 1818." Arthur Wellesley, Duke of Wellington, born May 1, 1769; died September 14, 1852.

# No. 986.

ARGE MINIATURE in oil—a work of the Spanish school of the seventeenth or early eighteenth century. The Madonna.

### No. 987.

on vellum. Flemish—circa 1560. Master unknown. "The Comte de Meghen." Half length, habited in a rich suit of armour damasquiné with gold. He holds a helmet in his right hand, and grasps the scabbard of his sword with his lest; around his neck is the collar of the Golden Fleece. The Comte de Meghen was a celebrated leader on the side of the Imperialists in Flanders, under the sanguinary Duke of Alva. 5\frac{3}{4} in. by 4\frac{1}{4} in.

# No. 988.

imilar square flemish miniature, by the same hand, and en suite with the preceding. "Femme du Comte de Ligne." Circa 1550-60. This lady is attired in a magnificent dress of black and white, profusely ornamented with jewels. 6 in. by 43 in.

# No. 989.

COOPER. Oval miniature on card. Circa 1645.

Lady Falconberg. A lady of about twenty-five years

old, with reddish auburn hair in long ringlets—plain

low white fatin dress, and wearing a necklace of pearls. Blue sky background. (From Lord Northwick's Collection.)  $2\frac{1}{4}$  in. by  $1\frac{\pi}{8}$  in.

### No. 990.

Thomas Seymour, Lord High Admiral of England. He is about thirty or thirty-five years old, has a reddish or fandy coloured beard and moustache, wears a black dress and black cap with a gold medallion in it. Plain ultramarine background. On the back of the miniature is written in an ancient, and perhaps nearly contemporary hand, "The picture of Sr Thos. Seymer, Knight, L Admyrall of England." Diam., 15 in. An exquisite miniature.

# No. 991.

COOPER. Oval miniature on card or vellum. The Earl of Pembroke. An exquisite miniature of the early time of the artist. Initialed, but without date. The Earl is represented as about forty years old, with long auburn hair, and small pointed beard and moustache, dressed in black satin, with falling collar edged with point lace. 2 in. by 15 in. (From Lord Northwick's Collection.)

# No. 992.

COOPER. Oval miniature on card or vellum. The Countess of Pembroke, wife of the preceding. An admirable miniature. The lady is about thirty-five years old, with light auburn hair in long ringlets. Low dress of white satin, ornamented with jewels, and necklace and ear-drops of large pearls. The background, a crimson curtain. 2 in. by 15 in.

# Nos. 993, 994, and 995.

Three young children of the Earl and Countess of Pembroke, painted on ultramarine backgrounds. Attributed to S. Cooper. Each 13 in. by 1 in. (From Lord Northwick's Collection.)

# No. 996.

VAL MINIATURE on ivory. A Countess of Shrewsbury—a lady of about fifty years old, in costume of the period of Queen Anne. Initialed "I. S.—60;" labelled "Spencer" on the back—probably the name of the artist. (From Lord Northwick's Collection.)

# No. 997.

ETER OLIVER. The Elector Palatine, King of Bohemia, fon-in-law of James I. Oval miniature on card or vellum, with the monogram of the artist. Dark blue background. 17 in. by 11 in.

# No. 998.

OLIVER. Oval miniature on card or vellum.

Dr. Donne, the poet. Signed with the monogram of Oliver in gold on the dark blue background, and dated 1610. An admirable and most perfectly preserved miniature. 2½ in. by 1¾ in. (From Lord Northwick's Collection.)

# No. 999.

VAL MINIATURE. Enamel on gold. The Marquis of Vieuville. Inscribed at the back, "Portrait in enamel of the Marquis de Vieuville, killed at the Battle

of Auburn Chase, Sept. 18, 1643." From the Portland and Strawberry Hill Collections—and more recently from Lord Northwick's Collection. A beautiful miniature, probably by P. Bordier. 2½ in. by 1½ in.

#### No. 1000.

A young lady with a black dress and wide pussed russ, wearing a black hat or cap ornamented with a cameo set in gold as a medallion, and a twisted wreath of pearls. Ultramarine background, with the inscription in gold, " Etatis sua 20; ano. dni. 1587." 21 in. by 15 in.

#### No. 1001.

COOPER. Oval miniature on card or vellum. A lady, aged about twenty-eight, with long auburn hair in ringlets. Low blue dress, with a necklace of pearls. Initialed S. C., and dated 1652. 2 in. by 15 in.

#### No. 1002.

HE EMPRESS JOSEPHINE. A beautiful French miniature on ivory. 3 in. by 2 \frac{1}{8}.

### No. 1003.

### No. 1004.

VAL MINIATURE on card or vellum. Philip Earl of Arundel, 1615. Modern copy from an original by Isaac Oliver. 2\frac{1}{8} in. by 1\frac{3}{4} in.

## No. 1005.

VAL MINIATURE, painted in oil on a flab of polifhed bloodstone. A sleeping Cupid, with a wine-flask. This exquisite minute work is attributed to Guido, and is in every respect worthy of that great master. 21 in. by 13 in.

#### No. 1006.

ETITOT. Oval miniature on vellum. Portrait of Louis Hector, Duc de Villars. 13 in. by 11 in.

## No. 1007.

ISABEY. Large oval miniature on card. Portrait of a lady in walking costume. Signed, "J. Isabey, Vienne, 1815." Height, 5½ in.; width, 3¾ in.

#### No. 1008.

Mary. Painted in oil on card, in gold enamelled locket-case. This admirable miniature is unquestionably by More, and to all appearance must have been painted from the life about the commencement of the Queen's reign (circa 1553). She is dressed in black, with a black coif or bonnet, richly adorned with strings of pearls and gold enamelled work. Round her neck she wears a narrow frill or russ, and her dress is edged with a collar of sur. The head is relieved on a plain blue background. The features, though somewhat angular and unmistakeably characteristic, are more refined than usual, and the general expression is very animated. Height, 13 in.; width, 13 in.

#### XIX.

# WATER-COLOUR DRAWINGS BY MODERN MASTERS.

ATER-COLOUR drawing, or more correctly fpeaking, painting in water colours, is effentially an art of modern times; Oftade, his pupil Du Sart, and some other Dutch artists of the seventeenth century, nevertheless, occa-

fionally produced drawings, which in the pigments employed, methods of execution, and refultant force of colour, very much refembled the modern works. These occasional efforts, however, led to no permanent refult, and it was not till the fecond half of the eighteenth century that certain English artists, amongst whom, Paul Sandby, Girtin, J. Varley, Cristall, G. Barrett, and above all, Turner, were the most conspicuous, formed a national school of water-colour painting. From the beginning of the present century, this branch of art has rapidly developed itself in England, and in the admirable works of Turner has, at all events as far as landscape is concerned, undoubtedly attained its highest point of excellence. It has remained a peculiar speciality of the English school, no foreign artist having as yet succeeded in rivalling that union of artiflic excellence with true appreciation of the nature and peculiar advantages of the vehicle, which our greatest water-colour painters have displayed. The names of David Cox, Copley Fielding, W. Hunt, Prout, De Wint, John

Lewis, Stanfield, and many other distinguished artists, including those previously named as the early founders of the school, will ever remain illustrious in the annals of the arts of the nineteenth century; their productions, indeed, may be said to mark the epoch, ranking in every respect on the same line with the works of the greatest contemporary painters in oil, many of whose most exquisite qualities of colour and luminous chiaro' scuro have been borrowed, indeed, from the sister vehicle.

## No. 1024.

Circa 1490. This beautiful book is in the most perfect state of preservation. It is enriched with fix illuminations, each of which fills the entire page, and with numerous decorated initial letters. The illuminations consist of the vignette subjects usually found in the Italian missals of this period, surrounded with splendid arabesque borders painted in the most vivid colours. The illuminations are probably by a pupil of Ghirlandaio. Size of the page,  $5\frac{1}{2}$  in. by 4 in. Purchased in Florence, 1859.

# No. 1025.

admirable little manuscript of Flemish origin. Circa 1470. Decorated by one of the great scholars of Van Eyck. The number of the illuminations, the exquisite sinish and elaboration of every detail, and the vivid freshness of the entire book, raise it to the very highest rank of its kind both in respect of intrinsic beauty and also in pecuniary value. It is bound in crimson velvet, with angle plates and class in gold filagree work—the latter probably added towards the end of the sixteenth century. On the sly-leaves are several curious signatures of previous possessions; amongst them occur the names of "Luxemburg," "Brandenburg," "Magdalen de Clenes, 1579," "Sibylle de Clenes, 1579," and "Diane de Dampmartin." Size of the page, 3½ in. by 2¾ in.
